OUTSIDE OHIO (800) 321-1320

At 10:43 a.m. Peter Doucet, Inside Salesman at Cramer/Newton got into analytical instruments.

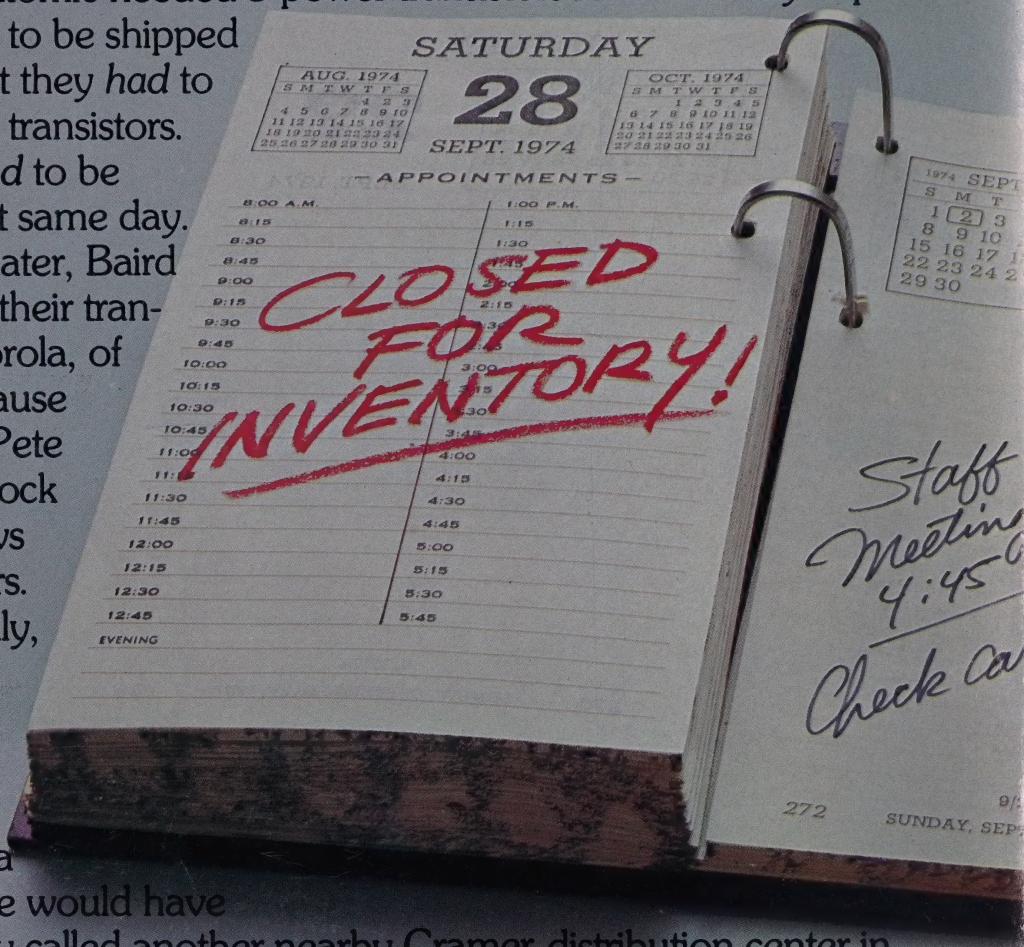
Peter didn't have to get into them that weekend. He *wanted* to. You see, Pete's typical of Cramer's dedicated professionals.

Service comes first. "Sorry, closed for annual inventory" comes second. So when the call from Baird Atomic (Scientific and Nuclear Instruments manufacturer) came in, Pete went right into action.

Baird Atomic needed 3 power transistors for three very expensive systems due to be shipped that day. But they *had* to be Motorola transistors. And they *had* to be received that same day.

Hours later, Baird Atomic had their transistors. Motorola, of course. Because fortunately Pete knows his stock like he knows his customers.

Naturally, if Cramer/Newton did not have a quality line like Motorola in stock, Pete would have automatically called another nearby Cramer distribution center in our $40,000,000 inventory network for an immediate air shipment.

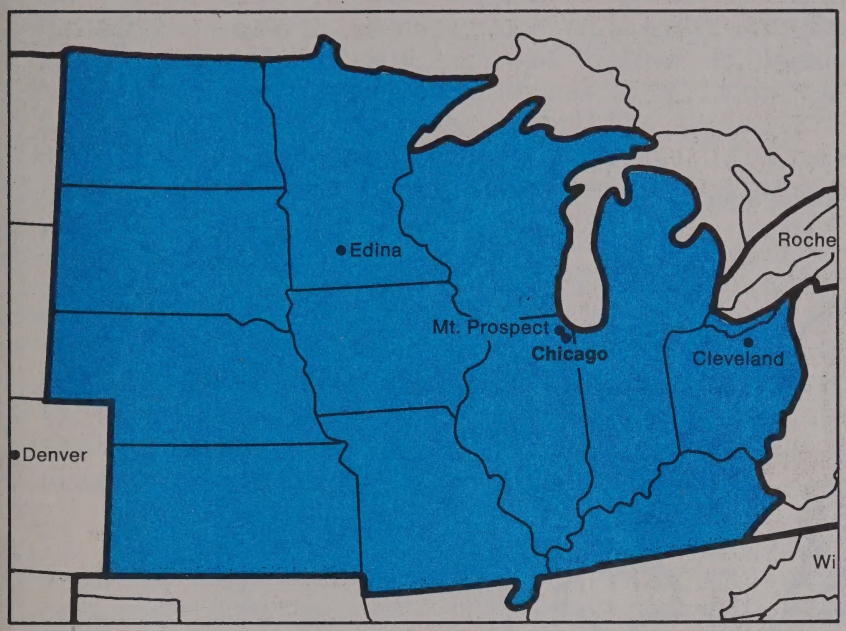


So if you feel like your present component supplier is putting things like "sorry, we're closed" ahead of your needs, call us. You'll always come first. No matter if you're large or small. Computer, communications or aerospace manufacturer. Name it. We've got 1,400 more around the country like Pete Doucet ready to get into your business.

cramer

Our most important component is service.

At Cramer, our most important component is service. For fast, accurate delivery on any line in this catalog, call your nearest Cramer distribution center in the Midwest.



Of all the quality components in this catalog, the one we consider most important is service. That means triple-checking every order for accuracy and shipping it within 24 hours; shipping it from local stock or from our nearest major stocking center.

To back up this service, we can use our computer directed on-line inventory control system to instantly call on our national $40,000,000 total inventory; $10 million of which we have right here in the Midwest.

Call your local Cramer salesman for your next component order. We also invite you to stop by and visit your local Cramer division and our corporate headquarters in Boston. We'd like the opportunity to show you all we have in stock and how we operate to fill your needs quickly and efficiently. You'll find you'll always receive our most important component—service.

Sincerely,

Harry H. Smith

Ordering and Shipping Information

When ordering from Cramer Electronics you can be sure that your order receives the most immediate and careful attention. Orders are shipped anywhere in the country within 24 hours and every order has been triple-checked for accuracy by our exclusive quality control department.

Orders, when required, are packed on a cushioned foamcore tray then sealed in a clear, heavy-duty plastic wrapper, using a unique heat-shrink device. This clean, modern process wraps the components firmly on the lightweight tray and provides a sturdy base for the corrugated box container. It also greatly reduces any possibility of breakage.

Open account terms are extended to rated firms, schools, institutions and government agencies. Firms without a published rating may apply for open account by submitting trade or bank references. Orders are filled at prices in effect at time of shipment. Prices shown in this catalog are those in effect at time of publication.

All prices apply only to U.S., Puerto Rico, and Canada. NOTE: We will adjust to current exchange rates all remittances made in Canadian funds.

If bids are required, make sure that Cramer Electronics is on your bidders list. Our 30 years of industrial electronic component distribution experience assures you of prompt service and competitive prices on all your electronic needs.

cramer
CRAMER ELECTRONICS, INC.

Dear Cramer Customer,

This 1976 Cramer Buyer's Guide is bound to be your finest in-depth source for all your component needs. It is comprised of hundreds of pages of the highest quality electronic components you can buy, representing over $40,000,000 of the most complete broadline inventory available. At Cramer, we're proud of the excellent reputations of all the manufacturers whose quality products we distribute.

We're proud, too, of our role in getting these products to you. "The right products at the right time at the right price"-- that's what Cramer's all about. We have over 1400 dedicated distribution professionals aiding in this task, at our 33 stocking centers located world-wide. That's why we say at Cramer, "Our most important component is service."

In the few pages not devoted to quality components we want to show you how our regional centers, our on-line computer system, our modification departments, our educational services, our exciting new universe concept, our huge inventory and our dedicated professionals work to give you the best service in the industry.

I would further like to point out the service stories featured on the inside covers. The stories are true, the people real and the message is clear. We're here to give you the best service possible on all our 100 lines of top quality components.

Call your local Cramer service center for any of the quality components in this catalog. Let us show you why at Cramer we say, "Our most important component is service."

Sincerely,

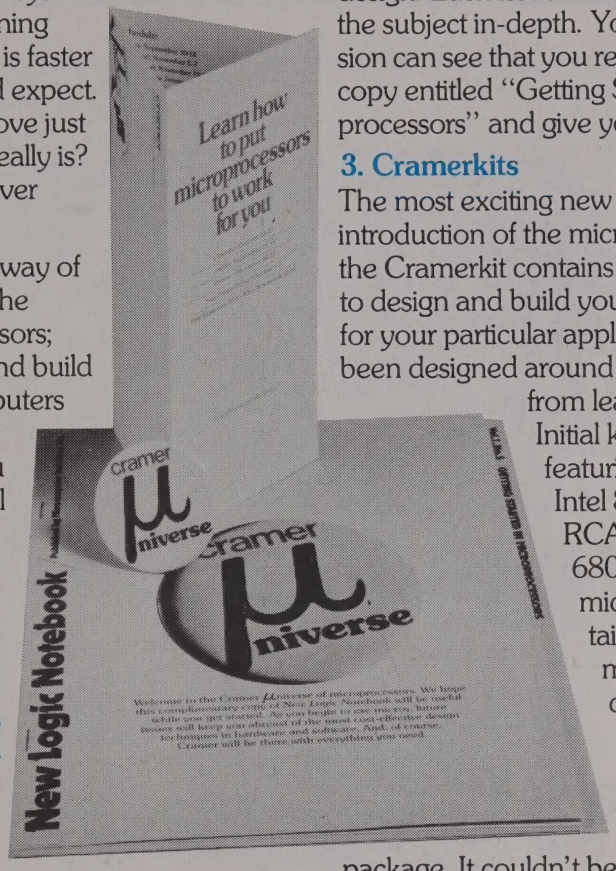
T.X. Cronin,
President

Discover the μniverse

Microprocessors and microcomputers are the electronics industry's newest technology.

They are having as much impact on our industry as the introduction of transistors and IC's did. They are rapidly replacing conventional logic, permitting systems to be smaller, more flexible and more economical. What's more, second sources and lower prices are making microprocessors the logical choice of increasing numbers of system designs. In fact, designing with microprocessors is faster and easier than you'd expect. But why not let us prove just how fast and easy it really is? Let us help you discover the μniverse.

μniverse is Cramer's way of helping you work in the world of microprocessors; helping you design and build your own microcomputers to meet your applications and helping you keep up to date on all the latest microcomputer developments. This help is provided in three phases of a total program.



1. Learning How To Design With Microprocessors

A special three day course scheduled for 11 major U.S. cities in 1975 and many more in 1976. This course is presented by Microcomputer Technique, a leading microcomputer design consulting firm, and it will provide you with a working knowledge necessary to design your particular system with microprocessors. Numerous practical examples show you how to reduce cost and space requirements while simultaneously giving you increased design flexibility. It covers hardware and software design trade-offs and system design techniques. Today's most popular microprocessors are also examined objectively. There is a charge for this course. Contact your local Cramer division for details on course content, dates, locations, costs, materials supplied and special video prep courses that are available.

2. New Logic Notebook

To keep you up to date with microcomputer design techniques and application developments this unique publication can be sent to you monthly. Published by Microcomputer Technique, it is edited by recognized leaders and educators in the field of microcomputer design. Each issue covers a single phase of the subject in-depth. Your local Cramer division can see that you receive a complimentary copy entitled "Getting Started in Microprocessors" and give you subscription costs.

3. Cramerkits

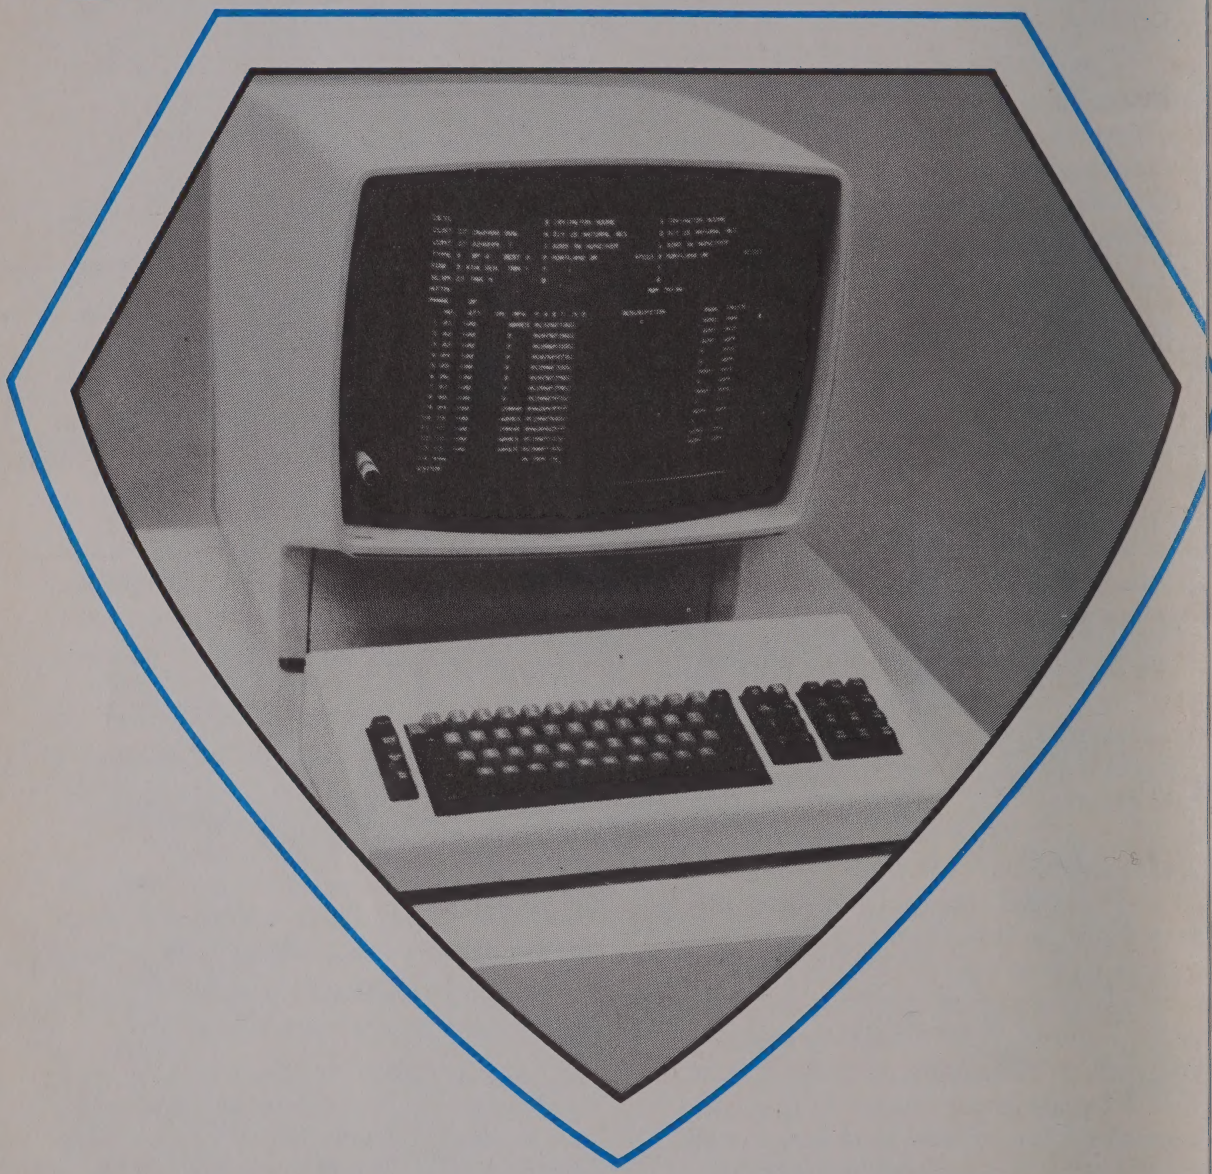
The most exciting new product entry since the introduction of the microprocessor itself, the Cramerkit contains everything you need to design and build your own microcomputer for your particular application. The kits have been designed around microprocessors from leading manufacturers. Initial kits are available featuring the AMD 9080, Intel 8080A, Mostek F8, RCA COS MAC, Motorola 6800 and TI TMS 8080 microprocessors and contain a complete bill of materials, schematic, design manual and audio programming cassettes; all this in a single, well organized ready-to-assemble package. It couldn't be simpler and once you're over the hurdle of your first design you'll rapidly become a microcomputer expert.

These kits are available now. Call your local Cramer salesman for more information.

This gives you a little idea of what the Cramer μniverse is about but you really have to get the full story from your local Cramer division. They'll put you in touch with Microcomputer Technique. If your questions require professional design assistance. Call Cramer today and discover the μniverse. It's the only total, in-depth microcomputer service program available from a single source supplier and supported by the leading logic designers in the industry.

Introducing:

Supersystem



Our new computer-controlled inventory system is completely installed with all our U.S.-based service centers connected to our giant IBM 370/145 computer located in Newton, Massachusetts. It is designed with you, our customer, in mind—so we call it the VIP (Visibility for Inventory Parts) system.

Here's how it can help you:

Let's suppose that you need PROM'S. You also need accurate, concise information on availability, price and delivery time. And you need that information fast.

You call your local Cramer division with a request for immediate delivery of 1500 Intel PROM'S.

The Cramer Sales Professional who takes your call immediately signs into the data bank through his own desk top terminal. He immediately tells you that he can fill your entire order from local stock, and gives you necessary pricing information. If, however, your order were to exceed his available stock, the computer would tell him what other Cramer locations had the PROM's on hand. It would also tell him which locations with available stock are nearest.

In that event, when he placed the order, the computer would automatically generate the order forms at all additional selected stocking locations, while simultaneously updating the necessary inventory information.

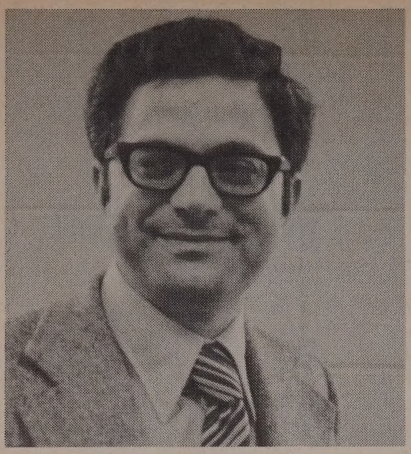
At the warehouses, hard-copy orders would be printed out minutes after you confirm your order. This sets Cramer inventory personnel into action. As hard-copies come directly from the computer to the printers at their locations, your requested stock is assembled and prepared for shipment.

The order is then placed on the first available air-pac to your local Cramer division. The following morning, the orders arrive and are delivered to you.

So what does V.I.P. Supersystem mean to you? Simply, that now with one call to Cramer, we can instantly:

- Locate all existing stock both locally and nationally.
- Provide routing information.
- Generate necessary order information in each affected location.
- Initiate the order and delivery.
- Provide all the information you require in minutes.
- Provide 24 hour turnaround.

No wonder V.I.P. Supersystem is the best components system currently in operation. After all, it's the only one specifically designed for an electronics distributor. But we're not going to settle for just being the best. We're already working on new features and benefits to help make your job easier and more cost-effective. Look for information on these in the near future.



Cramer Italia spa un'unica fonte di approvvigionamento per ogni esigenza di componenti elettronici

Cramer Italia spa è presente sul mercato italiano soltanto da un triennio, e numerosissimi clienti hanno già usufruito e si giovano tuttora del suo servizio.

La nostra Società ha la distribuzione ufficiale per l'intero territorio nazionale della Motorola Semiconduttori spa, della Texas Instruments Italia spa e della Advanced Micro Devices Inc, con un notevole stock di magazzino dei componenti di dette Case.

Inoltre, i clienti che ci conoscono, sanno che rivolgendosi a noi è possibile attingere — mediante la nostra linea privata e continua di telescriventi — direttamente ai magazzini Cramer negli USA, il cui materiale supera i 30 miliardi di lire di valore, ed è costantemente aggiornato dai Product Managers dislocati nei 37 Centri, ivi esistenti.

cramer italia spa
Gianfranco Perlini
DIRETTORE GENERALE

I nostri tre uffici di Roma, Milano e Bologna sono collegati tra di loro con linee telefoniche dirette e continue per assicurare la immediata trasmissione delle informazioni.

Pertanto è sufficiente il costo di una semplice telefonata urbana per accedere personalmente, non solo ai magazzini esistenti in Italia, ma anche ad uno qualsiasi di quelli esistenti nei 37 centri Cramer negli Stati Uniti.

Per questo motivo di fondo Vi chiediamo di usare al massimo delle nostre possibilità, in quanto crediamo che, pur offrendo una dovizia di servizi come quelli descritti finora, siamo in grado di essere competitivi con il mercato dell'approvvigionamento dei componenti.

Fateci essere presenti nelle Vostre richieste di offerte; siate Voi a suggerire i Vostri consumi per aggiornare i nostri magazzini; in sintesi *diteci Voi cosa volete che noi teniamo a stock!*

Un nostro sistema di computer installato a Roma ci permette di snellire al massimo la gestione degli ordini e ci consente di consegnarVi materiale disponibile entro 24 ore, se a stock in Italia ed entro 48 ore se a stock negli USA.

Vi ricordiamo infine che i prezzi riportati nel presente catalogo sono puramente indicativi, in quanto soggetti alle oscillazioni di valuta ed a variazioni di prezzo delle case rappresentate.

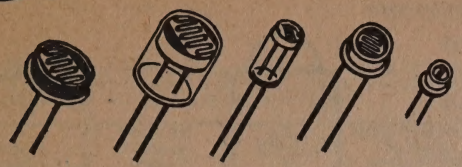
CLAIREX® Photoconductor Cells



CL5M CL500 CL600 CL700 CL900

Variable resistors controlled by light for automation and control applications. Five series in both metal and glass packages meet most design requirements. Available in low resistance "L" types for transistor and other low voltage uses. Feature stable and closely controlled parameters. High ratio of light-to-dark current at low light levels. High sensitivity and fast response of cadmium selenide. **Operating Temperature:** −50° C to +75° C. **Size:** CL5M series, .490″ dia. x .183″ h.; CL500 series, .500″ dia. x ½″ lg.; CL600 series, .250″ dia. x ½″ lg.; CL700 series, TO-5 case .360″ dia. x .180″ h.; CL900 series, TO-18 case .210″ dia. x .150″ h.

Silicon planar phototransistors in hermetic packages. Light Current (I_L): Light source is a frosted tungsten incandescent lamp at 2854° K t_r and t_f light source is a gallium arsenide LED (light emitting diode) pulsed with a rise and fall time of <0.3 μsec. I_C=200 mA max. Pulsed conditions, 300 μsec, 2% duty cycle (CLT2010–CLT2160 not pulsed). Size: Fig. A, 0.183″ (±.007″) dia. x 0.200″ (±.010″) h.; 0.500″ min. leads. Window 0.155″ (±.005″) dia. x 0.010″ h. max. Physical dimensions in accordance with JEDEC TO-18 outline except for window on top of can. Collector electrically connected to case. Leads gold plated Kovar. Fig. B, same as Fig. A except lens 0.147″ (±.011″) dia. x 0.040″ (±.010″) h. max. Fig. C, 0.060″ (±.003″) dia. x 0.110″ (±0.010″) h. Window 0.040″ (±.005″) dia. x 0.005″ h. max. Case gold plated Kovar. Fig. D, same as Fig. C except lens 0.040″ (±.005″) dia. x 0.025″ (±.004″). h. Fig. E, 0.060″ (±.003″) dia. x 0.588″ (±.015″) lg. Window 0.040″ (±.005″) dia. x 0.005″ h. max. Lead gold plated Kovar. Fig. F, same as Fig. E except lens 0.040″ (±.005″) dia. x 0.025″ (±.004″) h.

NPN SILICON PLANAR EPITAXIAL PHOTOTRANSISTORS

Three terminal phototransistors in a hermetically sealed TO-18 case. Base lead is provided to enable more flexible circuit design. Offer a full range of high current sensitivity for low illumination levels. Applications include beam breakers, signal recognition, photo switching, counters, sorters, processing and control.

NPN SILICON PLANAR EPITAXIAL DARLINGTON PHOTOTRANSISTORS

Same as above except this series is characterized for controlled, high sensitivity at very low irradiance levels. The flat window eliminates the need for critical sensor positioning in applications with low irradiance; lensed window reduces optical cross-talk from stray light.

SILICON PLANAR EPITAXIAL PHOTOTRANSISTORS

Silicon phototransistors in miniature hermetic package designed for high-density mounting applications in card and tape readers, pattern and character recognition equipment, encoders and associated designs requiring stable characteristics. CLT3020 and CLT3030, types are characterized by a wide acceptance angle, fast switching and narrow tolerance ranges of sensitivity. Flat window minimizes the need for critical sensor positioning in many applications. CLT3160, CLT3170, CLT5160 and CLT5170 types are characterized by a narrow acceptance angle, fast switching and narrow tolerance ranges of sensitivity. Lensed window reduces optical cross-talk from stray light present in many applications.

PHOTOTRANSISTORS (CONT'D)

OPTO-ISOLATOR

The Clairex series of opto-isolator features a range of transfer ratios and speeds that are unique in the industry. Emitter is a gallium arsenide diode and detector is an NPN silicon planar phototransistor. Size: .350″ w. x .260″ d. x .130″ h. without leads. Leads: .164″ x .016″ (with .100″ ±.010″ space between leads).

OPTICAL SWITCHES

The CLI55 and CLI200 utilize hermetically sealed infrared LED's and hermetically sealed silicon sensors. A Darlington phototransistor is used in the CLI55 and a phototransistor is used in the CLI200. Glass lens are used on all of the emitters and sensors to provide a narrow light path across the gap and to reduce maintenance. The CLI55 optical switch housing has 12 inch leads for circuit connections. The CLI200 is designed for circuit board plug-in.

*Case 271; collector light current = 0.5 mA min. at V_{CE} = 5.0 V and I_F = 15 mA.

AS NEW MOTOROLA TYPES ARE DEVELOPED WE WILL HAVE THEM IN STOCK FOR IMMEDIATE DELIVERY

PIN SILICON PHOTODIODES

Designed for application in laser detection, light demodulation, detection of radiation from visible and near infrared LEDs, shaft or position encoders, switching and logic circuits or any design requiring radiation sensitivity and stable characteristics. High speed devices with response time of less than 1.0 ns typical. Dark current = 2.0 nA max. at V_R = 20 V; response time = 1.0 ns typ.

Motorola Type	Case	Lens	H = 2.0 mW/cm² Sensitivity μA/mW/cm²	H = 2.0 mW/cm² Light Current	Net Ea., Lots 1-99	Net Ea., Lots 100-999

RCA NUMITRON DIGITAL DISPLAY DEVICES

DR2000 Series

DR2100, DR2200 Series

Low voltage digital readout devices with sharp, high brightness numeric display, reliable at all light levels, indoors and out. Fully compatible with IC decoder/drivers and may be operated in either a direct or multiplex mode. Wide spectrum light emission permits use of unlimited color filters. Simple voltage controls make brightness fully adjustable. High contrast segmented digits viewed against dark background. "Upfront" display permits wide-angle viewing (120°–140°) with display free of "clutter" and residual images. Incandescent readout device is free from induced or radiated interference. Rugged, single-plane unit construction for reliable service with 100,000 hours min. life expectancy. Solderable base pins permit direct PC board mounting. In addition to numerals, plus or minus, and decimals, individual segments may be addressed to provide symbol or alphabetical output such as letters A, C, E, F, H, J, L, P, U and Y.

DR2000 Series: Fits low cost 9-pin miniature sockets; 0.8″ mounting centers. Character size, 0.6″ h. x 0.35″ w.

DR2100 and DR2200 Series: Fit TO-5 style, 10-pin sockets; 0.5″ mounting centers. Character size, 0.4″ h. x 0.234″ w.

Application information and specifications available on request.

RCA Type	NUMITRON Description	Net, 1-99*
DR2000	Numerals 0 thru 9	$5.50
DR2010	Numerals 0 thru 9 with decimal	5.75

High Voltage Molded Case

The Raysistor® is a four-terminal optoelectronic device which performs a variety of control functions. It provides noise-free control of AC or DC signals over a wide dynamic range without transients or contact (or wiper) chatter. Since there are no moving parts, Raysistors are exceptionally rugged and have inherently long life in such typical applications as variable resistors, solid state switches, relays, and voltage or signal isolators. These units operate on the principle of controlled light acting on a photoresistive element. No electrical or mechanical connection exists between the control and signal circuits. Available in the ten case styles described at right.

®Registered Raytheon Company trademark.

CASE STYLES AND SIZES

Metal tube 2.25″ lg. nom. (example, Model CK1101); standard TO-5 case 0.370″ dia. max. x 0.260″ h. max. with flexible leads 1.5″ lg. min. SILICON PLANAR LIGHT SENSORS

Light current given is minimum value; all other values are maximum. H = 20 mW/cm². Source is an unfiltered tungsten linear-filament bulb operating at a color temperature of 2870° K.

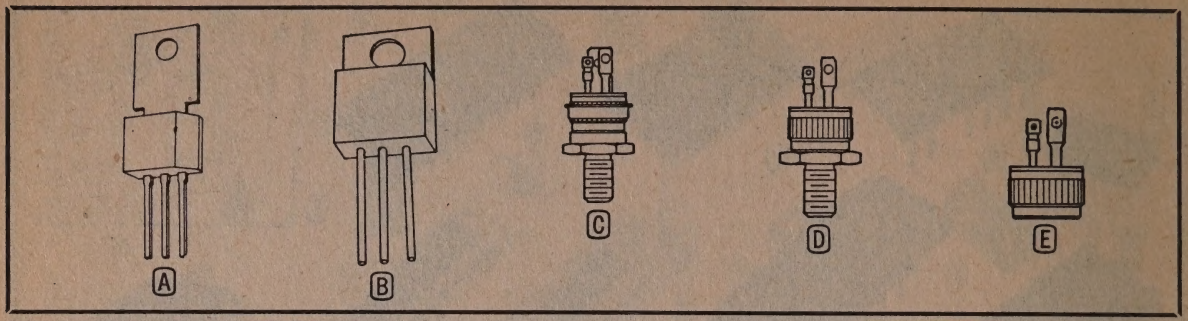
Triacs and Triac Triggers

PLASTIC AND METAL CAN TRIACS



Triac is a silicon AC switch which may be gate triggered from an OFF-state to an ON-state for either polarity of applied voltage. Triac is also an AC phase controller, that performs in a single device the function of two SCR's connected back to back to control heat, light and motor speed. Plastic triacs feature low cost and reliability. **Power Glas**™ passivated junctions, rugged and industry proven packaging and are available in various types of (TO-5, TO-66, etc.) formed leads. Metal can triacs feature **Power Glas** passivated junctions, glass to metal seal, high performance and reliability, transient voltage immunity and comprehensive specifications. Triacs are used in control circuitry in various electrical and mechanical equipments.

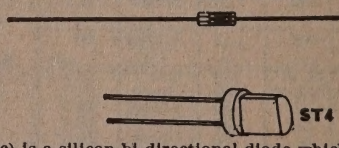
TRIAC TRIGGERS



ST2 (diac) is a silicon bi-directional diode which may be used for triggering triacs or SCR's. It has three layer structure with negative resistance switching characteristics in both directions. ST4 is an asymmetrical AC trigger integrated circuit for use in triac phase control applications. This device reduces the snap-on effects that are present in conventional trigger circuits by eliminating control circuit hysteresis. This performance is possible with a single RC time constant where as a symmetrical circuit of comparable performance would require at least three more passive components.

GE Type	V_{S2} Switching Volts Min.	V_{S2} Switching Volts Max.	V_{S1} Switching Volts Min.	V_{S1} Switching Volts Max.	Max. Switching Current μA	Min. Pulse Output Volts
ST2	28*	36*	28*	36*	200	3.0
ST4	7	9	14	18	80	3.5

*For ST2, $V_{S2} = V_{S1} \pm 10\%$.

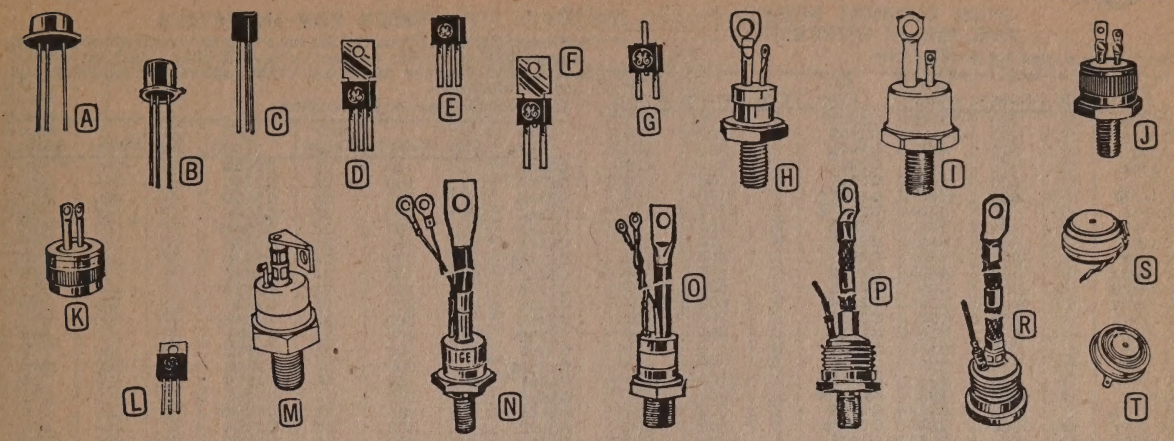
Silicon Controlled Rectifiers



SCR'S FOR PHASE CONTROL

"Phase Control" is a term used to describe silicon controlled rectifiers having slow turn-off time. Primary application for a device with relatively slow turn-off time are AC phase control— hence the name "phase control". This type of device is also used for zero voltage switching and selected pulse applications.

GE Series C602—(940 amps) available from 1600 to 2600 volts; write for more information.

*Repetitive peak forward and reverse voltage.

SEE LAST PAGES OF LISTING FOR OEM SEMICONDUCTOR PRICING

SCR's FOR INVERTERS

These SCR's are optimized for turn-off time (commutation speed), capability and other dynamic characteristics. Ideal for AC/DC inverters, choppers and other pulse applications requiring high speed capability.

See previous page for illustrations.

TYPE D13V
INTEGRATED VOLTAGE REGULATOR (IVR)

The IVR consists of two NPN transistors, a zener diode and a resistor on a monolithic chip mounted in a TO-98 three-lead plastic package. It is designed for use as a shunt voltage regulating element and reference amplifier with simple resistor programming. Characteristics: Regulated Voltage Range: 10 volts min.; 40 volts max. TC of Regulated Voltage: 0.3%/°C typ.; 0.1%/°C max. Thevenin Impedance: 10 ohms typ.; 50 ohms max. Thevenin Reference Voltage: 8.5 volts typ.; 10 volts max. Total Average Power: 400 mW.

REFERENCE AMPLIFIERS

Designed for applications in power supplies where they can serve the dual function of a voltage reference element and an error voltage amplifier. Integrated devices comprised of zener diode and NPN transistor in a single pellet. Cancellation of temperature coefficients between the zener diode and transistor result in a transfer characteristic having a very low net TC. Circuit Characteristics: V_{CB} = 3 V, I_C = 0.5 mA (RA3 Series, 0.1 mA), I_Z = 0 (RA3 Series, 5 mA), R_B = 1 K. For further information see PIB 35.35.

SEMICONDUCTOR MANUALS

GE SCR Manual ETR 3875A—5th edition. Over 500 pages consisting of much new information, including new chapters on triacs, regulating circuits and motor controls. Specifications on hundreds of new high-performance thyristors are detailed.
Price Each.....**$3.00**

PROGRAMMABLE UNIJUNCTION—PUT (TO-98)

Passivated PNPN devices with anode, anode gate and cathode terminals. Recommended for SCR trigger, pulse and timing circuits, oscillators, sensing and sweep circuits. Gate-cathode forward voltage and gate-anode reverse voltage = 40 V. Anode-cathode voltage = ±40 V.

GE Type	I_{GAO} V_S = 40 V nA	Max. Values at V_S = 10 V I_P µA	V_T V	I_V µA	$I_{F(CONT)}$ mA	P_T W

GERMANIUM TUNNEL DIODES

Ideal for high speed switching, 1000 times faster than computer diodes; microwave oscillators and mixers; communications—tuners, converters, detectors and amplifiers; level sensing—sampling (scopes), Schmidt triggers and counters; computer circuits—sense amplifiers, flip-flops, AND-NOR gates.

GENERAL PURPOSE (FIG. C)

Series inductance, 0.5 nH. Typical peak voltage, 65 mV except TD-9, 60 mV typical; "A" types, 65 mV ±7.

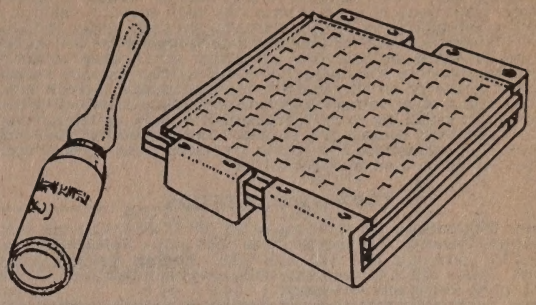
SEMICONDUCTOR CHIPS



Transistor and diode chips suitable for custom circuitry. Feature gold backing of 3000Å, minimum thickness, for transistor collector contact and diode cathode contact. Aluminum metalization for transistor emitter and base contacts and diode anode contact. Maximum conditions for mounting chips—425° C for a maximum of five minutes in an inert atmosphere. Chips are shipped in glass vials sealed with a nitrogen back-fill. This standard offering features optimum chip protection. Also available in "Tray Packs" in quantities of 100, 400 or 1,000.

SILICON PLANAR OXIDE-PASSIVATED DIODE CHIPS

GE Type	Description
1N914A Chip 1N914B Chip	High-speed switching in computer and general purpose applications
1N3064 Chip	Very high speed switching in computer and general purpose applications
1N3600 Chip	High conductance and high-speed switching in logic, core, hammer driver circuits and general purpose applications
1N3605 Chip	High-speed switching in computer and general purpose applications; high conductance, fast recovery time, low leakage and low capacitance
1N4150 Chip	Similar to 1N3600 Chip
1N4152 Chip	Similar to 1N3605 Chip
1N4454 Chip	Similar to 1N3064 Chip
1N4532 Chip	Similar to 1N3064 Chip
1N4533 Chip	Similar to 1N3605 Chip
1N4606 Chip	Similar to 1N3600 Chip except high voltage

SILICON PLANAR PASSIVATED TRANSISTOR CHIPS

GE Type	Description
2N708 Chip	NPN for high-speed switching, also suitable as small signal device
2N918 Chip 2N929 Chip 2N930 Chip	NPN for high frequency applications NPN for low-level amplifiers NPN for low-level amplifiers
2N2222 Chip	NPN for high-speed switching, amplifier and core driver applications
2N2484 Chip	NPN for low-level, high gain preamplifier use in hybrid and microminiature circuits
2N2714 Chip	NPN for general purpose applications
2N2905 Chip 2N2906 Chip 2N2907 Chip	PNP for amplifiers, drivers and general purpose switching (electrically similar to JEDEC series only)
2N3414 Chip 2N3415 Chip 2N3416 Chip 2N3417 Chip	NPN for general purpose circuits, specially suited for high-level linear amplifiers or medium-speed switching circuits in control applications
2N3855A Chip 2N3856A Chip	NPN for RE, IF and converters in AM and FM radio receivers and TV video amplifiers
2N3859 Chip 2N3860 Chip	NPN for AM radio, IF and converter applications
2N3975 Chip 2N3976 Chip	NPN for medium-speed switching and large signal RF amplifiers
2N5172 Chip	NPN for general purpose applications
2N5232 Chip	NPN for low noise preamp and small signal amplifier
2N5306 Chip	NPN darlington chip for preamp input stages
M22P2 M22P3 M22P4	NPN chip for general low signal levels
M73P1	NPN darlington chip for preamp input stages and medium-speed switching control circuits

GE-MOV® Metal Oxide Varistors

GE-MOV Varistors are voltage dependent, symmetrical resistors which perform in a manner similar to back-to-back zener diodes in circuit protective functions and offer advantages in performance and economics. When exposed to high energy voltage transient, varistor impedance changes from a very high standby value to a very low conducting value thus clamping the line voltage to a safe level. Dangerous energy of incoming high voltage pulse is absorbed by the GE-MOV varistor, thus protecting your voltage sensitive circuit components. Eliminates follow-on currents, extends contact life and protects circuit insulation. Applications include component and system voltage transient protection in inductive and transformer switching circuits, regenerative loads, switching magnetic amplifiers; contact arc suppression-reduction of lightning effects. If nonsinusoidal wave input is present, peak voltage input values should be used to select model.

TYPE PA VARISTORS

Power Dissipation: Up to 15 watts at 70° C mounting-tab temperature. **Current:** Can handle up to 2000 amps. **Voltage Rating:** 130–575 volts rms and 170–780 VDC. **Energy Rating:** 10–80 joules. Meets NEMA creep and strike-terminal distances. Comes with quick disconnect terminals.

DIGITAL HIGH LEVEL LOGIC

Choice of three temperature ranges and two Vcc values. Types listed with suffix **-5** have Vcc = 12 V nom. and −30° C to +85° C temperature range; types listed with suffix **-1** have Vcc = 12 V nom. and −55° C to +125° C temperature range. For Vcc = 15 V nom. and temperature range of −30° C to +70° C, specify suffix **H-5** (ITT301**H-5**D) or for temperature range of −55° C to +125° C, specify suffix **H-1** (ITT301**H-1**D). Prices are the same.

TTL DIGITAL

ITT7400 Series operating temperature 0° C to +75° C in plastic DIP (suffix **N**); and ceramic DIP (suffix **J**) available.

ITT5400 Series operating temperature of −55° C to ±125° C and in same packages as ITT7400 Series.

TTL DIGITAL

ITT7400 Series operating temperature 0° C to +75° C in plastic DIP (suffix **N**); and ceramic DIP (suffix **J**) available.

ITT5400 Series operating temperature of −55° C to ±125° C and in same packages as ITT7400 Series.

TTL HIGH SPEED DIGITAL

This series is designed to be used in conjunction with 54/7400 Series TTL in system locations requiring minimum propagation delays. ITT74H Series operating temperature 0° C to +75° C in plastic DIP (suffix **N**); ceramic DIP (suffix **J**) also available. ITT54H Series operating temperature of −55° C to +125° C in ceramic DIP (suffix **J**).

MIL-STD-883

ITT's approach to High Reliability provides a solid easily understood processing sequence. Each class level is geared exactly to the screening procedures outlined in Method 5004 of Military Standard 883 - Test Methods and Procedures for Integrated Circuits.
We supply the following product lines to 883.

5400 TTL 9000 TTL 9600 TTL Linear IC's
54H TTL 9300 TTL

intel® SEMICONDUCTOR MEMORIES, SHIFT REGISTERS, DECODERS AND DRIVERS

Silicon Gate low threshold technology allows design and production of higher performance MOS circuits; provides a higher functional density on a monolithic chip than conventional MOS technologies. Provides excellent protection against contamination.

Schottky barrier diode clamped transistors allow faster switching speeds than conventional gold diffusion process devices.

Package Prefix: C, ceramic, metal lid, hermetic DIP; **D,** cerdip, glass seal, hermetic DIP; **M,** metal can, hermetic; **P,** silicon plastic DIP.

Power Dissipation calculated with maximum power supply current and nominal power supply voltages.

RANDOM ACCESS MEMORIES (RAM)

T_A = 0° C to +70° C except Schottky bipolar types, T_A = 0° C to +75° C.

*If a tape is supplied in the proper format, there will be additional charge of **$10.00** per unit for programming. If the program is provided as a truth table only, a one-time set-up charge of **$90.00** per pattern will be made for converting to tape, in addition to the **$10.00** charge per unit for programming. †There is a **$35.00** set-up charge for programming of less than 100 devices of a single pattern and an additional programming charge of **$4.00** for 1–9 units or **$2.00** for 10–99 units. For released quantities of 100 or more of a single pattern, there is no set-up or programming charge. If the truth table is not submitted as a tape of the appropriate format, there will be an additional charge of **$90.00** for transcribing the truth table to a punched paper tape. #Minimum order is 100 pieces per pattern. Masking charge (incl. 3 units) is **$600.00** per pattern. §Minimum order is 100 pieces per pattern. Masking charge (incl. 3 units) is **$750.00** per pattern. *For prices contact factory or sales representative.

MCS-80 SYSTEM C

The MCS-80 N-channel, 8-bit, single-chip, microprocessor system, is complete with everything that is needed to put the 8080A to work. The 8080A is a complete 8-bit parallel central processing unit (CPU) for use in general purpose digital computer systems. A complete microcomputer system is formed when the 8080A CPU is interfaced with I/O ports and memory. When combined with Intel's growing family of performance-matched components, the result is the fastest, most powerful microcomputer system available. The MCS-80 features: the 8080A CPU; address capability—65 kilobytes of memory; 2.0 microsec. instruction cycle; binary and decimal arithmetic; separate address and data lines to simplify system design; powerful instruction set—unlimited subroutine nesting—multilevel interrupt and interrupt processing commands; performance matched peripheral circuits—memory and I/O latches permit easy interface; decoded control signals; up to 256 I/O ports—simplified I/O instructions.

MCS SYSTEM C COMPONENTS

Intel Type	Description	Net Each, Lots of 1-24	25-99	100-499

INTELLEC® MDS MICROCOMPUTER DEVELOPMENT SYSTEM

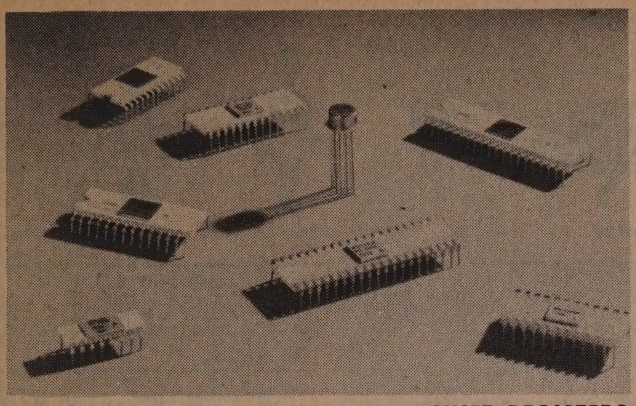
The Intellec MDS-800 is a complete microcomputer development system designed to support the development and implementation of MCS™-80 and Series 3000 microcomputer systems. The basic Intellec MDS-800 includes an 8080 CPU; universal bus with multiprocessor and DMA capabilities; 8 level maskable priority interrupt structure; real time clock; 256 byte bootstrap loader; 2K byte ROM memory; 16K byte RAM memory; and interfaces for the following peripherals: teletype, CRT, high-speed paper tape reader, high-speed paper tape punch, line printer and universal PROM programmer. Standard software includes a ROM resident system monitor, RAM resident 8080 macroassembler, and text editor.

Intellec MDS-800 System—Net Each..... **$3,950.00**

INTELLEC MDS OPTIONS

Intel Type	Description	Net Each
	MEMORY	
MDS-016	16K RAM memory—2107 N-channel dynamic RAM	$975.00
MDS-406	6K PROM memory—contains sockets for twenty-four 8702A PROMs	250.00
	INPUT/OUTPUT	
MDS-501	DMA Channel Controller—2 MHz transfer rate, PC board edge connector included. (The cable assembly is optional.)	$350.00
MDS-504	General Purpose I/O module—4 latched or unlatched input ports, 8 latched output ports, 8 system interrupt lines all TTL compatible, PC board edge connector included. (The cable assembly is optional.)	290.00
	PERIPHERALS	
MDS-PTR	High Speed Paper Tape Reader—200 Hz transfer rate. Cable assembly included.	$975.00
MDS-DOS	Diskette Operating System—includes Diskette drive, cabinet, power supplies, controller, cable assembly, system software, and one ¼ million byte floppy Diskette.	2,450.00
MDS-DRV	Diskette Drive—add-on drive and one ¼ million byte floppy Diskette.	900.00
	EMULATORS/SIMULATORS	
	IN-CIRCUIT EMULATORS	
MDS-30-ICE	3001 Microprogram Control Unit (MCU) In-Circuit Emulator. Cable assembly included.	$850.00
MDS-80-ICE	8080 CPU In-Circuit Emulator. Cable assembly included.	1,250.00
	ROM SIMULATORS	
SIM-101	8K bit bipolar ROM simulator configurable as 512 x 16 or 1024 x 8. Access time 130 nsec. max. A maximum of 4 units may be resident with the Intellec MDS. Includes cable kit to simulate the 3601 or 3301A ROM's.	$800.00
SIM-102	Same as SIM-101, except includes cable kit to simulate 3602/3622/ 3302/3322 ROM's.	800.00
SIM-104	Same as SIM-101, except includes cable kit to simulate 3604/3624/3304A/ 3324A/8604 ROM's.	800.00
	ADDITIONAL ROM SIMULATOR CABLE KITS	
SIM-361	Cable kit to simulate 3601or 3301A ROM's	$ 90.00
SIM-362	Cable kit to simulate 3602/3622/ 3302/3322 ROM's.	90.00
SIM-364	Cable kit to simulate 3604/3624/ 3304A/3324A/8604 ROM's.	90.00
	PROM PROGRAMMERS	
UPP-101	Universal PROM Programmer—includes cabinet, power supplies, cable and one 16/24 pin, zero-insertion-force PROM programming socket pair. At least one personality card must be specified, but price shown does not include selected personality card(s).	$650.00
UPP-102	Same as UPP-101, except includes a 24/24 pin PROM programming socket pair in place of the 16/24 pin pair	650.00
	ADDITIONAL PROM PROGRAMMING SOCKETS	
UPP-501	16-pin/24-pin PROM programming socket pair.	$ 50.00
UPP-502	24-pin/PROM programming socket pair.	50.00
	PERSONALITY CARDS	
UPP-361	3601 Personality Card	$300.00
UPP-864	8404/3604/3624 Personality Card	300.00
UPP-872	8702A/1702A Personality Card	300.00
UPP-878	8708/8704/2708/2704 Personality Card	300.00

MOSTEK MOS/LSI Integrated Circuits



• TTL/DTL COMPATIBLE

MOSTEK standard products are designed for ease of use and state-of-the-art performance at economical prices. These attributes result from MOSTEK's extensive use of ion-implantation in product manufacturing, a process MOSTEK pioneered and developed. TTL/DTL compatibility is stressed for those products designed to be used in conjunction with bipolar logic circuitry. Other products are designed for specific market areas, including instrumentation and consumer/industrial clocks and timing. TTL/DTL compatible except as otherwise noted. Package: Suffix **L**, TO-100; suffix **P**, hermetic ceramic dual-in-line; **N**, plastic dual-in-line.

SHIFT REGISTERS

MOSTEK Number	Pkg.	Leads	Description	Maximum Frequency	Net Each, Lots of 1-24	25-99	100-999

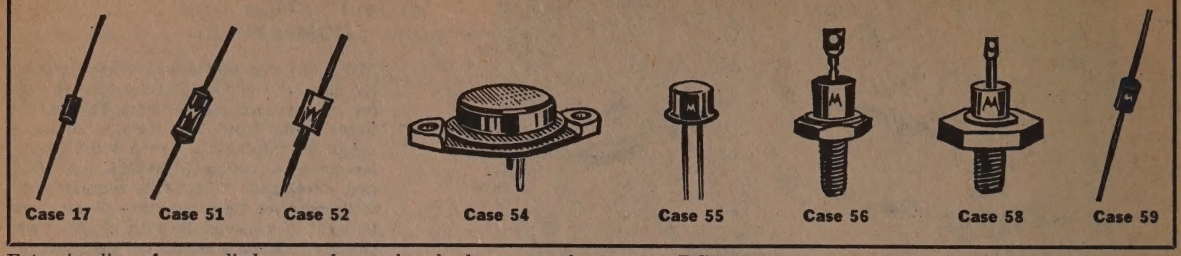
MOTOROLA Semiconductors

SILICON ZENER DIODES



Extensive line of zener diodes may be employed where a nearly constant DC output voltage is required despite relatively large changes in input voltage or load resistance. The zener voltage is measured at approximately ¼ the rated power except for 1N4099 Series which is measured with an I_{ZT}=250 μADC, and 1N4370 and 1N746 Series which is measured with an I_{ZT}=20 mADC. Standard voltage tolerances of ±5%, ±10% and ±20%; low and high level zener chips; intermediate voltages and tighter tolerances; non-standard devices available to meet virtually any zener diode requirement. MIL types available as noted.

250-mW LOW NOISE (CASE 51)

Test Current (I_{ZT}): 0.250 μA. **Tol.:** ±5%. Also Available: 1N4099–1N4135 JAN, JTX to MIL-S-19500/435.

HIGH-CURRENT RECTIFIERS

Ratings at 150° C. **Mounting Type Suffix: FB** flat-mount with flexible braided lead; **FL** flat-mount (A) MR1200–MR1209 or flat-mount (B) all others, with solid lug terminal; **SB** stud-mount with flexible braided lead; **SL** stud mount with solid lug terminal. For reverse polarity add final suffix **R** (MR1211**SBR**); same price. $V_{RM(REP)}$ of 50, 150, 250, 300 and 350 V available.

50 AMPERES TYPE

$I_O = 50$ A; $I_{FM(surge)} = 800$ A; $I_{R(AV)} = 10$ mA. Available flat-mount (A) only.

Motorola Type	V_{RM} (REP) Volts	Net Each, Lots of 1-24	25-99	100-199
MR1205FL	300	$ 7.15	$ 6.15	$ 5.40
MR1209FL	600	11.60	9.90	8.70
MR5005*†	50	2.20	1.70	1.38
MR5010*†	100	2.50	1.92	1.56
MR5020*†	200	2.80	2.15	1.75
MR5030*†	300	3.10	2.39	1.94
MR5040*†	400	3.80	2.92	2.37

*In Case 43. †$I_{R(AV)} = 2$ mA.

100 AMPERES TYPE

$I_O = 100$ amps; $I_{FM(surge)} = 2000$ amps; $I_{R(AV)} = 15$ mA. Mounting type **SL** also available at lower price.

MR1215SL	300	$ 8.75	$ 7.50	$ 6.55
MR1219SL	600	14.80	12.70	11.10

400 AMPERES TYPE

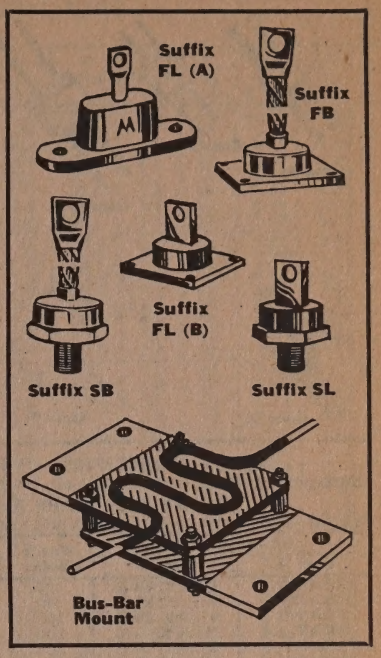
$I_O = 400$ A; $I_{FM(surge)} = 8000$ A; $I_{R(AV)} = 50$ mA. Mounting type **FL** and **SL** available.

Motorola Type	V_{RM} (REP) Volts	Net Each, Lots of 1-24	25-99
MR1245FL	300	$32.25	$28.20
MR1245SL	300	33.00	28.85
MR1249FL	600	54.70	47.85
MR1249SL	600	57.00	49.90

650 AMPERES TYPE

$I_O = 650$ A; $I_{FM(surge)} = 12{,}000$ A; $I_{R(AV)} = 100$ mA. Available flat-mount only.

Motorola Type	V_{RM} (REP) Volts	Net Each, Lots of 1-24	25-99
MR1265FL	300	$62.00	$54.40
MR1269FL	600	101.00	88.60



FAST RECOVERY POWER RECTIFIERS

Reverse polarity available as noted.

NPN-PNP PLASTIC ENCAPSULATED SMALL-SIGNAL SILICON TRANSISTORS (CASE 29) CONT'D

Devices are listed in order of decreasing breakdown voltage (BV_{CEO}), then in order of decreasing collector test current (I_C). P_D = 350 mW at T_A = 25° C. NPN except as otherwise noted.

GENERAL-PURPOSE SATURATED SWITCHING

May also be used as general-purpose amplifiers.

SILICON POWER TRANSISTORS

COMPLEMENTARY POWER TRANSISTORS

This list represents the large number of "off-the-shelf" complementary silicon power transistors available. For convenience in choosing complements, a selection can be made on the basis of maximum collector current, case, and voltage. Ic ratings are maximum.

SMALL-SIGNAL HERMETIC TRANSISTORS

Following types are preferred types; chosen using performance and cost as the criteria. Many other types available. Listed in order of decreasing BV_{CEO} and h_{FE} values.

SILICON AMPLIFIER—300 mW TO 600 mW

Low current; normal operation—μA range.

Motorola Type	Case	Polarity	BV_{CEO} V	Min. h_{FE}	Net Ea., Lots 1-49	Net Ea., Lots 50-249
2N3799*	22	PNP	90	100	$3.50	$2.35
2N2484*	22	NPN	60	100	.52	.35
2N3799*	22	PNP	60	100	3.50	2.35
2N930A*†	22	NPN	45	100	1.80	1.09
2N929‡	22	NPN	45	50	2.25	1.50
2N918‡	20	NPN	45	25	2.90	1.73

Medium current; normal operation—low mA range. Type 2N2906, 2N2906A, 2N2907, 2N2907A also available in TO-46 (Case 26).

2N2907A‡	22	PNP	60	100	$2.20	$1.33
2N3251A‡	22	PNP	60	100	3.90	2.33

MECL III™ MC1600 SERIES

State-of-the-art, emitter coupled logic family with sub-nsec local propagation delays. Multilayer metalization for optimum performance. Compatible with MECL II and MECL 10,000™ Series. Temperature, 0° C to +75° C. V_{CC} = 0 V; V_{EE} = −5.2 V; T_A = 25° C.

MECL 10,000™ MC10,000 SERIES

Provides non-saturated switching for very high speed operation. MECL III™ is directly compatible with MECL 10,000 and can be used to extend the speed capability of the MECL 10,000 Series. Temperature −30° C to +85° C (MC10,000/MC10,200); −55° C to +125° C (MC10,500/MC10,600). V_{CC} = 0 V; V_{EE} = −5.2 V; T_A = 25° C. **L** suffix denotes dual inline ceramic package (Case 620).

MHTL™ MC660 SERIES

Feature outstanding noise immunity; provide error-free operation in high noise environments far beyond the tolerance of other IC families. Temperature −30° C to +75° C. V_{CC} = 15 V ± 1.0 VDC; T_A = 25° C. MHTL ceramic dual inline devices are available with specification over the −55° C to +125° C temperature range and/or with hi-rel processing on special order. **L** suffix denotes dual inline ceramic package (Case 620, 632), **P** suffix denotes dual inline plastic package (Case 646, 648).

MTTL™ MC7400 SERIES

Medium operating speed (15–30 MHz clock rate); good external noise immunity and high fan out. V_{CC} = 5.0 V; T_A = 25° C. Temperature, 0° C to +70° C. **F** suffix denotes flat ceramic package (Case 607, 650, 667), **L** suffix denotes dual inline ceramic package (Case 620, 623, 632), **P** suffix denotes dual inline plastic package (Case 646, 648, 649).

MTTL III™ MC3000 AND MC3100 SERIES

Designed for general purpose digital applications. High operating speed (30–50 MHz clock rate), good external noise immunity, high fan-out and capability of driving lines up to 600 pF capacitance. Temperature range 0° C to +75° C (MC3000 Series), −55° C to +125° C (MC3100 Series). V_{CC} = 5.0 V; T_A = 25° C. **L** suffix denotes dual inline ceramic pkg. (Case 632, TO-116). **F** flat ceramic pkg. (Case 607, TO-86) and **P** dual inline plastic pkg. (Case 646, TO-116) also available.

MDTL™ MC930 AND MC830 SERIES

MC930 Series −55° C to +125° C; MC830 Series 0° C to +75° C. V_{CC} = 5.0 VDC, T_A = 25° C.
NOTE: Most circuits also available in flat pack (0° to +75° C), TO-100 and ceramic dual inline packages.

LOW POWER mW MRTL™ MC908, MC808 AND MC708 SERIES (CASE 601)

MC908 Series −55° C to +125° C; MC808 Series 0° C to +75° C; MC708 Series +15° C to +55° C. P_D ratings at inputs high/inputs low except as otherwise noted. MC708 Series can be mixed with devices from the medium-power MC700 Series which has loading factors normalized for compatibility. V_{CC}=3.0 volts ±10% for MC908 Series; 3.6 volts ±10% for MC808 and MC708 Series. T_A=25° C. Plastic packaged devices are available in the MC708/MC808 Series only. Ceramic flat packages also available on request.

McMOS™ MC1400 SERIES COMPLEMENTARY MOS

Output logic excursion is independent of fan out; diode protection on all inputs. Temperature −40° C to +85° C. V_{DD} = 16 VDC. **L** suffix denotes dual inline ceramic pkg. (Case 620); **P** suffix denotes dual inline plastic pkg. (Case 648). Power dissipation value given is quiescent, typ./pkg. The following devices also available in chip form.

SEE FIRST TWO MOTOROLA IC PAGES FOR ADDITIONAL CASE ILLUSTRATIONS

INTERFACE CIRCUITS

Interface circuits fit in the gray area between the linear and digital realms. Usually these ICs perform the necessary translation between an analog signal input and the required digital logic levels or vice versa.

SENSE AMPLIFIERS—CORE AND PLATED-WIRE MEMORY

Provide the necessary translation from outputs of core or plated-wire to MTTL (unless otherwise noted) logic levels. Temperature −55° C to +125° C, MC5500/1500 Series; 0° C to +70° C, MC7500/1400 Series. Power supply, ±5.0 V except as otherwise noted.

SPECIAL-PURPOSE REGULATORS

Floating regulator can be used as a voltage controlled current source. Temperature −55° C to +125° C (MC1566); 0° C to +75° C (MC1466).

MC1566L	632	0–1000‡	§	0.30	$9.75	$8.15	$6.50
MC1466L	632	0–1000‡	#	0.36	7.50	6.25	5.00

*Dual voltage regulator. †Preset voltage range (V_{OR}); range is adjustable by adding external resistors from ±8.0 to ±20 VDC. ‡Limited only by the characteristics of the external series pass transistor. §Current regulation: 0.1% +1 mA; #0.02% +1 mA.

COS/MOS INTEGRATED CIRCUITS

CD4000A Series digital IC's operating temperature range −55° C to +125° C except types in plastic package, −40° C to +85° C. Noise immunity=4.5 V typ. Threshold voltage=1.5 V typ. N-channel; −1.5 V typ. P-channel. Recommended operating voltage range of 3 V to 15 V. DC supply voltage −0.5 V to +15 V. Available in four types of packages: Suffix **D**, ceramic dual inline; suffix **E**, plastic dual inline; suffix **K**, flat pack; suffix **T**, TO-5 style, 12 lead; all others are 14- or 16-lead.

High Reliability COS/MOS Integrated Circuits are also available from RCA. Complete data and pricing on request.

QUICK REFERENCE GUIDE FOR VOLTAGE REFERENCE (TC) DIODES

Siemens voltage reference (TC) diodes are shown in the form of quick reference chart below. To find the proper device, first select the reference voltage associated with the desired test current and operating temperature range and then read across to the appropriate 1N number shown under the selected temperature coefficient. For example, for nominal voltage of 12.8 volts, test current of 0.5 mA, an operating temperature range of −55° C to +100° C at a temp. stability of 0.01%/° C. Siemens number is 1N4896A.

SEE FOLLOWING PAGE FOR COMPLETE PRICING INFORMATION

SIEMENS CORPORATION Semiconductor Pricing

Listed below are the prices for Siemens voltage reference (TC) diodes and voltage regulator (zener) diodes. **Prices on request** on items not listed in the tables below. Reel packaging also available, specify and add **$0.02** per unit—minimum order of 1000 units. Zener diodes also available in tight tolerance. **For ±2% tolerance,** multiply the price shown by **2** and for **±1% tolerance,** multiply the price shown by **3.**

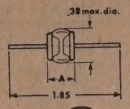
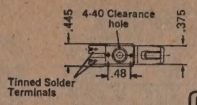
SIEMENS SVP® GAS-FILLED SURGE VOLTAGE PROTECTORS
FOR PROTECTION AGAINST LIGHTNING AND OTHER TRANSIENTS

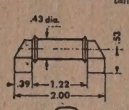
Button Type



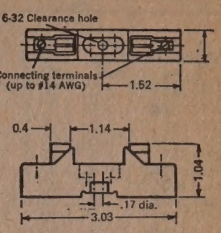
A



D



B



E

SVP tubes consist of two main electrodes, properly spaced by a glass or ceramic insulator. The main electrodes are bonded to the insulator and form a hermetically sealed discharge chamber which contains an inert gas. Provides effective protection against overvoltage transients, increasing reliability and reducing maintenance and down-time costs. Features fast response time in the nanosecond range, high current carrying capability, accurate breakdown voltage, low capacitance (2 to 6.8 pF depending upon type) and high insulation resistance (greater than 10^{10} ohms). Should be used in all types of electronic equipment where solid-state devices or other sensitive components are used, such as: instrumentation, communications, data processing, electric and electronic counters. Button Type is for transient protection in most applications. Power Type is for applications where especially severe current surges are anticipated.

SPECIFICATIONS

Rated Surge Discharge Current: Peak value of a current pulse with 8 μsec rise time and 20 μsec decay to half value, to which the protector will be subjected 10 times at intervals of 30 seconds, is 5000 amps; power types, 20,000 amps. **Capacitance:** Less than 2 pF between main electrodes except type L2-A230, less than 6.8 pF; L2-A350 and L2-A600; less than 4.5 pF.

BUTTON TYPE WITH WIRE LEADS (FIG. A)

Size, .38″ dia. x 1.85″ long (including leads).

PROGRAMMING SWITCHES FOR PC BOARDS

Low profile switch for printed circuit boards consists of two rows of 10 in-line terminals, on 0.1″ x 0.2″ grid spacing, connected by double-spring gold-plated contacts. Replaces the function of up to three rotary or slide switches, saving space and permitting economical dense packaging. Eliminates the labor of cross-wiring where occasional changes in operating conditions are required. A rotor is turned by a small screwdriver, 180° sequentially from one detented position to another. Overall mounting area is less than .350 sq. in.; housing is only .35″ high x .295″ wide x 1.19″ long. Snap-open dust cover has engraved position numbers. Materials are not affected by immersion in cleaning solutions such as Freon TE, alcohol, or soap and water.

*When using more than one rotor, a stop is needed between each rotor to prevent contacts from shorting each other.

SPECIFICATIONS

Voltage: 60 volts maximum, AC/DC. **Current:** Switching, 0.5 amp maximum; carrying, 1 amp maximum. **Operating Temperature:** −40° to +85° C. **Contact Resistance:** Less than 50 milliohms. **Dielectric:** 500 volts rms. **Capacitance:** 0.3 pF between contacts. **Contacts:** Non-shorting gold plated. **Terminals:** Gold plated.

SLIDE AND PUSHBUTTON PC BOARD SWITCHES

For printed circuit board manual switching applications where high reliability, low profile and high packaging density are required. Siemens has developed three new switches—two slide and one momentary pushbutton. These switches are built to conform to the material specifications of MIL Std. 202C with regard to shock, vibration, humidity and temperature. Gold plated terminals on 0.2″ grid spacing. Gold plated contacts have low contact resistance. Size, .350″ above board x .579″ l. x .390″ w. (actuators not included). DPDT contact configuration. Plastic parts of switch are made of Lexan*.

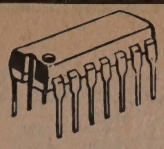
Siliconix incorporated Analog Switching Circuits

Flatpac



DIP

TO-5

Siliconix integrated circuit part numbers include letter prefix which denotes function and letter suffixes denote temperature range and package style. Function Letter Prefix: **D**, driver for FET switch; **DG, DGM**, drivers with FET switches; **G**, multiple FET switch; **SI**, second source item. First Letter Suffix: **A**, −55° C to +125° C military service; **B**, −20° C to +85° C industrial service; **C**, 0° C to +70° C industrial service; **D**, −55° C to +85° C industrial service. Final Letter Suffix: **A**, round TO-5; **F**, TO-84, TO-89 Flatpac; **K**, TO-116 ceramic DIP; **L**, TO-86 Flatpac; **P**, metal-ceramic TO-116 DIP; **R**, 24-32 lead DIP.

*−55° C to +85° C. †0° C to +70° C.

MULTIPLE CHANNEL PMOS SWITCHES

For applications such as sequential switching (commutation), signal processing, modulation and A-to-D converters. The MOS FET is normally OFF and performs a SPST function. **A** Operating Temperature: −55° C to +125° C; BV_{DSS} = −30 V min.; $I_{S(OFF)}$ and I_{GSS} = −0.5 nA max.; $V_{GS(th)}$ = −2 V to −6 V; C_{gs} = 3.0 pF max.; C_{ds} = 0.4 pF max.; C_{sb} = 3.5 pF max. **B** Operating Temperature: −25° C to +85° C; BV_{DSS} = −25 V min.; $I_{S(OFF)}$ and I_{GSS} = −5.0 nA max.; $V_{GS(th)}$ = −2 V to −6 V; C_{ds} = 0.4 pF typ.; C_{sb} = 3.5 pF typ.

TI INTEGRATED CIRCUIT ORDERING INFORMATION

SN	54H72	N	-00
(A)	(B)	(C)	(D)

(A) PREFIX: Must contain two or three letters

RSN	Radiation-Hardened Circuit
SN	Standard Prefix
SNM	Mach IV, Level I
SNA	Mach IV, Level II
SNC	Mach IV, Level III
SNH	Mach IV, Level IV
SNX	Experimental Circuit

(B) UNIQUE CIRCUIT DESCRIPTION: Must contain three to six characters
Examples—F50, G50, 5410, 74H10, 54S112

(C) PACKAGE: Must contain a single letter
F, S, or **T** flat hermetic pkg.; body and leads are gold plated F-15 glass-sealing alloy. Circuit substrate is electrically insulated from the body of **F** pkg.; in electrical contact with the body of **S** and **T.**

H ceramic flat pkg.; hermetically sealed; gold plated leads.

U ceramic flat pkg.; circuit bar is alloy-mounted; hermetically sealed; tin-plated leads.

W ceramic flat pkg. has an electrically nonconductive ceramic base and cap; hermetically sealed; tin-plated leads.

J ceramic dual-in-line pkg. Circuit bar is alloy-mounted to the base and hermetic glass sealed.

N, ND or **P** plastic dual-in-line pkg. encapsulated within an electrically nonconductive, plastic compound. Compound will withstand soldering temperature with no deformation and circuit performance characteristics, remain stable when operated in high-humidity conditions.

L plug-in pkg. hermetically sealed with a welded metal base and cap with individual leads secured by an insulating glass sealant; gold plated leads.

(D) INSTRUCTIONS (DASH NO.): Must contain two numbers (from Dash No. column of following table).

*These circuits are shipped in one of the carriers shown below. Unless a specific method of shipment is specified, circuits will be shipped in the most practical carrier. FLAT—Mech-Pakette, Barnes Carrier, Milton Ross Carrier; DUAL-IN-LINE—Slide magazines, A-channel plastic tubing; Barnes Carrier, sectioned cardboard box, individual plastic box; PLUG-IN—Barnes Carrier, sectioned cardboard box, individual plastic box. Please contact us for the method which will best suit your particular needs. †H pkg. only. ‡N and ND pkg only.

FOR INDUSTRIAL ELECTRONIC EQUIPMENT AND PARTS,
WE CAN SUPPLY ALL YOUR REQUIREMENTS,
OFFERING COMPLETE LINE WITH UP-TO-DATE STOCK, FAST DELIVERY AND INDUSTRIAL QUANTITY CONVENIENCE. AS NEW PRODUCTS ARE DEVELOPED, WE WILL OBTAIN THEM FOR YOUR IMMEDIATE AVAILABILITY.
WRITE FOR FULL INFORMATION ON NEW OR UNLISTED ITEMS.

SN54LS22J	SN54LS20J w/OC outputs		
SN54LS26J	Quad 2-input NAND gate, open collectors, 15 volt		
SN54LS27J	Triple 3-input positive-NOR gate		
SN54LS28J	Quad 2-input positive-NOR buffer		
SN54LS30J	8-input positive-NAND gate		
SN54LS32J	Quad 2-input positive-OR gate		
SN54LS33J	SN54LS33J w/OC outputs		
SN54LS37J	Quad 2-input positive-NAND buffer		
SN54LS38J	SN54LS37J w/OC outputs		
SN54LS40J	Dual 4-input positive-NAND buffer		
SN54LS42J	BCD—decimal decoder		
SN54LS51J	Dual 2-wide AND-OR-INVERT gate		
SN54LS54J	4-wide 2-3-3-2-input AND-OR-INVERT gate		
SN54LS55J	2-wide 4-input AND-OR-INVERT gate		
SN54LS73J	Dual J-K negative-edge-triggered flip-flop with clear		
SN54LS74J	Dual D-type positive-edge-triggered flip-flop		
SN54LS75J	4-bit bistable latch		
SN54LS76J	Dual J-K negative-edge-triggered flip-flop w/preset and clear		
SN54LS78J	Dual J-K negative-edge-triggered flip-flop w/preset, common clear, common clock		Prices on Request
SN54LS83J SN54LS83AJ	4-bit binary full adder		
SN54LS85AJ	4-bit magnitude comparator		
SN54LS86J	Quad 2-input exclusive-OR gate		
SN54LS90J	Asynchronous decade counter		
SN54LS91J	8-bit serial-in/serial-out shift register		
SN54LS92J	Asynchronous divide by twelve counter		
SN54LS93J	Asynchronous binary counter		
SN54LS95AJ	4-bit right-shift left-shift register		
SN54LS96J	5-bit shift register		
SN54LS107J	Dual J-K negative-edge-triggered flip-flop with clear		
SN54LS109J	Dual J-K positive-edge-triggered flip-flop with preset and clear		
SN54LS112J	Dual J-K negative-edge-triggered flip-flop with preset and clear		
SN54LS113J	Dual J-K negative-edge-triggered flip-flop with preset		
SN54LS114J	Dual J-K negative-edge-triggered flip-flop with preset, common clear, common clock		
SN54LS122J	Retriggerable monostable multivibrator with clear		
SN54LS123J	Dual retriggerable monostable multivibrator with clear		
SN54LS125J SN54LS126J	Quad bus buffer with 3-state outputs		
SN54LS132J	Quad 2-input NAND Schmitt trigger		
SN54LS136J	SN54LS86J w/OC outputs

INDUSTRIAL TEMPERATURE RANGE DEVICES CONT'D

SERIES 54LS LOW-POWER SCHOTTKY-CLAMPED—TTL (CONT'D)

TI Type	Circuits Function	Net Each, Lots of 1-24	25-99
SN54LS138J	3-to-8-line decoder/demultiplexer		
SN54LS139J	Dual 2-line-to-4-line decoder/demultiplexer		
SN54LS145J	BCD—decimal decoder/driver		
SN54LS151J	8-line-to-1-line data selector/multiplexer		
SN54LS153J	Dual 4-line-to-1-line data selectro/multiplexer		
SN54LS155J SN54LS156J	Dual 2-line-to-4-line decoder/demultiplexer		
SN54LS157J	Quad 2-line-to-4-line data selector/multiplexer		
SN54LS158J	Inverting quad 2-line-to-1-line data selector/multiplexer		
SN54LS164J	8-bit serial-in/parallel-out shift register		
SN54LS170J	4 x 4 register file		
SN54LS174J SN54LS175J SN54LS181J	Hex D-type register Quad D-type register ALU/function generator		
SN54LS190J	Synchronous 4-bit up/down BCD counter		
SN54LS191J	Synchronous 4-bit up/down binary counter		
SN54LS192J	Synchronous 4-bit up/down BCD counter with dual clock and clear		
SN54LS193J	Synchronous 4-bit up/down binary counter with dual clock and clear		
SN54LS194J	4-bit bidirectional universal shift register		
SN54LS195J	4-bit parallel-access shift register		
SN54LS196J	Decade 30 MHz presettable		
SN54LS197J	Binary counter/latch		
SN54LS221J	Dual retriggerable monostable multivibrator with Schmitt trigger inputs	Prices on Request	
SN54LS251J	SN54LS151J w/3-state outputs		
SN54LS253J	SN54LS153J w/3-state outputs		
SN54LS257J	Quad 2-line-to-1-line data selector/multiplexer, 3-state		
SN54LS258J	Inverting 2-line-to-1-line data selector/multiplexer, 3-state		
SN54LS261J	2's complement multiplier		
SN54LS266J	Quad 2-input exclusive-NOR gate		
SN54LS279J	Quad S-R latch		
SN54LS283J	4-bit binary full adder		
SN54LS290J	Asynchronous decade counter		
SN54LS293J	Asynchronous binary counter		
SN54LS295J	SN54LS95AJ w/3-state outputs		
SN54LS298J	Quad 2-input multiplexer		
SN54LS352J	Inverting dual 4-line-to-1-line data selector/multiplexer, 3-state		
SN54LS353J	Inverting dual 4-line-to-1-line data selector, 3-state		
SN54LS365J	Hex bus driver w/3-state output		
SN54LS366J	Inverting hex bus driver w/3-state output		
SN54LS367J	Hex bus driver w/3-state output		
SN54LS368J	Inverting hex bus driver w/3-state output		
SN54LS375J	4-bit bistable latch		
SN54LS386J	Quad exclusive OR		
SN54LS395J	4-bit cascadeable shift register		
SN54LS670J	4 x 4 register file w/3-state output		

SERIES 74 LINEAR OPERATIONAL AMPLIFIERS

TI Type	Circuits Function	Net Each, Lots of 1-24	25-99

TP4024AN	7-stage binary counter		
TP4025AN	Triple 3-input NOR gate		
TP4027AN	Dual J-K master-slave F-F		
TP4028AN	BCD-to-decimal decoder		
TP4029AN	Presettable up/down binary or decade counter		
TP4030AN	Quad exclusive OR gate		
TP4040AN	12-stage binary/ripple counter		
TP4042AN	Quad clocked D-type latch		
TP4043AN	Quad 3-state NOR R/S latch		
TP4044AN	Quad 3-state NAND R/S latch		
TP4049AN	Hex buffer/converter (inv.)		
TP4050AN	Hex buffer/converter (non-inv.)		
TP4051AN	8-channel multiplexer		
TP4052AN	4-channel differential analog multiplexer		
TP4053AN	Triple 2-channel analog multiplexer		
TP4301AN	Quad 2-input NOR gate		
TP4302AN	Quad 4-2-2-1 input AND-OR-INVERT gate		
TP4303AN	Quad 2-4-4-1 input AND-OR-INVERT gate		
TP4304AN	Hex Schmitt trigger		
TP4311AN	Quad 2-input NAND gate		
TP4315AN	Hex inverter		
TP4320AN	16-channel digital multiplexer		
TP4321AN	Dual 8-channel digital multiplexer		
TP4360AN	Presettable synchronous decade counter		
TP4361AN	Presettable synchronous binary counter		
TP4362AN	Presettable fully synchronous decade counter		
TP4363AN	Presettable fully synchronous binary counter		
TP4370AN	Quad D-type flip-flop		
TP4507AN	Quad exclusive OR gate		
TP4512AN	8-channel data selector		
TP4519AN	Quad AND-OR-SELECT gate		
TP4531AN	12-bit parity tree		
TP4581AN	4-bit arithmetic logic unit		
TP4582AN	Look-ahead carry block		

TI FIELD PROGRAMMABLE READ-ONLY MEMORIES (PROM)

These fully decoded metal fuse field-programmable read-only memories are highly versatile design elements functioning as a permanent "electronic blackboard". They may be custom programmed by either supplier or user to perform a wide variety of functions ranging from look-up/conversion tables to the replacement of numerous discrete logic elements in complex sequential circuits. Programming is irreversible and, once altered, a given bit is permanently programmed; bits never having been altered may later be programmed. Operation of these devices with specified conditions will not alter the memory content.

SN54000 and **SN54S000** types are military temperature range devices, −55° C to +125° C. **SN74000** and **SN74S000** types are industrial temperature range devices, 0° C to +70° C.

*Prices do not include programming. Contact your nearest sales office for quotations on custom programmed units.

MOS
INTEGRATED CIRCUITS

Many types of equipment previously not suitable for electronic control can now take full advantage of the latest electronics technology. Equipment costs can be kept low and equipment size can be reduced easily. MOS (Metal Oxide Semiconductor) circuits are ideal for digital applications including timers and counters, data transmission and switching equipment, recorders, calculators, controls and computer equipment. MOS is also suitable for analog applications such as telemetry and test equipment. The basic MOS device combines the best attributes of the pentode vacuum tube with all the advantages of the transistor. Have high-input impedance; small, simple to fabricate and consume little power.

Inherent advantages of MOS include: Increased circuit complexity per package; lower cost per circuit function; fewer subsystems to test; fewer parts to assemble and inspect; lower power drain per function and a choice of standard or custom products. The most significant feature is the large number of semiconductor circuit elements that can be put on a small chip—up to 5,000 devices on a silicon chip only 150 x 150 mils square. Each transistor in the MOS array requires as little as 1 square mil of chip area—a great reduction over the bipolar transistors requiring 49 to 50 square mils.

RANDOM ACCESS MEMORIES

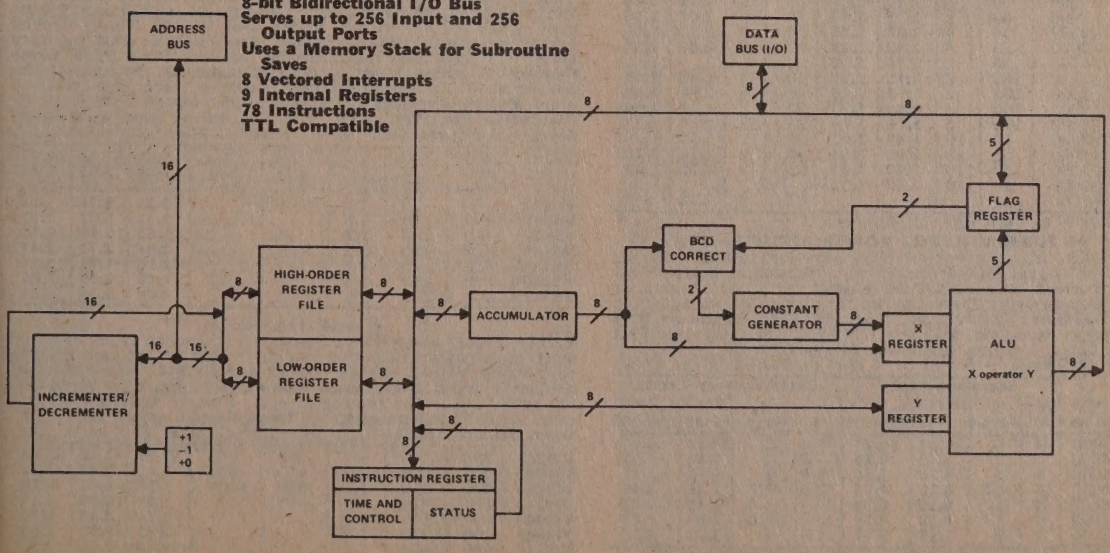
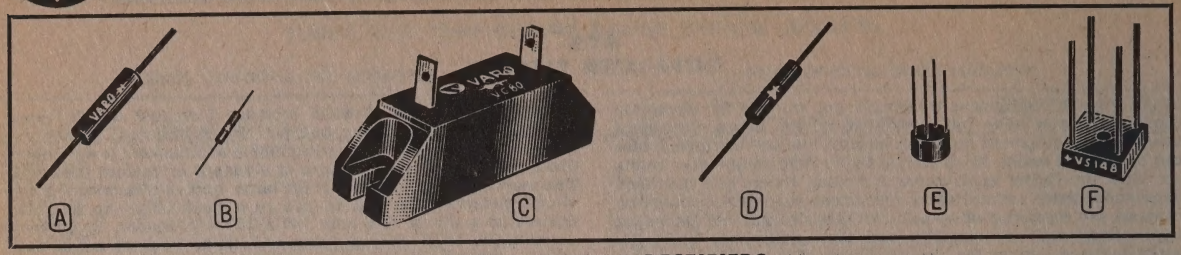
2 μsec Instruction Cycle Time
Addresses up to 65,536 Words of Memory
8-bit Bidirectional I/O Bus
Serves up to 256 Input and 256 Output Ports
Uses a Memory Stack for Subroutine Saves
8 Vectored Interrupts
9 Internal Registers
78 Instructions
TTL Compatible



Varo Silicon Rectifiers



Ⓐ Ⓑ Ⓒ Ⓓ Ⓔ Ⓕ

DIFFUSED SILICON RECTIFIERS

SERIES VF HIGH VOLTAGE RECTIFIERS (FIG. A)

Compact, low cost rectifiers for high voltage, low current use. Epoxy encapsulated ¼″ round package with tinned copper leads. Fast Recovery types have 250 nsec max. reverse recovery time with I_F=2 mA and I_R=4 mA. **Half Cycle Surge:** 3 amps maximum at 60 Hz. **Operating Temperature:** −55° C to +125° C.

I

SILICON AVALANCHE INTEGRATED FULL-WAVE BRIDGE RECTIFIERS 10 AMP I_O (FIG. G, H, OR I)

Electrically insulated welded package offers minimum size, minimum thermal resistance and maximum mounting ease. **Average DC Forward Current:** 10 amps at 100° C case temp. **Peak Surge Current:** 100 amps, one cycle at 60 Hz. **Avalanche Power Dissipation:** 600 watts, 100 μsec square wave. **Maximum DC Reverse Current:** .2 mA/leg, T_C=160° C max. **Forward Voltage Drop:** 1.3 volts/leg at 10 amps. **Insulation Strength:** 2000 VDC min. **Operating/Storage Temperature:** −65° C to +160° C. **Size:** .752″ dia. x .405″ h. Terminals, .420″ long with .070″ dia. hole in each. Also available with flag terminals .400″ long x .187″ with .110″ dia. hole in each (add **/F** to Varo No.). **Mounting:** Press-fit, Fig. G; TO-3 flange, Fig. H (add **/T** to Varo No.); single stud, Fig. I (add **/S** to Varo No.).

DIB™ 1 AMP DUAL-IN-LINE BRIDGE (FIG. J)

Miniature DIP package suitable for automatic handling, testing and inserting. Pins on standard 0.10″ grid spacing. Glass-passivated diodes. **Average DC Forward Current:** 1 Amp at T_A = 40° C. **Peak Surge Current:** 25 Amps, ½ cycle at 60 Hz. **Maximum DC Reverse Current** (per diode): 5 μA at T_A = 40° C; 0.5 mA at T_A = 150° C. **Forward Voltage Drop** (per diode): 1.2 Volts. **Operating/Storage Temperature:** −50° to +150° C. **Size:** .370″ l. x .240″ w. x .140″ d. Moisture-resistant epoxy case.

15 AMP AND 30 AMP EBR™ EPOXY BRIDGE RECTIFIERS (FIG. N)

VL Series, 15 A; VK Series, 30 A; both have controlled avalanche types with 600 W (VL) and 1500 W (VK) power dissipation in $V_{(BR)}$ region for 100 μsec. **Peak Surge Currents:** (VL) 30 A; (VK) 75 A for 1 sec. at 60 Hz, T_C = 80° C. **Reverse Current:** (VL) 5 μA at rated V_{RM}, T_J = 40° C; 0.5 mA at T_J = 175° C. (VK) 10 μA at rated V_{RM}, T_J = 40° C; 1 mA at T_J = 175° C. **Insulation Strength,** circuit-to-case: 1500 VDC. **Operating/Storage Range:** −50° to +175° C. **Size:** .76″ square. Fast recovery types available.

SELF-SCAN® BAR GRAPH DISPLAYS

Self-scan bar graph displays provide analog signal representations with digital accuracy. Up to 400 individual elements are controlled by only six active drivers using eight connections to the display. Applications include: automobile and aircraft instrumentation, process controllers, depth indicators, panel meters and medical instrumentation. Advantages include: low power requirements, simple electronics interface, long life, high reliability, 100- and 200-element linear models available, 120-element circular models available, and special shapes easily made. Designer's kits are available to permit rapid and simple evaluation of the bar graphs. Kits K1, K2 and K3 come complete with printed circuit board, all necessary components, and the display panel. Kit K4 is a power supply kit. Kits K1A and K2A are kits for linear bar graphs and do not include the panel.

PANAPLEX® DISPLAYS

Panaplex panel displays are common-envelope, multi-digit, segmented, thin-panel, numeric display devices. Panels are available in several character sizes to satisfy a variety of viewing distance applications. The display is designed to be operated in a multiplexed mode where the cathode drive and decoder circuitry is time-shared among all of the digit positions. Characters are displayed by successively applying positive signals to the anodes corresponding to each of the character positions while negative signals are applied to the appropriate cathode buses. These displays are used primarily in high-volume, consumer-oriented applications.

BIP-8806-4*	IC driver with memory for B5992 (+, −)	49.50
BIP-9502	13-line memory driver for B5971 alphanumeric	89.00

*Price includes tube.

SELF-SCAN® ALPHANUMERIC DISPLAYS

Display panels present alphanumeric characters in 5 x 7 dot matrix format using gas discharge technology. The displays are easily controlled by microprocessors. These panels are excellent for man/machine interface solutions and can present data in several ways. Data can be entered from right-to-left or left-to-right, depending on the version chosen. Refresh memory is provided with these panel types. Displays are available with or without refresh memory, which permits data inputs to be removed when data taken signal is received. Where continuously updated data is available, refresh memory is not required. Characters are displayed with two column spaces between characters: and character generators are available for modified ASCII 64- and 128-character subsets, as well as various foreign fonts: including Cryllic, Hebrew and Katakana. The panels are packaged in a bezel assembly for front or back panel mounting.

DUAL IN-LINE IC SOCKETS

For 6, 8, 14, 16, 18, 22, 24, 36 and 40 pin dual in-line integrated circuits with either Wire-Wrap* or solder-tab terminations. One-piece molded diallyl insulators withstand high temperatures and provide excellent mechanical stability (Nos. -3777 and -3778 are one-piece molded glass-filled nylon with anti-moisture bosses). Phosphor bronze contacts accept flat or round pins up to .024″ dia. Standard terminal plating is **-03** gold for all Wire-Wrap; **-04** electrotin for all solder tab sockets. Sockets can be supplied with electro-tin plating or Wire-Wrap pins or with gold plating on solder tab pins; prices on request. May be permanently mounted individually (rivet or screw) or press-mounted in PC boards or panels for production of breadboarding. Metric dimensional sockets for standard 14 and 16 pin DIPs are also available. *Reg. Gardner-Denver Co. TM.

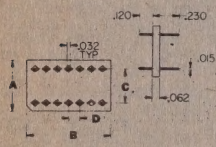
COMPONENT SOCKET ADAPTERS



Component adapters plug into standard 14, 16, 24 or 36 pin dual in-line sockets as well as CAMBION's Integrated Socket strip. Larger width sizes for wider components straddle two sockets or socket strips. Terminal pairs are on .100″ or .200″ grid centers for varying component sizes; slotted for ease of parts mounting. Terminal is phosphor bronze, spring tempered per QQ-B-750 Comp. A. Finish is hard gold plate. Board material, .062″ type GEE glass epoxy per MIL-P-18177.

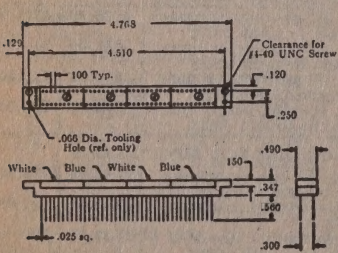
80 PIN DUAL IN-LINE SOCKET STRIP



Molded diallyl body .025″ sq., Wire-Wrap posts and spring contacts, electro-tin plated. Mounts all dual in-line devices without a PC board. Flanges at the ends provide for independent mounting or into CAMBION mounting frame or relay rack drawers. Pins are replaced by removing the screw down covers. Socket strips accept five 14 pin DIPs, four or five 16 pin DIPs. Wider MSI or LSI DIPs can be mounted by bridging between two properly spaced strips.

CAMBION drawer for 19″ relay rack 1¾″ h. or 3½″ h.; holds approx. 600 ICs. Information on request: 706-6000 Series.

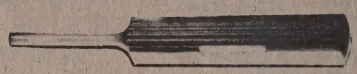
PRECUT AND STRIPPED WIRE KIT

For wire-wrapping. Solid copper 30 AWG white insulated Kynar* wire, silver plated, ends stripped to tolerance. Kit contains 13 pkgs. of varied lengths from 1″ thru 9″. Per pkg.: 1″ thru 4.5″, 100 pcs.; 5″ thru 9″, 50 pcs. Also available 1.0″ thru 25.0″ lengths in black, red and white insulation on request.

*Reg. Pennsalt Chemicals Corp. TM.

Cambion Part No. 718-1010-01-01-19—Net per Kit.... **$53.90**

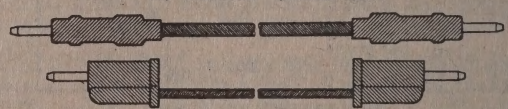
HAND WIRE WRAP TOOL



For wrapping solid copper 30 AWG wire. Low cost alternative to power equipment suitable for use in field repairs and by hobbyists and experimenters. Molded glass filled nylon. Size, 3.225″ x .480″ dia.

Cambion Part No. 435-1816-01-00-16—Net Each **$2.46**

IC PATCH CORD KIT



Contains 100 pieces (48 pcs., Fig. A; 52 pcs., Fig. B) pin patch cords .040″ dia. Red, blue and black in 2″, 4″, 6″ and 8″ lgths. Ideal for breadboarding requirements.

Cambion Part No. 446-3892-01-00-00—Net per Kit.... **$97.60**

Cambion Part No. 446-3990-01-00-00—Contains 55 pieces stackable patch cords (Fig. B). Red, black and blue in 2″, 4″, 6″ and 8″ lengths. Net per Kit **$58.20**

Cambion Part No. 446-3991-01-00-00—Contains 73 pieces stackable patch cords (Fig. B). Red, black and blue in 2″, 4″, 6″ and 8″ lengths. Net per Kit **$77.70**

SOCKET TYPE HIGH DENSITY BREADBOARDS

16 pin dual-in-line sockets. Socket terminals connected via printed wiring to .040″ cage jacks. Use with Cambion IC patch boards. Power and ground planes included.

Cambion Part No. 705-1024-01-00-00—16 sockets. Board size, 6.5″ x 6.5″. Net Each, 1-4 ..... **$69.00**; 5-9 ..... **$65.60**

Cambion Part No. 705-1022-01-00-00—32 sockets. Board size, 6.5″ x 11.5″. Net Each, 1-4 ..... **$121.70**; 5-9 ..... **$115.60**

EXPERIMENTAL BREADBOARDS

Socket type breadboards for small circuit building applications. Socket terminal connected via printed wiring to .040″ cage jacks. Use with Cambion IC patch cords. Binding posts for power supply connections included. Size, 4.5″ x 6.5″.

HIGH DENSITY WIRE-WRAP* CAMBI-CARDS®

Printed circuit boards designed to accept dual in-line IC sockets, in-line integrated circuits and discrete components in a tightly arranged package for Wire-Wrap interconnections. Each socket position on **715 Series** (on every other row on **714 Series**) has two auxiliary pins to permit connecting each IC to power and ground planes. Cards with sockets affixed; with sockets and spaces for discretes; for all discretes; copper-clad and blank cards; card extenders and general purpose cards without sockets but with grid patterns permitting mixing any combination of in-line ICs in any mounting pattern. All cards have edge connectors which plug into standard CAMBION card files, available with or without mating power planes. Board material—.062" thick, double clad copper, epoxy glass cloth type FL-GE per MIL-P-13949. Pin plating, gold over phosphor bronze material.

*Registered Gardner-Denver Co. TM

LOGIC FUNCTION CARDS

CAMBION offers a complete line of logic function cards, all of which may be used with above standard, 4½" h., "714" and "715" series Wire-Wrap cards. Write for complete information on logic function cards.

UNIVERSAL PANELS

CAMBION universal panels support Wire-Wrap jacks arranged in columns .300" apart which accept dual-in-line packages with .300" and .600" pin alignment. Separate power planes are provided on each side of the panels. Several Wire-Wrap pins are provided adjacent to each column with direct connection to the power planes. Panels are available with one through six sections. Each section has large power and ground terminals for connection to power supplies and for the mounting of bulk decoupling capacitors.

IC INSERTION-EXTRACTION TOOL

Handy tool properly positions integrated circuits for insertion or extraction by securely gripping the IC between the leads and under the body. Practically any IC with 14 or 16 leads aligned on 0.300" centers can easily be inserted or extracted regardless of tight packaging and without damage to the fragile IC leads. Basic material of insertion-extraction tool is plastic.

SERIES 200 FEATHERWEIGHT DISSIPATORS

Unique fin design permits horizontal or vertical orientation with excellent natural convection performance in either position. In forced convection applications, the axis of the semiconductor may be oriented either perpendicular or parallel to the direction of air flow. Max. contact thermal impedance for the semiconductor case to the dissipator I.D. is 5° C/W for 201, 202, 203 and 222, 3° C/W for 204, 205, 207, 209 and 224, 2° C/W for 211, 213 and 215. Delta-T No. 120 thermal joint compound will reduce impedance by a factor of 8. Beryllium copper per MIL-C-81021 with black ebonol C finish per MIL-F-495; also available with no finish, prices on request.

Wakefield Model 160 Installation Tool—For 201, 202, 203, 204, 205, 207, 208, 209, 222 and 224. Net Each.....**$1.50**

Wakefield Model 161 Installation Tool—For 211, 213 and 215. Net Each.....**1.50**

*Also available in aluminum alloy 6061T6 with or without black anodize finish; prices on request.

SERIES 300 SEMICONDUCTOR COOLERS (FIG. D)

Accommodate stud-mounted, press-fitted rectifiers and transistors up to 1⅛" hex case. Semiconductor mounting surface and one mounting foot are free of anodize to assure excellent thermal and electrical performance. Ideal for stacking arrangement; electrical isolation provided by Type 103 insulators or Type 104 expansion nuts (not supplied). Temperature Rise at 23 Watts: Type 301, 100° C; 302, 72° C; 303, 52° C. Full curves on request. Aluminum alloy 6063-T5 per QQ-A-200; black anodize finish per MIL-A-8625 Type II. Size 2" sq. x ¾" h., 301; 1½" h., 302 and 3" h., 303. Part No. letter suffix indicates mounting hole type; see *Ordering Information on following page.

WAKEFIELD ENGINEERING INC. Semiconductor Coolers

SERIES 490 KING SIZE HEAT SINKS (FIG. H)

Natural convection sinks for multi-cell high power rectifiers. Model 490-12.0, under natural convection conditions, will permit a case temperature rise of a 3½" sq. rectifier of only 110° C at 600 W dissipation. Full curves for all types available on request. Aluminum alloy 6063T5 per QQ-A-200; black anodize finish per MIL-A-8625 Type II except for the semiconductor mounting surface where the electrical stud and high current buswork connections are made. Four mounting lugs on each end with std. ⅜" dia. bolts, nuts and washers; or, use Type 109 mounting brackets (glass fiber reinforced plastic angles) for wall mounting or insulating (two required per sink), not supplied. Size, 6.75" w. x 9.25" d. x 3.5" h., 490-3.5; 6" h., 490-6.0; 12" h., 490-12.0. All have 3½" semiconductor mounting area. For square slots add **$0.10**/piece. Part No. letter suffix indicates mounting hole type; see *Ordering Information below.

HEAT SINKS

Heat sinks for DIP and PC boards. **Type 650:** Bonded with Delta Bond epoxy for DIP. Size, .250" w. x .744" l. x .240" h. **Type 651:** Heat sink for DIP enables user to select extruded fins perpendicular to Type 650 fins to take advantage of air flow direction. Size, .415" w. x .75" l. x 24" h. **Type 295:** Solderable heat sink for PC boards. Tinned aluminum legs (.04" w. x .03" thick) plug-in .050" PC board holes for automatic soldering. **Type 310:** Extruded aluminum heat sink to provide installation in NEMA cabinets. Available in 3.0", 5.5" and 11.5" lengths with 11.5" size for mounting 1, 2, or 3 SCR's.

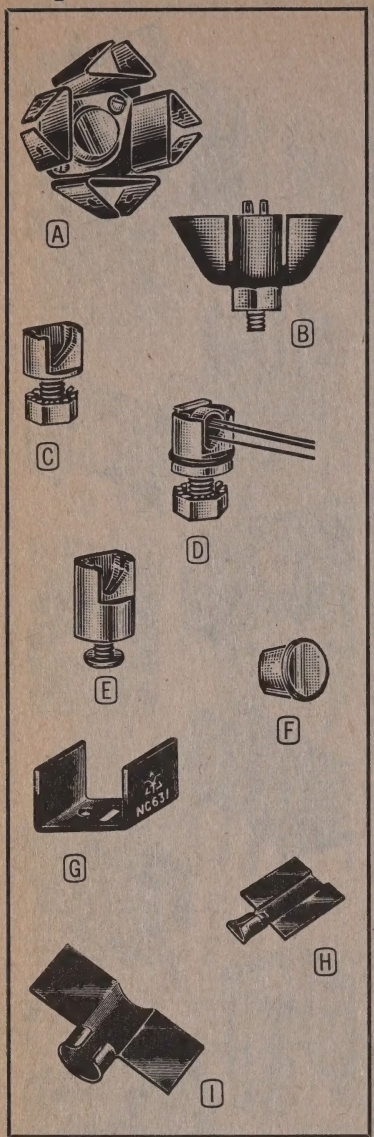
Semiconductor Coolers



INSULATING WAFERS FOR TO-3 AND TO-66

Aluminum alloy per 5052-H38 with Delta Coate 151H (suffix **DC**) or hard coat (suffix **HC**). Thermal conductive coating on transistor side only, including edges, hole I.D.

Wakefield Number	Net per Pkg. of 10		
	10-90	100-490	500-990
170-, 171-, 172-DC	$0.86	$0.74	$0.70
170-, 171-, 172-HC	1.06	.92	.85

TYPE 690 CIRCUIT BOARD HEAT SINKS (FIG. A)

Designed to give the most power dissipation per unit cost. Power dissipation of 10–20 watts is obtainable. Made of highest thermally conductive pure aluminum, 1100 alloy. Available in both plain (suffix **P**) and black anodize (suffix **B**) finish. Available mounting patterns are for TO-3 and TO-66 JEDEC packages.

Wakefield Number	Fits Case	Size, In. W. x H.	Net per Pkg. of 100		
			1-199	200-900	1000-2400
690-3-P	TO-3	1.81 x 1.25	$34.00	$30.00	$28.00
690-66-P	TO-66	1.81 x 1.25	34.00	30.00	28.00
690-3-B	TO-3	1.81 x 1.25	46.00	38.00	34.00
690-66-B	TO-66	1.81 x 1.25	46.00	38.00	34.00

TYPE 695 CIRCUIT BOARD HEAT SINKS (FIG. B)

Made of thermally conductive pure aluminum, 1100 alloy. Available in black anodize (suffix **B**) or plain (suffix **P**) finish. Designed to accept semiconductors with threaded studs up to 10-32. Power dissipation up to 5 watts is obtainable for low power stud devices.

Wakefield Number	Fits Case	Size, In. W. x H.	Net per Pkg. of 100		
			1-199	200-900	1000-2400
695-P	DO-4	1.33 x .484	$17.10	$13.70	$12.80
695-B	DO-4	1.33 x .484	25.40	20.30	18.90

SERIES 254 THERMAL RETAINERS FOR TO-5 CASES

Designed as thermal links from TO-5 semiconductor case to cooler or chassis member acting as heat sink. Provides heat sink contact at bottom of case flange for best cooling. Ideal for use with TO-5 Kovar header case. All six types include 254-LS stainless steel locking spring for insertion behind transistor, using Type 120 thermal compound at header. Made of Zamak 3, with chromate conversion finish. Type 254-S1 has built-in electrical isolation, with stud mount of 6061-T6 aluminum with gold irridite finish. Supplied less mounting hardware.

Wakefield Number	Fig.	Mounting	Thermal Resistance	Net per Pkg. of 10		
				10-90	100-240	250-490
254-S	C	Stud	4.0° C/W	$2.96	$2.54	$2.36

254-D	F	Plain†	4.0° C/W	3.21	2.77	2.56

*With electrical isolation. †4-40 tapped thru center of base.

SERIES 630 HEAT SINKS FOR TO-3 AND TO-66 (FIG. G)

Maximum cooling heat sinks for TO-3 and TO-66. Available in 3 types utilizing same base size but three leg lengths. Type 1100-H14 aluminum 0.062″ thick. Black anodize (suffix **B**) or plain (suffix **P**) finish. Full curves on request.

Wakefield Number		Temp. Rise °C/5 W	Height, In.	Net per Pkg. of 100

TYPE 292 HEAT SINKS (FIG. H)

Accommodates most TO-92 plastic transistors for heat dissipation. Aluminum (type 6061T6) with black anodize finish (suffix **AB**) or no finish (suffix **AP**); beryllium copper with black ebonol finish (suffix **CB**) or no finish (suffix **CP**).

Wakefield Number	Net per Pkg. of 100				Wakefield Number	Net per Pkg. of 100

Delta Coate 151: Thermally conductive dielectric epoxy coating which may be applied using conventional paint spraying equipment. A .006″ coating yields 1000 V working dielectric strength for applications such as electrically isolating semiconductors from their heat sinks. **Delta Bond 152:** Contains no volatile solvents and is therefore 100% solid adhesive. Effective on porous and non-porous surfaces such as metals, glass, ceramics and most plastics. **Delta Cast 153:** Pourable casting resin for encapsulating components and assemblies. Thermal expansion is similar to aluminum and copper and assemblies will operate over a very wide temperature range. **Delta Bond 154:** Medium viscosity aluminum filled resin with the best thermal conductivity of this series. Not recommended for use as an electrical insulator nor conductor; principal application is that of a good thermal-mechanical adhesive for applications such as bonding fins to base plates or semiconductor mounting blocks or brackets to heat sinks. Machines freely. **Hardeners:** Available as listed for use with resins. Working time, cure time and properties of cured resins vary. For additional data request Catalog No. 103.

SERIES 130 PRESS-PAK HEAT SINKS AND CLAMPS (FIG. A)

Standard single heat sinks for use with Type 130 clamps; multiple heat sinks available, data and prices on request. T-slots accept standard hex head machine bolts for mounting and busing. Only one sink of a given pair should be bolted to rigid busing. Aluminum alloy 6063T5 with black anodize (suffix **B**) or gold irridite (suffix **G**) finish. Natural and forced convection data available on request. Size, 5″ w. x 4½″ d., except 133-4.5, 7″ w. x 4½″ d. and 133-7.5, 7″ w. x 7½″ d.

SERIES 130 CLAMP AND SPRING ASSEMBLIES

Fit all Press-Pak SCR sizes up to 2.25″ dia. Affords clamping force centering accuracy of less than 10% of junction diameter with Series 130 heat sinks, above.

STUD ASSEMBLIES

Crossbar is CRS, 3.8″ lg. x 13⁄16″ w. x ½″ thick. Stainless steel studs spaced 2¾″. Assembly is coated with epoxy insulating compound for 5 kVAC breakdown min.

*Min.–max., stud bar to top of clamp; includes spring assembly height.

SPRING ASSEMBLIES

Each leaf provides up to 400 lbs. clamping force; integral force indicator reads lbs./leaf in 100-lb. graduations (available without indicator). Stainless steel alloy has low creepage rate (less than 15% in 5 years at 400 lbs./leaf at 150° C operating); better than the best automotive valve-spring steels. Swivel pad is 2024 aluminum.

SERIES 260 CUP CLIPS FOR TO-5 AND TO-18 CASE

Brass base per QQB626a Comp. 22, black ebonol C finish per MIL-F-495. Cups are beryllium copper alloy #10 per MIL-C-81021, black ebonol C finish per MIL-F-495. Ceramic spacers are beryllium oxide, 99% purity, 95% density. Flared lip standard for easy component insertion. **Plain Mounting Base Types (Fig. B):** Can solder into place or used with pan head screws (#4 for TO-5; #2 for TO-18); 260-P5B and 260-P18B are for mounting with thermally conductive adhesive such as Delta Bond 152. **Tapped Base Types (Similar Fig. B):** Use 4-40 screw for TO-5; 2-56 for TO-18; 260-4TH5B and 260-2TL18 have thick base for wider screw length tolerances. **Stud Mounting Types (Figs. C and D):** Have 6-32 or 10-32 studs for TO-5 case; 4-40 and 6-32 for TO-18. Operate continuously between −100° F to +300° F. **Suffix B** (e.g., 260-P5**B**)**:** Beryllium oxide insulated for operations requiring low stray capacity to heat. Hypot rating 1000 VAC, 60 Hz for TO-5; 750 VAC, 60 Hz for TO-18. Color coded white. **Suffix E:** Epoxy insulated; color coded yellow. Hypot rating, 500 VAC, 60 Hz for TO-5; 250 VAC, 60 Hz for TO-18. **No Suffix:** Indicates non-insulated. **Size:** 0.29″ I.D. cup, hex base .37″ across flats for TO-5; .170″ I.D. with .25″ hex for TO-18.

*With #30 copper-constantan thermocouple soldered to center of header of RCA 2N3053.
†With #30 copper-constantan thermocouple soldered to emitter-tab of Sprague 2N2907A.

SERIES 100 "BLIND" NYLON INSULATING FASTENERS

Type 102 (Fig. F): Fastener-washer pair quickly mounts and electrically isolates most of the Series 400 and 600 heat sinks. Size, 7⁄16″ O.D. x 1⁄16″ thick; for panel hole .187″ dia. and .063″ max. panel thickness. **Type 104 (Fig. G):** Screw mount with #8 sheet metal or machine screw; screw length, ⅝″ plug panel thickness. **Type 106 (Fig. H):** Larger screw mount type; screw length, ¾″ plus panel thickness.

SERIES 260 THERMAL RETAINERS (FIG. E)

Two cup clips are bonded with Delta Bond 152 to an aluminum base precoated with Delta Coate 151H. This provides a thermal equalizing link with excellent thermal dissipation characteristics. Clips are electrically insulated from the strip and each other. Cup clip beryllium copper with black ebonol C finish; base aluminum 1100-H14 clear irridite and Delta Coate 151 finish. **260-5D:** Thermal resistance from TO-5 cup clip to mounting base is 13° C/watt and from cup to cup is 30° C/watt. **260-18D:** Thermal resistance from TO-18 cup clip to mounting base is 24° C/watt and cup to cup is 60° C/watt.

CARD EJECTORS AND ECON-O-GUIDES™

P.C. CARD EJECTORS

P.C. Card Ejectors provide safe and easy lever action for extraction and insertion of 1/16" and 3/32" PCBs. Available from stock in 8 standard styles and 2 locking versions for positive retention. CARD-O-PULLs are molded from natural white Nylon per MIL-M-20693 and can be supplied in 12 additional colors with hot stamped markings for permanent identification on a custom basis.

- Protect components, circuitry, connectors, PCB's and system from excessive stress damage.
- Designed for both 1/16" and 3/32" PCB's. Can be used in most systems.
- Aids insertion and extraction of PCB's—eliminates extraction tools.
- Available in locking versions.
- Available from stock.

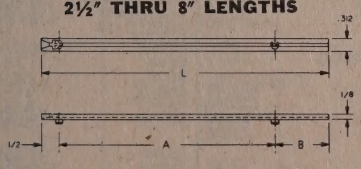
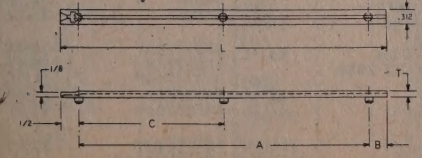
Typical Installation

2½" THRU 8" LENGTHS



8½" THRU 14" LENGTHS



ECON-O-GUIDES™

With these convenient snap-in card guides, your board stacking or rack mounting options are greatly increased. Guides may be located to desired spacing; they add extra insulation between boards and rack or cabinet enclosures. For computers/ systems, instrumentation and industrial applications. Constructed of rigid, reinforced nylon, black. Standard lengths, 2½" thru 14" in ½" increments. Mounting: Snap-in metal plates, .047/.090 inches thick. Hole size, .172" dia.

GENERAL ELECTRIC / RCA / RAYTHEON

SERVICE-DESIGNED

RECEIVING TUBES

TUBES MAY BE ASSORTED TO OBTAIN QUANTITY DISCOUNTS

The receiving tubes listed below and on the following pages represent practically all types generally in demand. Many pre-World War II types are not included in order that we catalog a complete listing of new types now available. We invite your inquiries and orders for all types whether listed or not. As new types are released we will have them available. While we try to maintain complete stocks at all times, the listing of a particular type does not necessarily mean it is immediately available.

PHONE—WRITE—WIRE FOR PRICES & QUOTATIONS ON TUBES NOT LISTED.

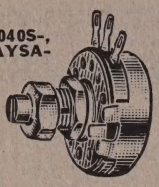
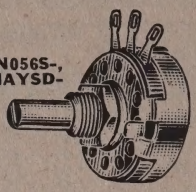
TYPE J 2¼-WATT HOT-MOLDED COMPOSITION POTENTIOMETERS

These hot-molded composition potentiometers are rated 2¼ watts at 70° C with a rotational life of over 100,000 cycles with less than 10% resistance change. Smooth adjustment with infinite resolution. Designed for continuous operation in ambient temperatures from −55° C to +120° C. Excellent for high frequency applications. Rugged, dust and splash resistant. Lockwasher and mounting nut supplied. Marked with Type and MIL numbers (Type numbers on on JA1N200P-). Case Size: ⅝" x 1 9/32" diameter. Linear Taper only.

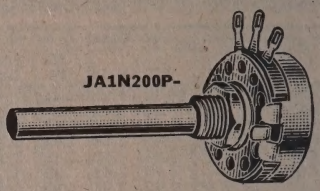
JA1L040S-, RV4LAYSA-



JA1N056S-, RV4NAYSD-



JA1N200P-



Type JA1L040S-, MIL-R-94 RV4LAYSA-: Style RV4. Slotted shaft ⅝" long x ¼" dia.; ½" lg. true-collet-action locking bushing with locking nut. Linear taper. Mounts in ⅜" hole on panels up to ⅛" thick.

Type JA1N056S-, MIL-R-94 RV4NAYSD-: Style RV4. Slotted shaft ⅞" long x ¼" dia.; ⅜" lg. plain bushing. Linear taper. Mounts in ⅜" hole on panels up to ¼" thick.

Type JA1N200P-: Plain shaft 2" long x ¼" dia.; ⅜" lg. plain bushing. Linear, CW log and CCW log tapers. For log tapers, derate power rating by 50%. Mounts in ⅜" hole on panels up to ¼" thick.

½-WATT COMPOSITION POTENTIOMETERS

Miniature, hot-molded composition variable resistors rated ½ watt at 70° C with a rotational life of over 50,000 cycles with less than 10% resistance change. Smooth adjustment with virtually infinite resolution. Designed for continuous operation in ambient temperatures from −55° C to +120° C. Excellent for high frequency applications. Rugged, immersion-sealed with watertight bushings. Linear taper. Lockwasher and mounting nut supplied. Case Size: 1 3/32″ x ½″ dia.

TYPE GA2G056S-, MIL-R-94 RV6NAYSD-

Types GA2G056S-, MIL-R-94 RV6-NAYSD-: Style RV6. Slotted shaft ⅞″ long x ⅛″ diameter, ¼″ long plain bushing. Mounts in ¼″ hole on panels up to ⅛″ thick. Marked with Type and MIL numbers and resistance values.

TYPES WR AND WRS HOT-MOLDED COMPOSITION VARIABLE RESISTORS—POTENTIOMETERS

Type WR for applications where space behind a panel is limited. Overall depth of unit behind panel is less than .500 inch (12,70 mm). Dia. of unit, .500". **Type WRS** offers a quality 0.5 watt device coupled with a 1.0 ampere line switch actuated at beginning of clockwise rotation. Depth behind panel including switch terminals, 1.046". Switch reduces effective electrical rotation to 275° ±5°. Units are rated 0.5 watt max. at +70° C for "U" linear taper provided voltage rating is not exceeded. Rotational life, 10% maximum change in total resistance after a 50,000 cycle life test without load. Shaft diameter, .125"; shaft length, .875" with plain bushing. Bushings have 32-NEF-2A thread, are .250" in dia. and .250" long measured from mounting surface. **Resistance tolerance, 10%.**

TYPE N HOT-MOLDED COMPOSITION TRIMMERS

Type N: Hot-molded composition rectilinear trimmer for PC board mounting. Continuous adjustment, 25 turns. Rated ⅓ watt at 50° C. Rotational life, less than 5% resistance change after 500 cycles (25,000 revolutions of the actuating screw). Temperature range, −55° C to +100° C. Size: 1¼" lg. x ¼" w. x 2¾₄" h. Immersion-sealed. Three durable pin leads 0.028" dia. x 1⅜₂" lg. Metal actuator slotted for screwdriver adjustment. Marked with Type number and resistance value.

TYPE R 25-TURN TRIMMERS

Type R: Hot-molded composition rectilinear trimmer for .100" PC board mounting. 25 turns for continuous adjustment. Rated ¼ watt at 70° C. Temperature range, −55° C to −125° C. Immersion-sealed. Type RS is MIL Style RJ11AS. Rotational life, less than 5% change after 500 cycles (25,000 revolutions of the adjustment screw). Size: 1¼" lg. x ¼" w. x 2¾₄" h. Type RP has three durable pin leads 0.028" dia. x 1⅜₂" lg. Type RS has three solder lugs ⅜₂" w. x ⅝₂" lg. Metal actuator slotted for screwdriver adjustment. Type and MIL numbers marked on applicable Type RS units with ±10% resistance tolerances. Type number and resistance value marked on balance of Types RS and Type RP units.

A-B cermet trimmers have extremely long load and wear life. Even in severe environmental conditions they maintain their setting to give dependable performance. Leads are permanently fastened, anchored and bonded. All are MIL grade and immersion-sealed.

Type A: Miniature, single-turn cermet trimmer for PC board mounting. Rated ½ watt at 85° C. Operating Temperature: −55° C to +150° C. Resistance Tolerance: ±10% standard, others available. Taper: linear. Insulation Resistance: 1000 megohms minimum. Torque: 0.2 to 2.0 inch ounces. Rotation: 280° ± 5°.

ALLEN-BRADLEY Cermet Trimmers

TYPE E SINGLE-TURN CERMET TRIMMERS

Single-turn cermet trimmers for PC board mounting. Linear taper. Rated ½ Watt at 70° C. Temperature range, −55° C to +125° C. Plastic case is immersion sealed. Terminals are .037″ x .010″ at standoff, slightly tapered and on .100″ grid spacing. Available in both vertical adjustment and horizontal adjustment types, and with in-line or offset terminals. Tolerance, ±10%.

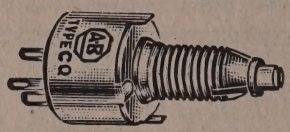
Type CQ2G



Type CQ2L

CERMET POTENTIOMETERS

Type SPSG—Single-turn potentiometers rated 1 watt at 70° C, derated to 0 at 150° C. Total resistance change, less than 2% after shock, vibration or moisture tests; less than 3% after temperature cycling; less than 5% total after 1,000 hours at rated load. Max. continuous working voltage, 300 V. Insulation resistance, 100 megs min. Rotation, 280° ±5° mechanical and electrical; torque, 0.5–6 in.-oz. Linear taper, 10% resistance tolerance only; ¼″ lg. plain bushing with ⅝″ lg. shaft ⅛″ dia. Marked with Type No. and nom. resistance. Supplied with hardware. **Type SPSM**—Same as above, but ⅜″ lg. locking bushing with 7/16″ lg. shaft. Both types mount in ¼″ hole. Both units have double flatted bushings. Case size, 7/16″ x ⅜″ dia.

Type CQ2G—Designed for severe environmental conditions in military and industrial equipment. Rated 0.5 watt at 125° C, derated to 0 at 175° C. Temperature range, −65° C to +175° C with temp. coefficient less than ±250 ppm/°C. Rotation, 295° ±5°. Dielectric withstanding voltage, 750 V rms at sea level. Max. continuous working voltage, 350 V rms. Total resistance change, less than 1% after low temperature test, less than 2% after shock, vibration and moisture tests, less than 3% after 1,000 hours at rated load, less than 5% after 50,000 cycle rotational test; Linear taper, 10% resistance tolerance only; ¼″ lg. plain bushing with ⅞″ lg. slotted shaft ⅛″ dia. Supplied with hardware. **Type CQ2L**—Same as above, but ½″ lg. locking bushing with ⅝″ lg. slotted shaft. Additional hardware: M-4721 mounting nut, **5c**; M-4748 lockwasher, **5c**; M-4761 locknut, **10c.** Both types mount in ¼″ hole. Case size, 1 1/32″ max. x ½″ dia.

FOR INDUSTRIAL ELECTRONIC EQUIPMENT AND PARTS,

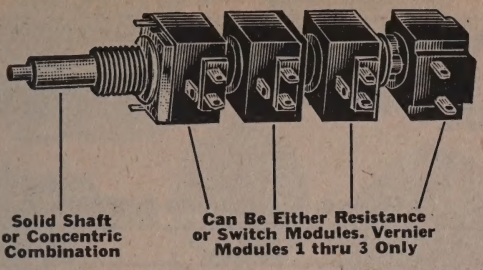
WE CAN SUPPLY ALL YOUR REQUIREMENTS,

OFFERING COMPLETE LINE WITH UP-TO-DATE STOCK, FAST DELIVERY AND INDUSTRIAL QUANTITY CONVENIENCE. AS NEW PRODUCTS ARE DEVELOPED, WE WILL OBTAIN THEM FOR YOUR IMMEDIATE AVAILABILITY.

WRITE FOR FULL INFORMATION ON NEW OR UNLISTED ITEMS.

ALLEN-BRADLEY MOD POT®

MOD POT® SERIES 70 POTENTIOMETERS, SWITCHES, VERNIER DRIVE CONTROLS



Now you can obtain rapid delivery on A-B MOD POT potentiometers, switches and vernier drive controls. We have our own facilities to build almost any type of the small, ⅝" square controls which you might require. The units are available in single, dual, triple or four section controls. Just specify your needs. The controls can be put together in almost any order. We can quickly supply you with special prototype controls, production quantities or just an initial quote from our A-B pricing specialist.

Power Rating	Single Section	Multi-Section
Carbon	1 Watt	½ Watt/Section
Cermet	2 Watts	1 Watt/Section

To Order a Custom MOD POT Control, Submit the Following Information:

- Number and type of sections required (resistance modules listed in **Chart No. 1**, switch modules in **Chart No. 2**, vernier drive sections in **Chart No. 3**).
- Bushing types (selections listed in **Chart No. 4**).
- Shaft combinations (selection of types in **Chart No. 5**).
- Locating lug options (selection of types in **Chart No. 6**).

CHART NO. 1, RESISTANCE MODULES

Nominal Resistance Values, Ohms			
50*	1K	25K	750K
75*	2K	50K	1.0 megs
100	2.5K	75K	2.5 megs
200	5K	100K	5.0 megs
250	7.5K	200K	10.0 megs*
500	10K	250K	
750	20K	500K	

*Carbon composition only.

To Order Resistance Modules, Specify The Following For Each Module:

- Nominal resistance value in ohms, from Chart No. 1.
- Cermet or carbon composition.
- Tolerance: Carbon composition, 10% or 20%; Cermet, 5% or 10%.
- Solder lug or square terminals.
- Type of taper: Linear taper. Other tapers available in values of 250 ohms thru 10.0 megohms, carbon composition only, as follows:

Clockwise and counterclockwise modified logarithmic taper..... ±10% or ±20% tolerance
Clockwise exact logarithmic taper.. ±10% or ±20% tolerance
Modified linear taper..... ±10% or ±20% tolerance
Attenuators, L-pad or bridged T-pad..... ±15% or ±20% tolerance

CHART NO. 2, SWITCHES

Current Rating: 2 amps rms for 125 V, 60 Hz, resistive load.

Switch Type	Contact Arrangement
Rotary	Two sets of contacts per switch*— One set normally open, one set normally closed. Two sets normally open.
Push-Pull or Momentary	Four sets of contacts per switch— Two sets normally open, two sets normally closed.

*Switches are described in the detent position.

To Order Switches, Specify The Following For Each:

- Type of switch.
- Contact arrangement.
- Location of detent required if rotary switch is ordered—either clockwise or counterclockwise end of rotation.

CHART NO. 3, VERNIER DRIVES

Drive	Type of Shaft and Shaft Combination*
3⅓ or 16-Turn Vernier	Fine adjust shaft only. Fine and coarse adjust shaft.

*To Order Vernier Drive Control, Specify Type Of Shaft Or Shaft Combination Required. See Chart No. 5.

CHART NO. 4, MOUNTING BUSHINGS

Bushing Type	Diameter	Length ¼"	Length ⅜"	Length ½"
Plain	¼"	PA	PC	.....
Locking	¼"	.....	LC	LH
Plain	⅜"	PG	PK	.....
Locking	⅜"	.....	BK	BN

To Order Mounting Bushings, Specify Type, Diameter and Length by Choosing Two Letters Listed Under Length Columns, e.g., PA = Plain Mounting Bushing, ¼" dia. x ¼" lg.

CHART NO. 5, SHAFT COMBINATIONS AND LENGTHS

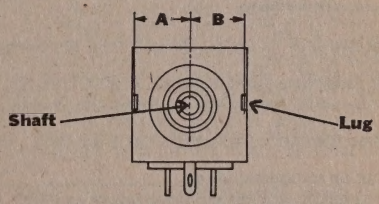
Shaft Operating Combinations	Lengths*
⅛" Dia. Solid	⅜", ½", ⅝", ¾", ⅞"
¼" Dia. Solid	⅜", ½", ⅝", ¾", ⅞", 2"
¼" Dia. Outer Concentric ⅛" Dia. Inner Concentric	½", ⅝", ¾" 1", 1⅛", 1¼"
⅛" Dia. Outer Concentric .078" Dia. Inner Concentric	½", ⅝", ¾" 1", 1⅛", 1¼"

*Lengths are measured from the bushing mounting surface.

To Order Shaft Combination and Length, Specify the Following Information:

- Shaft combination desired.
- For dual shaft combination, specify which sections are to be operated by each shaft.
- Shaft lengths.
- Standard shaft endings include plain round, screwdriver slot, or flatted except for .078" dia. solid and .125" dia. hollow shafts which have plain endings.

CHART NO. 6, LOCATING LUGS



Dimension A or B, or both, specify distance from shaft center to lug center.

Locating Lug Option No. (or Letter)	Dimen. A	Dimen. B
1	.305"	No Lug
2	.305"	.305"
3	.375"	No Lug
4	No Lug	No Lug
5	.375"	.375"
6	.437"	No Lug
7	.437"	.437"
8	.531"	No Lug
9	.531"	.531"
A	No Lug	.305"
B	No Lug	.375"
C	No Lug	.437"
D	No Lug	.531"

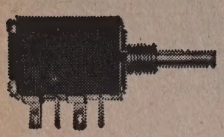
To Order Locating Lugs, Specify Lug Option No. (Or Letter).

All controls include standard A-B mounting hardware and markings. Extra hardware is available on request. Special markings can be provided on each control, if desired. For additional information, request Allen-Bradley Publication 5217 and Mod Pot Order Form 898.

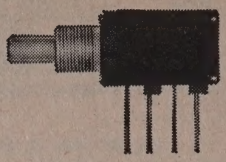
Because of the wide range of standard combinations available, pricing is quoted on an individual specification basis.

ALLEN-BRADLEY MOD POT®

MOD POT® SERIES 72 AND 73 POTENTIOMETERS, SWITCHES, VERNIER DRIVE CONTROLS



SERIES 72



SERIES 73

Now you can obtain rapid delivery on A-B MOD POT potentiometers, switches and vernier drive controls. We have our own facilities to build almost any type of the small ⅝" square controls which you might require. Just specify your needs. We can quickly supply you with special prototype controls, production quantities, or just an initial quote from our A-B pricing specialist. Series 72 is a lower-priced version of the Series 70 with plastic mounting bushings and plastic shafts; it is available with hot-molded carbon element only and a single shaft. Series 73 is an economy version of Series 70; mounting bushings are molded into a plastic face plate and it is available only as a single or dual section control.

Power Rating	Single Section	Multi-Section
Carbon	1 Watt*	½ Watt/Section
Cermet	2 Watts	1 Watt/Section

*Series 72 rated ½ Watt per section and carbon only.

To Order a Custom MOD POT Control, Submit the Following Information:

- Number and type of sections required (resistance modules listed in **Chart No. 1,** switch modules in **Chart No. 2,** vernier drive sections in **Chart No. 3**).
- Bushing types (selections listed in **Chart No. 4**).
- Shaft combinations (selection of types in **Chart No. 5**).
- Locating lug options (selection of types in **Chart No. 6**).

CHART NO. 1, RESISTANCE MODULES

	Nominal Resistance Values, Ohms		
50*	1K	25K	750K
75*	2K	50K	1.0 megs
100	2.5K	75K	2.5 megs*
200	5K	100K	5.0 megs*
250	7.5K	200K	10.0 megs*
500	10K	250K	
750	20K	500K	

*Carbon composition only.

To Order Resistance Modules, Specify The Following For Each Module:

- Nominal resistance value in ohms, from Chart No. 1.
- Cermet or carbon composition. Series 72 available in carbon only.
- Tolerance: Carbon composition, 10% or 20%; Cermet, 5% or 10%.
- Solder lug or square terminals.
- Type of taper: Linear taper. Other tapers available in values of 250 ohms thru 10.0 megohms, carbon composition only, as follows:

Clockwise and counterclockwise modified logarithmic taper..... ±10% or ±20% tolerance
Clockwise exact logarithmic taper.. ±10% or ±20% tolerance
Modified linear taper..... ±10% or ±20% tolerance
Attenuators, L-pad or T-pad..... ±15% or ±20% tolerance

CHART NO. 2, SWITCHES

Current Rating: 2 amps rms for 125 V, 60 Hz, non-inductive load.

Switch Type	Contact Arrangement*
Rotary	Two sets of contacts per switch One set normally open, one set normally closed. Two sets normally open.
Push-Pull† or Momentary†	Four sets of contacts per switch— Two sets normally open, two sets normally closed.

*Switches are described in the detent position. †Not available on Series 72.

To Order Switches, Specify The Following For Each:

- Type of switch.
- Contact arrangement.
- Location of detent required if rotary switch is ordered—either clockwise or counterclockwise end of rotation.

CHART NO. 3, VERNIER DRIVES.

Drive	Type of Shaft and Shaft Combination*
16-Turn	Fine adjust shaft only.
Vernier†	Fine and coarse adjust shaft.

*To Order Vernier Drive Control, Specify Type Of Shaft Or Shaft Combination Required. See Chart No. 5. †Not available on Series 72.

CHART NO. 4, MOUNTING BUSHINGS.

Bushing Type	Diameter	Lengths
Plain	¼"	¼", ⅜"†
Locking†	¼"	⅜", ½"
Plain	⅜"	¼"†, ⅜"
Locking†	⅜"	⅜", ½"

*Bushings are plastic on Series 72. †Not applicable on Series 72.

CHART NO. 5, SHAFT COMBINATIONS AND LENGTHS

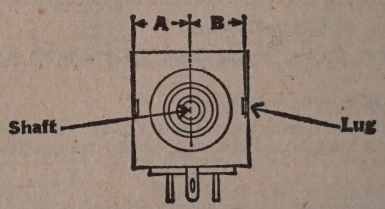
Shaft Operating Combinations	Lengths*
⅛" Dia. Solid	⅜"†, ½", ⅝", ¾", ⅞"†
¼" Dia. Solid	⅜"†, ½"†, ⅝"†, ¾", 1⅛"
¼" Dia. Outer Concentric†	½", ⅝", ¾"
⅛" Dia. Inner Concentric†	1", 1⅛", 1¼"
⅛" Dia. Outer Concentric†	½", ⅝", ¾"
.078" Dia. Inner Concentric†	1", 1⅛", 1¼"

*Lengths are measured from the bushing mounting surface. †Not available on Series 72.

To Order Shaft Combination and Length, Specify the Following Information:

- Shaft combination desired.
- For dual shaft combination, specify which sections are to to be operated by each shaft.
- Shaft Lengths.
- Standard shaft endings include plain round, screwdriver slot, or flatted except .078" dia. solid and .125" dia. hollow shafts which have plain endings.

CHART NO. 6, LOCATING LUGS



Dimension A or B, or both, specify distance from shaft center to lug center.

Locating Lug Option No. (or Letter)	Dimen. A	Dimen. B
1	.305"	No Lug
4	No Lug	No Lug
A	No Lug	.305"

To Order Locating Lugs, Specify Lug Option No. (Or Letter).

All controls include standard A-B mounting hardware and markings. Extra hardware is available on request. Special markings can be provided on each control, if desired. For additional information, request Allen-Bradley Publication 5217 and Mod Pot Order Form 898.

Because of the wide range of standard combinations available, pricing is quoted on an individual specification basis.

BUNKER RAMO AMPHENOL Micropots, Microdials

TEN-TURN PRECISION MICROPOTS

Model 205: Bushing mount. Power Rating, 5 watts max. at 40° C. Temperature Range, −55° C to +105° C. Linearity Tolerance (Zero-Based), ±0.1%. Resistance Tolerance, ±10% below 50 ohms; ±3%, 50 ohms and above. Size, 1¾″ dia. x 2⅛″ lg.; ¼″ dia. shaft. Standard Resistance: Specify 1.15, 2.9, 25, 50, 100, 200, 500, 1K, 2K, 5K, 10K, 20K, 30K, 50K or 100K ohms.

Model 2101B: Bushing-servo mount. Power Rating, 5 watts max. at 40° C. Temperature Range, −55° C to +125° C. Linearity Tolerance, ±0.25%. Resistance Tolerance, ±5%, 25 and 50 ohms; ±3%, 100–100K ohms; ±5%, 120K ohms. Size, ⅞″ dia. x 1.448″ lg., bushing; ⅞″ dia. x 1.573″ lg., servo; ⅛″ dia. shaft. Standard Resistance: Specify 25, 50, 100, 200, 500, 1K, 2K, 5K, 10K, 20K, 30K, 40K, 50K, 100K or 120K ohms.

Model 2151B: Bushing mount. Power Rating, 3 watts max. at 40° C. Temperature Range, −55° C to +105° C. Linearity Tolerance, ±0.25%. Resistance Tolerance, ±3%. Size, ⅞″ dia. x 1.455″ lg.; ¼″ dia. shaft. Standard Resistance: Specify 100, 500, 1K, 5K, 10K, 20K, 30K, 50K or 100K ohms.

Model 216B—Same as above, except servo mount bushing.

Model 2201B: Bushing mount. Power Rating, 5 watts max. at 40° C. Temperature Range, −55° C to +105° C. Linearity Tolerance, ±0.5% below 100 ohms, ±0.25%, 100–100K; ±0.5%, 200K. Resistance Tolerance, ±5%, 25 and 50 ohms; ±3%, 100–100K; ±5%, 200K. Size, 1 13/16″ dia. x 2⅛″ lg.; ¼″ dia. shaft. Standard Resistance: Specify 25, 50, 100, 200, 500, 1K, 2K, 5K, 10K, 20K, 30K, 50K, 100K or 200K ohms.

Model 4101B: Bushing mount. Power Rating, 2 watts max. at 40° C. Temperature Range, −55° C to +125° C. Linearity Tolerance, ±0.25%. Resistance Tolerance, ±5%. Size, ⅞″ dia. x 1.182″ lg.; ¼″ dia. shaft. Standard Resistance: Specify 100, 200, 500, 1K, 2K, 5K, 10K, 20K, 50K or 100K ohms.

Model 4201B—Same as above, except size—⅞″ dia. x ¾″ long.

THREE-TURN PRECISION MICROPOT

Model 205-3T: 3-turn precision Micropot. Bushing mount. Power Rating, 3 watts at 40° C. Temperature Range, −55° C to +105° C. Linearity Tolerance, ±0.5%, zero-based. Resistance Tolerance, ±10%, 10 ohms; ±3%, 50–50K ohms. Size, 1¾″ dia. x 1 31/64″ lg.; ¼″ dia. shaft. Standard Resistance: Specify 10, 50, 100, 500, 1K, 5K, 10K, 20K, 30K or 50K ohms.

OUR STOCK IS COMPLETE AND UP TO DATE.

CONCENTRIC SCALE MICRODIALS®

Type 1350: Ten-turn concentric scale increment dial has 100 divisions; turns-counting dial numbered 0–10. Extra-large outer vernier dial and foolproof turns dial for readout accuracy of 1000:1. Smooth epicyclic gear movement. Zero backlash. Fingertip brake. Clear anodized aluminum finish. Size, 1 1/16″ dia. x 1″ deep. For ¼″ dia. shafts.

Type 1370: Same as Type 1350, except size only ⅞″ dia. x .898″ deep. For ¼″ dia. shafts.

Type DFA: Ten-turn dial has 1000:1 indexing accuracy; couples directly to potentiometer shaft, hence no backlash. Single numeral in window above the knob indicates completed turns of shaft. Available in satin chrome finish **DFA-N** or with white numbers on black finish **DFA-NB.** Size, 1.06″ w. x 1.25″ h. (1.63″ h. with lock lever).

DIGITAL READOUT MICRODIALS

Type 1300: Digital units for fast, accurate readings; indicates precise shaft position up to 1000 turns. Available in 3-digit 10-turn, 4-digit 100-turn, and 5-digit 1000-turn models with counts to 6000 per minute. Optional fingertip brakes. Knurled aluminum knobs; Cycolac* counter wheels. Rugged, dust-sealed case. Continuous rotation. Numbers 3/16″ high. *Reg. TM Borg-Warner Corp.

Amphenol Number		No. Digits	No. Turns	Counts	Size, In. Dia. x Depth
Std.	With Brake				
1310	1309	3	10	000–999	1 1/16 x 1 1/32
1304	1314	4	100	0000–9999	2 1/16 x 1 1/32
1305	1315	5	1000	00000–99999	2 1/16 x 1 1/32

Type 1330: Ten-turn 3-digit units with on-off switchable brake and magnified digits for widest versatility. Internally illuminated. Lens type window gives 1½X magnification of digits. Snap-on cap for easy lamp replacement. Sealed against dust and moisture. Machined aluminum knob with fluted rim. Numbers 5/16″ high. Size, 1¾″ dia. x 1 31/32″ deep.

No Light No.	White Light No.	Red Light No.	Std. Color
1331	1331LW	1331LR	Dark Gray
1332	1332LW	1332LR	Light Gray
1333	1333LW	1333LR	Red
1334	1334LW	1334LR	Black
1335	1335LW	1335LR	White

Type 1380: Ten-turn dial has 1000:1 indexing accuracy; mounts to ¼″ potentiometer shaft with a single set screw. Control knob mounts directly to shaft to eliminate backlash inaccuracy; on-off brake switch. Available in black finish **1381** or in black with gray hammertone finish **1385.** Size, 1 7/64″ w. x 1.075″ d. x 1 5/64″ h.

Type 3100: Extremely precise, digital Microdial. Measures 1 1/16″ x 1 11/32″ and protrudes only 11/32″ from panel. Digits (illumination optional) magnified by convex lens in recessed window. Three-digit 10-turn dial rotates continuously forward and backward with fingertip brake to lock settings. Indexing accuracy, 1000:1. For panels 1/16″ to 3/16″ thick. Natural brush aluminum finish. Illuminated types supplied with 28-volt bulb; optional 6-volt bulb available, specify.

Amphenol Number	Shaft Dia.	Light	Amphenol Number	Shaft Dia.	Light
3121	⅛″	None	3141	¼″	None
3121-2	⅛″	White	3141-2	¼″	White
3121-3	⅛″	Red	3141-3	¼″	Red

Type DFD: Ten-turn 3-digit readout with a vernier wheel providing 4 graduations intermediate between adjacent digits on the least significant digit counter wheel permits interpolating to 250 parts per million. Magnified digits and vernier scale for easy viewing. Size, less than 1″ wide and less than 2″ high.

Ⓗ

10-TURN ½" DIAMETER WIRE-WOUND MODEL 3707 (FIG. H)

Power Rating: 1.0 watt at 40° C. Independent Linearity: ±1.0%. Operating Temperature: 105° C max. Resistance Tolerance: ±5%. Size: ½" dia. x 1" lg.

3707S-1	100, 200, 500, 1K, 2K, 5K, 10K, 20K, 50K, 100K	$23.32	$19.82	$18.66	$17.49	$16.32	$15.16

KNOBPOT® WIRE-WOUND READOUT POTENTIOMETERS

Knob, readout dial and potentiometer in one package requires less front panel space than most dials alone. Self-locking feature provides excellent stability during vibration and shock; 100% contact pressure control insures high mechanical life. Sealed to pass MIL-STD-202, Method 103, humidity. Shock: 50G. Vibration: 10G. Electrical Rotation: 3600° nom. Mechanical Life: 200,000 dial revolutions (Model 3610, 50,000 dial revolutions). Lockwasher and mounting nut included.

A

10-TURN ¾" DIA. CLOCK FACE READOUT KNOBPOT® MODEL 3600 (FIG. A)

Dial Accuracy: ±0.5% VR. Dial Repeatability: ±0.1% VR. Power Rating: 1.5 watts at 25° C. Operating Temperature: −65° C to +85° C max. Resistance Tolerance: ±5%. Size: ¾" dia. x 1" lg. FMS; 1 17/32" lg. overall.

10-TURN ⅞" DIA. KNOBPOT® DIGITAL DIAL MODEL H-357

Digital dial features large, easy-to-read numbers for minimum operator error. Combines long life, accuracy and low cost in an attractive design. Functional combination integrates with multi-turn precision potentiometers and other rotating devices. Typical applications include instrumentation, process control, data processing and communications. Recessed lens offers protection from breakage; applying brake will not cause change of dial setting. Readout Accuracy: 0.1%. Readout Range: 000 to 999. Readability: 1 part in 2,000 (10 turns). Temperature Range: −15° C to +85° C. Meets MIL-STD-202, Method 103 humidity. Shaft, 0.625"–0.842" FMS; bushing, 0.342" max. FMS. Size: ⅞" dia. x 1.45" d.

KNOBPOT® INTEGRAL PUSHBUTTON POTENTIOMETER MODEL 3680

The Model 3680 integrates a precision incremental decade potentiometer with an easy-to-read digital display and a speedy pushbutton control action. Push the top PLUS button to increase resistance; push the bottom MINUS button to decrease resistance. Unit snaps easily into a 0.83" x 1.42" panel cutout. Resistance Tolerance: ±1%. Resolution: 0.1%. Accuracy of Dial Reading to Output: ±0.5% of full scale. Power Rating: 2 W at 25° C, derated to zero watts at 85° C. Operating Temperature Range: −25° C to +85° C. Terminals: Dual purpose solder lugs also fit AMP Series 110 receptacles. Size: 1.45" w. x 0.93" h. x 1.36" d. behind panel. Weight: 0.78 oz.

CERMET CONTROLS

Cermet infinite resolution element offers stable performance in all environments. Resistance Tolerance: ±10%. Taper: Linear (A). Contact Resistance Variation: ±3% max. of total resistance. TC: ±150 ppm/° C. High Performance Models meet or exceed the applicable requirements of MIL-R-94 and MIL-R-23285. Single turn except otherwise noted. **High Performance Model 3852:** Housing ¾″ dia. x ¼″ lg. Resistance Range: 50 ohms to 5 megs. Power Rating: 2 watts at 70° C. Operating Temperature: −65° C to +150° C. **Multi-Turn Model 3856:** Features 3¾ turns which provide 1350° of electrical continuity travel. Housing: ¾″ dia. x ¼″ lg. Resistance Range: 50 ohms to 5 megs. Power Rating: 2 watts at 70° C. Operating Temperature Range: −65° C to +150° C. **Commercial Model 3859:** Same as Model 3852 except Operating Temperature Range: −65° C to +125° C and has plastic bushing. **High Performance Model 3862:** Housing ½″ dia. x 0.453″ lg. Resistance Range: 100 ohms to 5 megs. Power Rating: 1 watt at 125° C. Operating Temperature Range: −65° C to +175° C. All models supplied with hardware; types with locking bushings supplied with lock nut.

Available Options: (With Minimum Order Requirements.) Plain and flatted shaft ends; lug or PC terminals; other nominal resistance values; 10% audio CW taper (C) and CCW taper (F) with ±10% resistance tolerance; and ±5% resistance tolerance (H) are also available on special order.

CONDUCTIVE PLASTIC CONTROLS

The conductive plastic resistance element offers improved stability, low noise, and stable performance in all environments. The one-piece, molded-in terminations eliminate bonded connections and stress problems. **Housing:** ¾″ diameter. **Resistance Range:** 1K to 100K in linear tapers, 2K to 50K in audio tapers. **Power Rating:** ½ W at 70° C.

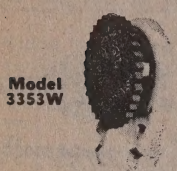
SINGLE-TURN VARIABLE RESISTORS

Resistance change after solvent bath in Freon* TFE or Trichloroethane is less than 1%.

See beginning of Bourns listing for Part Numbering System.

*Registered DuPont trademark.



Model 3353W

19/32" DIAMETER COMPOSITION MODEL 3353

Feature wide resistance range; screwdriver and thumbwheel adjustment; compatible with standard circuit board cleaning processes. Power Rating: ⅓ watt at 60° C ambient. Resistance Tolerance: ±20% thru 1 meg; ±30% 2.5 megs and up. Operating Temperature: 0° C to +100° C. Humidity: Less than ±12.5% change in total resistance after 24 hours at 95% relative humidity, 40° C. Size: 19/32" dia. x 5/16" thk. (**P**); 9/32" thk. (**W**).

MODEL 80 ⅝" SQUARE BUILDING BLOCK POTENTIOMETERS CERMET OR PLASTIC

Advanced modular construction with factory assembled reliability and quality assurance. A panel-mount, ⅝" square potentiometer available in 1, 2, 3 or 4 sections and single or dual shafts. Unique torque control eliminates torque build-up in multiple-section units. Resistance Tolerance: plastic, ±20%, ±10% available in linear taper; cermet, ±10%, ±5% available in linear taper. Dielectric Strength: 1000V rms at sea level. Insulation Resistance: 1000 megs. Operating Temperature Range: plastic, −65° C to +125° C; cermet, −65° C to +150° C. Temperature Coefficient: plastic, ±1000 ppm/°C; cermet, ±150 ppm/°C. Shaft Torque: any number of sections, .3 to 2 oz. in. Terminals: Model 81, printed circuit pins 0.032" dia x 0.5" long; Model 82, solder lugs.

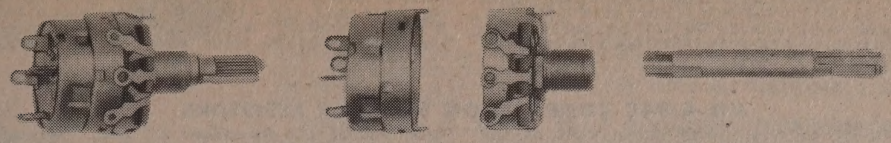
CTS Industrial Variable Resistors

SERIES 45 SNAP-TOGETHER 15/16" DIA. ½ WATT COMPOSITION VARIABLE RESISTORS



Provides wide variety of combinations of ½-watt controls for industrial applications. System includes most commonly used resistance values plus four basic components combining to quickly form many hundreds of controls. Included are 16 resistance values and tapers, 8 popular shafts, 2 rotary power switches and a control dust cover. Choice of two resistance tapers, CTS A-logarithmic or D-linear. Rated ½-watt. Tolerance, ±20%. Controls equipped with ⅜"-32 UNEF-2A x ⅜" long bushing for ¼" diameter shafts, and one mounting nut. All sections may be used with or without attachable CTS rotary power switches.

HOW TO ORDER

To derive specification number from selection chart—

1. Begin with 45 to identify Series 45 controls.
2. Indicate part number of desired value and taper from "A" columns.
3. Indicate S for SPST switch, or D for DPST switch. Omit if no switch is desired (Column B).
4. Indicate part number of shaft having desired length and end trim from "C" column.

Example: Assume control is wanted with these specifications: 500K log taper, SPST switch, and a ⅞" slotted shaft. Specification number derived from the selection chart would be **45A504S04.**

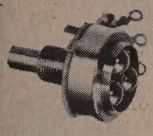
Single	With	3.88	3.59	3.30	3.08

HOW TO ORDER: The following CTS variable resistors are available in the resistance values shown for each series. To order, add a 3-digit suffix to the basic CTS type number to indicate the resistance value desired. The first two digits of the suffix indicate the significant numbers; the third digit indicates the number of zeros in the resistance value. Ex.: **VA45R101A** is the CTS series VA45 with a resistance value of 100 ohms and a ±10% resistance tolerance; **VA45R504A** is the same potentiometer with a resistance of 500K and ±10% tolerance.



VA-45

SERIES VA-45 ½-WATT 15/16" DIA. VERNIER ADJUST CARBON VARIABLE RESISTORS

Controls are bright nickel plated. Resolution, near infinite. Independent linearity, ±10%. **Power Rating:** 100–10K ohms, ½ watt; 10.1K–100K ohms, ⅓ watt; above 100K ohms, ¼ watt at 55° C derated to no load at 85° C. **Voltage Rating:** Bushing to terminals high pot test, one minute, 1000 VAC; operating maximum, 750 VDC; across end terminals, 500 VDC. **Tolerance:** ±10%. **Rotation Angle:** Contact arm, 300°; shaft, 3700°, 10¼ turns (1° for each 12.5°). **Size:** Shaft dia., .250", length, 1"; bushing dia., ⅜"-32 UNEF-2A, length, ¼".

AW

SERIES AW 5-WATT, 15/16" DIAMETER WIREWOUND VARIABLE RESISTORS

Wide resistance range, fully enclosed construction. Available in Type AW with non-locking type bushing, and Type AWRL with locking bushing. Resistance range, 10 ohms through 10K ohms. **Tolerance:** ±10%. **Power Rating:** 5 watts at 25° C; 4 watts at 55° C; derated to no load at 105° C. **Voltage Rating:** Bushing to terminals, high pot test, one minute, 1000 VAC. **Max. Operating Voltage:** 500 VDC. **Shaft Dia.:** .250". **Shaft Length:** Type AW, 3" FMS; Type AWRL, ½" FMS. **Trim:** Type AW, full round; Type AWRL, screwdriver slot. **Taper:** Linear. **Angle of Rotation:** 300°, ±5° total; effective rotation, 280°, approx. **Mounting:** Bushing, ⅜"-32 NEF-2A thread. Bushing length, Type AW, non-lock, ⅜"; Type AWRL, locking, ⅜". Type AW supplied with lockwasher and mounting nut. Type AWRL with lockwasher, mounting nut and locknut.

550LT

SERIES 205 2-WATT, ⅝" DIAMETER CERMIDE® VARIABLE RESISTOR

Miniature size resistor with dust shield construction. Resistance range, 50 ohms through 1 meg. **Tolerance:** ±10%. **Independent Linearity:** ±5%. **Power Rating:** 2 watts at 70° C derated to zero at 125° C, linear taper. **Voltage Rating:** Bushing to terminals, high pot test, one minute, 750 VAC; at 3.4" mercury, 350 VAC; maximum operating voltage, 500 VDC; across end terminals, 350 VDC, maximum, not to exceed wattage rating. **Taper:** Linear. **Mounting:** Bushing, ¼"-32 UNEF-2A, ¼" long. Shaft dia., .125". Shaft length, ⅝" FMS. **Shaft Trim:** SD Slot. **Angle of Rotation:** 300° ±5° total.

*Has ½" long locking bushing; others, ⅜" long nonlocking bushing.

CTS Military Variable Resistors

HOW TO ORDER: The following CTS military variable resistors are available in the resistance values shown for each MIL style. To order, add a 3-digit suffix to the basic military style number to indicate the resistance value desired. The first two digits of the suffix indicate the significant figures; the third digit indicates the number of zeros. Ex.: **RV4NAYSD101A** is a MIL style RV4 variable resistor with ⅜" long bushing, ⅞" slotted shaft, 100 ohm resistance value, and ±10% resistance tolerance; **RV4LAYSA753A** is a MIL style RV4 with ½" long locking bushing, ⅝" slotted shaft, 75K resistance value, and a ±10% resistance tolerance.

MIL-R-94C COMPOSITION VARIABLE RESISTORS

Approved to MIL-R-94C and available in common shaft lengths and values. **Rotational Life:** 10% max., 25,000 cycles. **Load Life:** 10% max., 1000 hours, rated load, 70° C. **Moisture Resistance:** 6% average, 10% max., Method 106 MIL-STD-202. **Low Temperature, Storage and Operation:** 2% max. **Thermal Cycling:** 6% max. **Shock and Vibration:** 2% max. **Temperature Range:** −63° C to +150° C.

STYLE RV4 3-WATT, 1 1/16" DIAM.

Style RV4N: Linear resistance taper; ⅞" slotted shaft; ⅜" lg. bushing. **Style RV4L:** Linear resistance taper; ⅝" slotted shaft; ½" lg. locking bushing.

CTS Trimmer Potentiometers

SINGLE-TURN INDUSTRIAL/COMMERCIAL TRIMMER POTENTIOMETERS

HOW TO ORDER: CTS trimmer potentiometers are available in the resistance values shown for each series. To order, add 3-digit suffix to basic CTS type number to indicate resistance value desired. The first two digits of the suffix indicate significant numbers; third digit indicates number of zeros. Ex.: **U201R101B** is a Series U201 trimmer with a resistance value of 100 ohms and ±20% tolerance; **U201R504B** is the same trimmer, but with 500K ohms

SERIES 201 ¼-WATT, 19/32″ DIAMETER COMPOSITION TRIMMER

Miniature, low cost carbon trimmers. Snap-in, self-support mounting. Type U201 mounts with knob parallel to PC board; type X201 with knob perpendicular to PC board. Blue nylon knob, slotted for either front or rear screwdriver adjustment, with rim to guide screwdriver. **Power Rating:** ¼ watt at 40° C, derated to zero at 85° C (values below 5K); ¼ watt at 55° C, derated to zero at 100° C (values of 5 K and above). **Voltage Rating:** 350 VDC max. across end terminals. **Tolerance:** ±20%. **Taper:** Linear. **Angle of Rotation:** 260° ±5° total and effective rotation. **Rotational Torque:** ¾ to 6 inch ounces. **Stop Strength:** 3 inch pounds. **Terminals:** PC type.

CTS Type	Resistance Values, Ohms (Specify)	Net Each, Lots of 1-9	10-24	25-49	50-99	100-249	250-499	500-999

SERIES 260 MINIATURE 10MM COMPOSITION TRIMMER POTENTIOMETERS

Low cost, low profile miniature size trimmer potentiometer designed for either horizontal or vertical mounting. Type U260 is designed for horizontal mounting with adjustment knob parallel to printed circuit board. Type X260 designed for vertical mounting with adjustment knob perpendicular to printed circuit board. Wide resistance range from 500 ohms through 1 megohm. Adjustment knob is off-white nylon; has serrated edge, slotted for top or bottom screwdriver adjustment. Top screwdriver slot is .120″ x .036″; bottom screwdriver slot, .062″ x .032″. **Tolerance:** ±20%. **Power Rating:** .2 watts at 55° C derated to no load at 100° C. **Voltage Rating:** Across end terminals, 350 VDC. **Taper:** linear. **Angle of Rotation:** 285° ±5° total-rotation; 285° effective rotation. **Rotational Torque:** .3 inch ounces to 3 inch ounces. **Stop Strength:** 8 inch ounces. **Size:** .370″ dia. x .154″.

SERIES 115 2-WATT, ¾″ DIAMETER WIREWOUND TRIMMER

Fully enclosed, 2 watt trimmers; insulated rotor construction. Long rotational life. Cross slot in nylon rotor for screwdriver adjustment or optional push-on knob attachment. **Power Rating:** 2 watts at 55° C, derated to zero at 105° C. **Voltage Rating:** 500 VDC max. operating. **Tolerance:** ±10%. **Taper:** Linear. **Angle of Rotation:** 270° ±5°. **Rotational Torque:** ½ to 10 inch ounces. **Stop Strength:** 4 inch pounds. **Terminals:** PC type. **Mounting:** Type 115, PC; Type P115, twist tab; Type 117, rivet ear.

SERIES 345 ¾ WATT, ¼″ DIA. CERMET TRIMMER

Enclosed construction, only ¼″ dia., with nickel-silver alloy housing. Low temperature coefficient, cermet element, positive stop. **Power Rating:** ¾ watt at 25° C, derated to zero at 150° C; ½ watt at 85° C. **Voltage Rating:** 300 VDC max. across end terminals. **Tolerance:** ±20%. **Operating Temperature Range:** −55° C to +150° C. **Rotation:** 270°, ±5°. **Running Torque:** 2 in.-oz. **Stops:** Positive; 6 in.-oz. max. stop strength. **Size:** .250″ round x .180″ h. **Terminals:** PC pins.

RJ22CW

MIL STYLE RJ24 ⅜" SQUARE, ½-WATT CERMET TRIMMERS

Approved to MIL-R-22097F, Style RJ24, Characteristics C requirements. Excellent heat sink qualities, high stability, low inductance. Sealed construction; clutch stops; infinite resolution. Molded diallyl phthalate housing. **Power Rating:** ½ watt at 85° C, derated to zero at 150° C. **Oper. Temperature Range:** −55° C to +150° C. **Max. Operating Voltage:** 400 VDC. **Tolerance:** ±10%. **Insulation Resistance:** 1000 megohms minimum, dry. **Rotation:** 25 turns (±3); 0.1–5.0 in.-oz. rotational torque. **Size:** ⅜" square x 13/64" thick. **Terminals:** PC pins, spaced .100" (RJ24CP has staggered pins). **Adjusting Screw:** RJ24CW has screw on top; others, on side.

RJ24CX

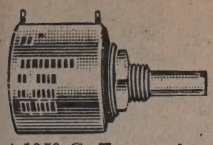
Clarostat Potentiometers, Decades and Dials

SMALL, 10-TURN 2-WATT POTENTIOMETER ONLY ¾" IN BODY LENGTH



Series 73JA has brought the ten-turn potentiometer down in size, down in price and down in wear-outs. Only ¾" body length, priced less than $4.00 in quantity, and a rotational life of 500,000 cycles. **Resistance Range:** 100–100K ohms. **Resistance Tolerance:** ±5%. **Power Rating:** At 20° C, 2 watts. **Operating Temperature Range:** −55° C to +105° C. **Temperature Coefficient:** ±20 PPM/° C max. **End Resistance:** 0.25% or 1 ohm. **Noise During Adjustment (ENR):** 100 ohms, maximum. **Insulation Resistance:** 1000 megohms at 500 VDC. **Dielectric Strength:** 1000 V rms. **Actual Electrical Travel:** 3600°+10°−0°. **Linearity:** 0.25%, independent. **Mechanical Torque:** 1.5 oz.-in. maximum. **Stop Strength:** 50 oz.-in. minimum. To order, add resistance required to Clarostat No., example 73JA-**100.** See stock value, ohms, below.

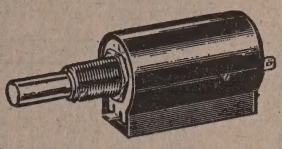
SERIES 62JA TEN-TURN POTENTIOMETER



Opens new application areas for the advantages of multi-turn potentiometer design, including far greater resolution in trimming, better instrument control and settings for all types of electronic equipment. Resistance tolerance, ±5%. Functional output, linear. Absolute linearity, ±0.25%. Power dissipation at 25° C, 2 watts, derated to zero at 85° C. Dielectric strength, 1000 VAC. Electrical and mechanical rotation, 3600°, +10, −0. Maximum torque, 3 oz.-in. Stop strength, 50 oz.-in. Insulation resistance, 1000 megohms. Life, 100,000 shaft revolutions. Max. rotation speed, 60 rpm. Size, ⅞" dia. x 2½" overall. **$8.25**

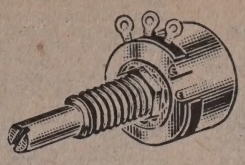
MODEL 250 RACK MOUNTED DECADE

Same as Model 240C except for rack mounting. Fits in standard 19" relay rack. **Size:** 19" w. x 13¼" d. x 7" h. Weight, 18½ lbs.
Model 250 Power Resistor Decade Box—Net Each **$173.25**

SERIES 381 1-WATT ⅝" DIA. POTENTIOMETERS



Clarostat "Quiet One" series, a new, low cost potentiometer with characteristics exceeding those of higher priced models. Features reliable, homogeneous, strain-free resistance element with 1% dynamic noise and 5% independent linearity. Mechanical parts precision machine-finished for smooth operation, long life. Manufactured to MIL-R-94 specifications. **Resistance Tolerance:** Linear, up to 500K ohms ±10%; above 500K ohms, ±20%. **Power Rating:** 1 watt max. continuous power rating for linear taper, but voltage not to exceed rating. Full rating at 70° C, derated linearly to zero watts at 120° C. Derate all non-linear tapers by multiplying wattage rating by 0.5. **Mechanical and Rotation:** 300° ±5° with switch. **Dynamic Noise:** Linear single controls maximum initial noise level 1% of total resistance. **Linearity:** ±5% independent. **Working Voltage:** 350 VDC across end terminals, power not to exceed rating. Models 381N have plain ¼" long bushing, ½" long shaft, screwdriver slotted. Models 381NS same, but equipped with attached SPST switch rated 1 amp at 125 VAC or DC. Models 381L have ⅜" shaft-locking bushing, 1/16" long shaft, screwdriver slotted. To order, add resistance required to Clarostat No., example: 381N-**100.** See Stock Values Table, below.

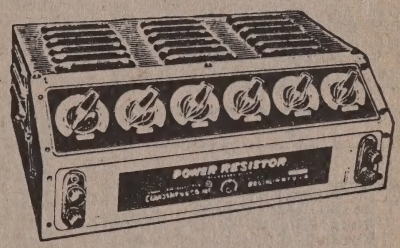
500	5000	50K	500K	5.0 megs

MODEL 240C PORTABLE DECADE

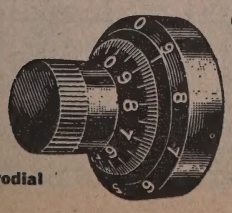


The Model 240C portable resistance decade allows the changing of resistance at a flip of a switch in a working circuit. Any ohms value can be obtained, from one ohm to 999,999 ohms, in steps of one ohm and at a maximum power rating of 225 watts, using a maximum of 1,000 volts DC or 660 volts AC. Dependable Clarostat "Greenohm" resistors are used throughout. These are inorganic-cement-coated, wire-wound power resistors. The resistors are mounted on rigid metal supports; a baffle plate separating the resistor bank from the switch assembly protects the latter against heat. Resistance changing switches are of the type that prevents a resistance breakdown between steps, thus protecting delicate meters and measuring instruments in the circuit. Pointer knobs indicate at a glance the resistance value being used.

Resistance Tolerance: ±2.0% all decades except No. 1, ±5.0%. **Max. Current:** 5 amps, No. 1; 1.5 amps, No. 2; 0.5 amp, No. 3; 0.15 amp, No. 4; 0.05 amp, No. 5; 0.005 amp, No. 6.

In a heavy gauge metal case, finished in frosted gray wrinkle, with an etched black-and-aluminum front panel. Overall length, 13"; 8½" deep; 5¾" high. Weight, 11.5 lbs.
Model 240C Power Resistor Decade Box—Net **$121.05**

CLARODIALS—10-TURN CONCENTRIC SCALE DIALS



Clarodial

Calibrated dials designed for multi-turn potentiometers up to ten turns or other rotary devices. Requires only one inch of panel space. Knob attaches directly to the shaft, and the body of the dial is mounted rigidly to the panel. Therefore, accurate readings with a ratio of 1000 to one for 10 turns are provided with zero backlash and no reading error. Made of anodized aluminum. Mounting requirements: ¼" shaft and ⅜"-32 NEF-2A bushing. Model 411 is black, has no lock. Model 412 is black, has lock. Model 461 is clear, has no lock. Model 462 is clear, has lock.

MINIATURE DECADE BOXES

Each unit consists of a network of five ±1% metal film resistors. Desired value is selected by inserting banana plug in hole adjacent to desired decade digit. Housing is interlocking construction (tongue and groove) interconnecting up to 7 units for a complete range .1 to 999,999.9 ohms in .1 ohm steps. External connections by solder lug and banana plug receptacles; shorting bar (supplied) or dual shorting banana plug for connections between ganged units. **Temp. Coef.:** Less than 100 ppm. **Temp.:** 40° C max. at rated current; derate to zero at 85° C. **Size:** 1½" w. x ⅞" d. x 2¾" h., body. Wt., 2 oz. per unit.

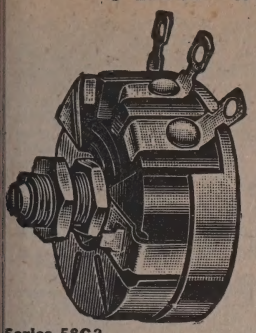
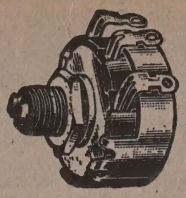
CLAROSTAT CONTROLS

"C LINE®" WIRE-WOUND INDUSTRIAL CONTROLS



Series 58C2



Series 43C2

Clarostat "C Line" controls are designed primarily for industrial applications. They feature moisture and dust-proof construction, corrosion proof finish and locking or standard bushing. Suffix C1 indicates 1⅜" round shaft beyond bushing and ⅜" long bushing with ⅜-32-NEF-2 thread. Suffix C2 indicates ⅛" screwdriver slotted shaft, ½" split locking bushing. One nickel plated hex mounting nut and internal lock washer supplied with all units. All C2 units supplied with a nickel plated machined hex locking nut. Switches, ohmages not listed, tapers not listed, bushings and shaft lengths not listed, and dual combinations are also available on special order. (Prices and delivery information available on request.)

SERIES 43C1 AND 43C2

2-WATT CONTROLS

Smallest 2-watt wire-wound control available up to 50K ohms. Tolerance ±5%. Independent Linearity ±2%.

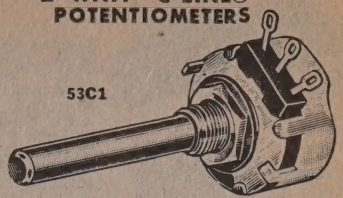
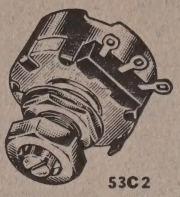
2-WATT "C-LINE®" POTENTIOMETERS

53C1





53C2

Molded composition element type totally sealed against moisture. High quality resistance device has high stability under extreme conditions. Use for critical applications such as test equipment, military, computers, servo mechanisms, etc. One-piece wiper assembly; carbon to carbon contact for low noise level; stainless steel shaft; gold plated terminals. Electrical tolerances are ±10% for values up to 1 megohm; ±20%, 1 meg. and above. "S" taper supplied. **Size:** 1⅛" dia. x ⅞" deep.

MILITARY WIRE-WOUND AND CARBON POTENTIOMETERS

RV4LAYSA, 53C2

MIL-R-19A VARIABLE WIRE-WOUND POTENTIOMETERS

Certified for MIL-R-19A and available in common shaft lengths and values. Linear taper. **Tolerance:** ±10%. **Ratings:** RA10, one watt. RA20, two watts. RA30, four watts **Bushing and Shaft:** Specify by letters (i.e. RA20**NASD**351A). RA10: NASD, ⅞" lg. x ¼" dia.; NASL, ⅝" lg. x ¼" dia.; LASM, 1⅛" lg. x ¼" dia., lock bushing. RA10, 20: LASD, ⅞" lg. x ¼" dia., lock bushing. RA20, 30: NASA, 1⅛" lg. x ¼" dia.; NASD, ⅞" lg. x ¼" dia.; LASB, ⅝" lg. x ¼" dia., lock bushing. All have slotted shafts.

MIL-R-94B VARIABLE 2-WATT CARBON POTENTIOMETERS

Certified for MIL-R-94B and available in common shaft lengths and values. Linear taper. **Tolerance:** ±10% unless otherwise specified. **Rating:** 2 watts. **Bushing and Shaft:** Specify by letters (example: RV4**NAYSD**101A, or 53C3-100-S): NAYSD (53C3) for standard bushing with ⅞" l. x ¼" dia. slotted shaft; LAYSA (53C2) for lock bushing and ⅝" l. x ¼" dia. slotted shaft. **Note:** Where no military number is shown, no MIL value is available; and, only the commercial version may be ordered (53C). All others are dual-marked.

HOW TO ORDER

Spectrol basic number is followed by available terminations: Suffix **L,** color coded lead wires; **M, P, S, T, W, X, Y, H, V,** and **Z,** printed circuit pins. **First Numeral Suffix:** Indicates terminals (e.g., 55-**1**-8): **-1,** Teflon* insulated stranded 6″ leads (Models 53 and 62, round configuration with PC pins 180° from shaft head); **-2,** PC pins 90° from shaft head; **-3,** PC pins 180° from shaft head; **-4,** PC pins from base, horizontal mounting; **-5,** solder hooks 180° from shaft. **Second Numeral Suffix:** Defines shaft and other features (e.g., 50-1-**1**): **-1,** slotted fillister shaft head (Model 53 and 62, std. ohm ±20% RT tol.); **-2,** Models 53 and 62, ±10% RT tol.; **-8,** 23-turn 0.083″ dia. shaft, stops, clutch and color-coded leads (Model 84, screwdriver adjust); **-10,** MIL version equivalent per separate price table (Model 84, knob adjust); **-11,** stops and clutch, slotted fillister head shaft. **Final Numeral Suffix:** (Resistance Code): First 2 digits indicate significant nos.; 3rd digit number of zeros, e.g., 101 = 100 ohms. *Reg. DuPont trademark.

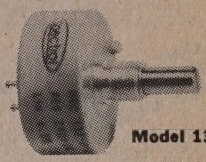
Models 84-3-10, 87-21

BUSHING MOUNT PRECISION POTENTIOMETERS

All models meet or exceed applicable MIL and commercial specs for rotational load life, temperature range, shock, vibration, humidity and salt spray. Feature extra long resistance elements to provide the best electrical resolution available; "whisker" slip-ring brush assures positive contact under severe shock and vibration for long term reliability, low torque and long rotational life. Servo, bushing and screw mountings available as standard options. Operating Temperature Range: −55° C to +125° C except as otherwise noted. Resistance Code: First 2 digits indicate significant nos.; 3rd digit, number of zeros, e.g., 101 = 100 ohms.



Model 132

SINGLE-TURN WIRE-WOUND MODEL 132

Resistance Tolerance: ±3%. Linearity Tolerance: 100 ohms, ±1.0%; 200 ohms up, ±0.5%. Power Rating: 2.75 watts max. at 40° C. Temperature: 105° C max. Size: 1.312″ dia. x 0.625″ lg.; shaft, 0.250″ dia.

TEN-TURN WIRE-WOUND MODEL 860

Resistance Tolerance: 25 ohms to 100 ohms, ±5%; 200 ohms up, ±3%. Linearity Tolerance: ±0.25% Power Rating: 8 watts max. at 40° C. Size: 1.812″ dia. x 2.000″ lg.; shaft, 0.250″ dia.

860	25, 50, 100, 200, 500, 1K, 2K, 5K, 10K, 20K, 50K, 100K, 200K	$10.00	$9.70	$9.50	$9.00	$8.75	$8.50

Model 15-1-11

MODEL 87 ROTARY SWITCHES

Half-inch switches designed with only two moving parts. Mount directly on printed circuit boards or panel mounting. Switch Action: Positive detent, 36° indexing, stops. Contacts: Rated 250 mA at 28 VDC. Life: 4,000 switching operations, per position. Contact Resistance: 0.05 ohm max. Operating Temperature: −65° C to +150° C. Types listed are single pole, 10-position, non-shorting design; double pole with 5 positions per pole max. and three pole with three positions per pole max. are also available. Prices and specifications on request.

MILITARY TRIMMERS

WIRE-WOUND 1¼" RECTANGULAR

Offers two popular pin configurations. Approved military style and performance. Wire-wound element and silver-brazed multi-wire terminations. **Resistance Tolerance:** ±5%. **Rating:** 0.75 W at 85° C. **Temp. Range:** −65° C to +150° C. **Noise:** 100 ohms, max. (ENR) during adjustment. **Insulation Resis.:** 1000 megs at 500 VDC. **Dielectric Strength:** 900 VAC. **Adjustment Turns:** 22 ±5. **Torque:** 8 oz.-in. max. Meets MIL-R-27208 Char. C environmental requirements. **Terminals:** Type RT12C2L, #30 AWG stranded Teflon leads, 11½" min. lg.; others, .028" dia. x .500" lg. gold-plated pins. **Size:** .190" w. x 1.250" lg. x .315" h.

SERIES 314 AND 316 CERMET RESISTOR NETWORKS

Series 314 and 316 cermet resistor networks are packaged in 14 and 16 pin dual inline configurations respectively. Series 314A consists of 13 resistors; Series 316A consists of 15 resistors, all resistors of identical value and with one common connection. Series 314B consists of 7 resistors; Series 316B consists of 8 resistors, all resistors of identical value and with no common connection. Series 314E consists of 12 two-resistor terminations; Series 316E consists of 14 two-resistor terminations, with two common connections and with all terminations of the same two-value combination. Available in a broad range of resistance values and, in the E types, of resistance ratios. All are substantially smaller than networks made of individual resistors. Series 314A and 316A may be used as pull-up resistors for unused TTL gates, parallel high-speed circuitry, wired OR configurations, pull-down applications or TTL-MOS interfacing. Series 314B and 316B may be used for transmission-line terminations, power gate pull-up, or logic-level translation. Series 314E and 316E may be used for digital-line terminations and various TTL and ECL applications.

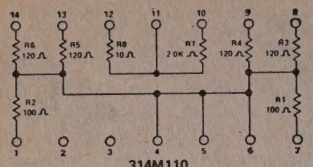
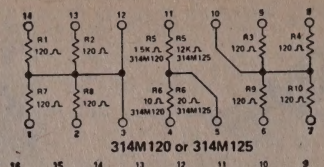
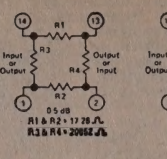
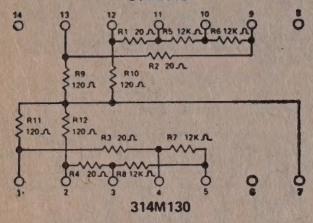
ALLEN-BRADLEY Resistor Networks

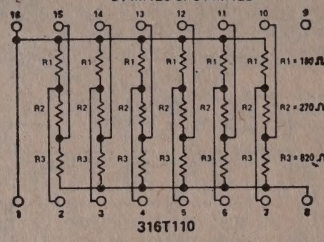
SPECIALIZED VERSIONS OF SERIES 314 AND 316

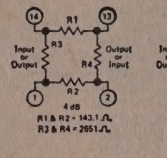












Series 314M110, 314M120 and 314M125 complement the 7520 Series of core memory sense amplifiers. Series 314M130 is for core memory sense line applications with two 711 dual voltage comparators. Series 316T-110 may be used in TTL to ECL translator applications. Series 314Z is for fixed voltage attenuation with impedance matching.

TYPE FN PRECISION THIN FILM RESISTOR NETWORKS

Networks consist of integrated films of chromium cobalt vacuum-deposited on specially selected substrates resulting in networks having precision tolerance and stability. Interconnections within network are a part of the deposited film, insuring circuit integrity and reliability. Excellent tracking characteristics are enhanced by depositing all resistors at one time on the selected glass substrate. Multilayer packaging techniques assure environmental protection. Networks are used in precision attenuators, voltage dividers, filter networks, measurement bridges, digital-to-analog converters, voice coding circuits and many other electronic circuits requiring resistors with close tolerances and low temperature coefficients. **Type FN111**—10-bit binary array for use with Fairchild μA722 integrated circuit. **Type FN112**—3-place BCD array for use with Fairchild μA722 integrated circuit. **Types FN114** (12-bit), **FN123** (10-bit), **FN125** (10-bit), **FN131** (10-bit), **FN132** (13-bit), **FN160** (10-bit)—R/2R Voltage ladders. Operate from −55° C to +125° C. Full scale accuracy, ± ½ LSB. **Types FN129** (12-bit) and **FN130** (12-bit)—1-2-4-8-BCD code ladder networks. Operate from −55° C to +125° C. Full scale accuracy, ± ½ LSB. **Type FN207**—Voltage divider network. The 1K ohm (R1) resistor has an absolute tolerance of ±0.05% at 25° C and all remaining resistors are ratio matched to it to ±0.01% at 25° C. All resistors have temperature coefficient of resistance of 25 ppm/° C and a temperature coefficient of resistance tracking of 5 ppm/° C. **Type FN215**—Precision resistor array designed to work with Fairchild Semiconductor's μA9650 integrated circuit to form an A/D-D/A converter up to 12 bits. Resistor specifications agree with Fairchild Semiconductor's μA9650 data sheet, providing network performance necessary for converters up to 12 bits. **Types FN226 and FN227**—Precision resistor arrays specially designed to work with Intersil's ICL8018, ICL8019, and ICL8020 integrated circuits to form a D/A converter up to 12 bits. **FN226** contains the necessary resistors for an 8 bit converter. **FN227** contains additional resistors which, when combined with an FN226, provides full 12 bit D/A conversion.

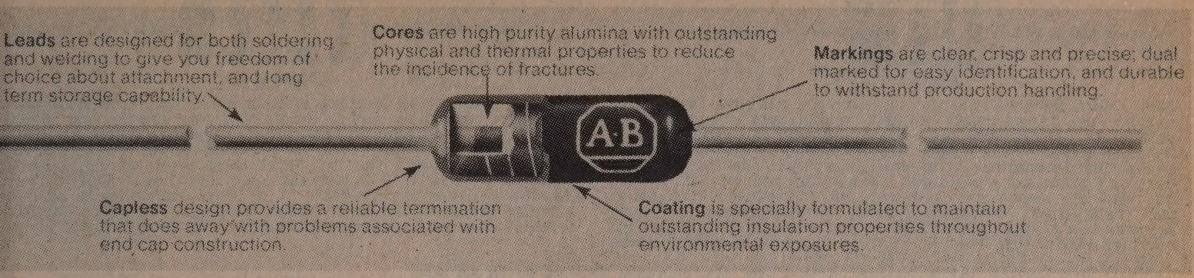
ALLEN-BRADLEY Cermet Resistors

TYPES CC/RN55D CERMET FILM FIXED RESISTORS



Leads are designed for both soldering and welding to give you freedom of choice about attachment, and long term storage capability.
Cores are high purity alumina with outstanding physical and thermal properties to reduce the incidence of fractures.
Markings are clear, crisp and precise; dual marked for easy identification, and durable to withstand production handling.
Capless design provides a reliable termination that does away with problems associated with end cap construction.
Coating is specially formulated to maintain outstanding insulation properties throughout environmental exposures.

- Values from 10 ohms to 10 megohms
- Multiple wattage ratings
  - ⅛ W at 125° C
  - ¼ W at 70° C
  - ½ W at 70° C
- 1% Tolerance
- Dual resistance marking
- Available off-the-shelf

Superior performance levels substantially better than the MIL-R-39017 specification. Capless construction provides reliable interconnection without end-cap problems. The high strength, high purity alumina core produces superior thermal characteristics with low hot-spot temperature, and reduces danger of catastrophic failures caused by hairline fractures. Markings are clear and crisp, dual marked for easy identification and durable to withstand production handling. Withstands high overloads and repeated thermal shock. May be used in ½ Watt applications where maximum voltage is limited to 250 volts. Temperature coefficient: 100 ppm/°C.

REEL-PACKAGED CERMET FILM RESISTORS

Allen-Bradley cermet film resistors are available in both body-taped and double-lead taped reels at additional charge as indicated; the charge for the reel is the same whether or not the reel is full. Quantities available only in multiples of 100 pieces above minimum. Note—Long-term storage of reel-packaged resistors is not recommended due to normal aging of the adhesive.

A-B Type	MIL-R-10509F	Min. Order Qty.	Max. No. per reel	Added Charge per reel
BODY TAPED				
CC	RN55D	1000	2500	$1.25

Style and Size	**Characteristic** D = +200, −500 ppm/° C D = ±100 ppm/° C For Allen-Bradley	**Resistance Value** First three digits are significant, 4th digit "number of zeros." 1962 = 19,600 ohms For values below 100 ohms, the letter R represents the decimal point, with all digits significant. 19R6 = 19.6 ohms	**Tolerance** F = ±1%

ALLEN-BRADLEY

HOT-MOLDED FIXED COMPOSITION RESISTORS

INDUSTRIAL GRADE AND MIL-R-11 STYLES RC AND RCR

Style RC

Style RCR

Hot-molded fixed composition resistors are designed for general purpose use in electronic equipment, and are unequalled for uniformity, predictable performance, appearance and freedom from catastrophic failure when used according to published ratings and recommendations. Allen-Bradley resistors are formed with heat and pressure by a unique hot-molding process. They start out physically strong, more uniform, more consistent and stay that way installed in the circuit. The tightly compressed resistance material has a large cross-section resulting in low current density and high overload capacity. The uniformity of the material reduces hot spots and noise. Because of their small size, consistent performance, ruggedness and moderate cost, they are the first choice for military, industrial and consumer product applications. Style RCR resistors not only meet all requirements of MIL-R-39008, but also far exceed the "S" level (best level) of Established Reliability of 0.001% failure rate per 1000 hours. Only Allen-Bradley resistors are available in "S" level reliability in all five wattage sizes over the entire resistance range. The "S" reliability level is indicated by a yellow 5th color band on the resistor body.

REEL-PACKAGED FIXED COMPOSITION RESISTORS

Allen-Bradley resistors are available in both body taped and double-lead taped reels at additional charge as indicated; charge for the reel is the same whether or not the reel is full. Quantities available only in multiples of 100 pieces above minimum. **Note**—Long-term storage of reel-packaged resistors is not recommended, due to normal adhesive aging.

HOW TO ORDER

INDUSTRIAL GRADE

EB (A) 514 (C) 5 (D)

MIL-R-11 STYLE RC

RC20 (A) GF (B) 514 (C) J (D)

MIL-R-39008 STYLE RCR

RCR05 (A) G (B) 514 (C) J (D) S (E)

(A) A-B Type No. or MIL Style No.

A-B Type	MIL-R-11 Style	MIL-R-39008 Style	Rating, Watts
BB	RC05	RCR05	⅛
CB	RC07	RCR07	¼
EB	RC20	RCR20	½
GB	RC32	RCR32	1
HB	RC42	RCR42	2

(B) For MIL types only; maximum ambient temperature and resistance-temperature characteristic per MIL-R-11 or MIL-R-39008. See Allen-Bradley **Publication EC21** for actual performance limits.

(C) Three-digit number represents resistance. First two digits are significant figures, third is number of zeros that follow. **For values less than 10 ohms:** Industrial Grade; substitute **G** for third digit, making desired resistance value the first two digits multiplied by 0.1—e.g., **27G**=2.7 ohms; for MIL-R-11 and MIL-R-39008 substitute **R** for decimal point—e.g., **2R7**=2.7 ohms.

(D) Tolerance: Code for ±5% is **5** for Industrial Grade, **J** for MIL types; ±10% is **1** for Industrial Grade, **K** for MIL types.

(E) MIL-R-39008 resistors only; expresses Failure Rate Level at 50% rated wattage in % per 1,000 hours: M=1.0%, P=0.1%, R=0.01%, S=0.001%. Available only in "S" level.

THICK FILM RESISTOR NETWORKS

The following resistor networks feature reduced PC board space; compatibility with automatic insertion equipment; uniform performance characteristics and compatibility with IC logic circuit environments. Molded epoxy body with tin plated copper alloy leads. Lead solderability meets requirements of MIL-STD-202E, Method 208; MIL-STD-883, Method 2003 and MIL-R-83401. Resistance Tolerance: ±2%. Operating Temperature Range: −55° C to +125° C Resistance TC: ±100 ppm/° C max.

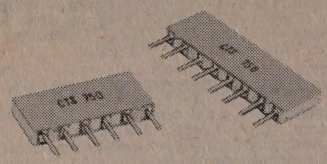
CTS Resistor Networks

SERIES 750 SINGLE-IN-LINE CERMET RESISTOR NETWORKS



Low profile, space-saving single-in-line cermet resistor networks are specifically designed to save space. Feature ultra high stability and reliability, four standard SIP configurations, automatic insertion capabilities. Compact edge-mount modules have thick-film cermet resistors. Lead spacing is on .100″ centers. **Resistance Range:** Shown in table. **Tolerance:** ± 2%. **Resistor Material:** Cermet. **Substrate Material:** Alumina. **Lead Pull Strength:** 5 lbs. **Power Rating:** Watts, 6 pin, .9 watt at 70° C per module; 8 pin, 1.1 watt at 70° C per module. **Size:** 6 pin, .578″ w. x .080″ thick x .242″ h., terminal length, .100″; 8 pin, same, except .778″ wide.

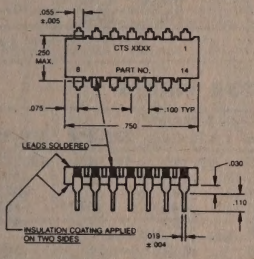
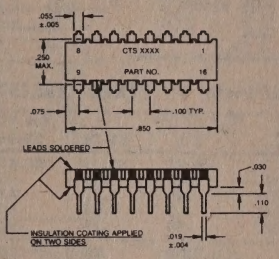
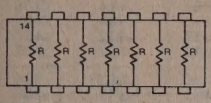
14 Pin

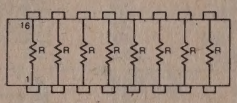


16 Pin



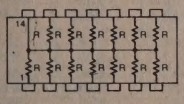


760-3-R 14 Pin-7 Resis.

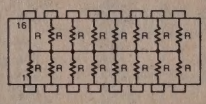


761-3-R 16 Pin-8 Resis.

Applications: "Wired OR" pull-up; power driver pull-up; power gate pull-up; line termination; long-line impedance balancing; LED current limiting; ECL output pull-down resistors; TTL input pull-down.

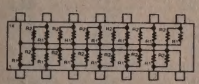


760-1-R 14 Pin-13 Resis.

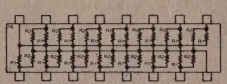


761-1-R 16 Pin-15 Resis.

Applications: MOS/ROM pull-up/pull-down; open collector pull-up; "wired OR" pull-up; power driver pull-up; high speed parallel pull-up. TTL unused gate pull-up; TTL input pull-down; digital pulse squaring.

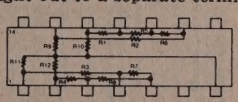


760-5-R 14 Pin-24 Resis.



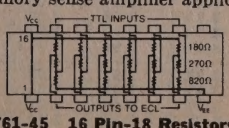
761-5-R 16 Pin-28 Resis.

Applications: Pulse squaring TTL terminators. CTS 760-5 and CTS 761-5 networks consist of two resistor pairs of above value combinations. Resistors are connected together in series with common line for power and common line for ground. Junction of each pair is brought out to a separate terminal.



760-19 14 Pin-12 Resistors

Interface Network: CTS 760-19 resistor network provides compatible interfacing with the μA711 dual differential voltage comparator for core memory sense amplifier applications.



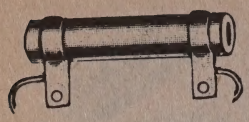
761-45 16 Pin-18 Resistors

TTL to ECL Translator: CTS 761-45 network consists of 18 resistors internally divided into six identical three-resistor sections for direct translation from TTL to ECL language.

CTS No.	Description	Net Each, Lots of 1-99	100-499	500-999
760-1-R	14 Pin DIP, 13 resistors	$1.45	$1.12	$0.91
760-3-R	14 Pin DIP, 7 resistors	1.25	.99	.74
760-5-R	14 Pin DIP, 24 resistors	2.50	2.00	1.75
760-19-R	14 Pin DIP, 12 resistors	2.20	1.78	1.55
761-1-R	16 Pin DIP, 15 resistors	1.52	1.18	1.02
761-3-R	16 Pin DIP, 8 resistors	1.31	1.04	.81
761-5-R	16 Pin DIP, 28 resistors	2.60	2.10	1.85
761-45-R	16 Pin DIP, 18 resistors	2.40	1.90	1.50

Clarostat Vitreous-Enamel Resistors

GREENOHM V™ FIXED POWER RESISTORS



Vitreous enamel, wire-wound power resistors are engineered to meet or exceed MIL-R-26 specifications. Wire windings are finest grade resistance alloy. Designed for utmost reliability and stability under adverse conditions. Teal green enamel finish withstands overheating without peeling or cracking. Tolerance, ±5% except values under 1 ohm, ±10%. VPR types (up to 20 watts) have wire lead and lug terminals, illustrated at left. VP and VK types (25 watts and up) have lug terminals, and mounting bracket. **Core Size:** VPR-5-F, 1″ x 5/16″ dia.; VPR-10-F, 1¾″ x 5/16″ dia.; VPR-20-H, 2″ x 7/16″ dia.; VP-25-K 2″ x 9/16″ dia.; VP-50-K, 4″ x 9/16″ dia.; VK-100-N, 6½″ x ¾″ dia.; VK-160-W, 8½″ x 1⅛″ dia.; VK-200-W, 10½″ x 1⅛″ dia.

AXIAL LEAD VITREOUS RESISTORS

Ideal for printed circuit, terminal board, and point-to-point wiring applications. Space-saving design, due to elimination of mounting brackets and terminal lugs. Standard resistance tolerance, ±5%. Designed for critical applications, providing high stability and reliability under widely variable environmental conditions. Finished in vitreous shade of teal green. Available in three sizes: 3, 5 or 10 watts. **Size:** VC3D, ¼" dia. x ½" long; VC5E, ⅜" dia. x 1" long; VC10F, 7/16" dia. x 1⅞" long. Leads 1½" long, .032" dia.

PRECISION MIL-R-55182

TC: 50 ppm/° C HH Series; 100 ppm/° C, HK Series. MIL-R-55182 parts receive a 100% overload and temperature cycle: Overload, 5 x rated wattage for 1 hour at 25° C; reject parts with combined ΔR > ±0.20%. At ΔR Max.: Shock and vibration, ±0.10%; moisture, ±0.4%. Load Life: Qualification R/2000 hrs. ±0.5%; R/10,000 hrs. ±2%. RN**C** copper lead material; direct one-way substitute for RN**R** lead type provided all other characteristics are equal or better. Tolerance of ±0.5% available; prices on request. MIL-R-55182 supersedes MIL-R-10509.

NYTRONICS, INC. Sage Resistors

TYPE S CONFORMAL SILICONE COATED POWER RESISTORS

Wire-wound power resistors in all-welded construction; encapsulated in high temperature silicone resin. Small size and high power rating combine with physical ruggedness. Inductive winding. **Reliability and Stability:** To 0.5% after 1000 hours cycled load life at Char. G power rating. Available to greater stability on special order. **Temperature Coefficient:** To ±20 ppm/° C. **Momentary Overload:** 10 times rated load for 5 seconds. **Shock and Vibration:** To 50 G and 2000 cps with normal lead wire mounting. Superior protection against thermal shock, altitude vibration, moisture and salt spray. **Dielectric:** 1000 V rms, except two smallest sizes, 500 V rms. **MIL Requirements:** Exceed electrical requirements of MIL-R-26E except for dielectric strength test on the two smallest units, cited above. **Leads:** Tinned copperweld standard: other weldable leads available at slightly higher price. **Tolerance:** ±1% standard; precision to ±.05% available on request. RW70 available in 1% only. Non-inductive windings also available on request; write for information.

MIL-R-26 TYPE DESIGNATIONS

Order by complete number consisting of three parts.

RW69: Body style.

V: Wattage rating in the table below at 350° C max.

471: Nominal resistance in ohms. Two significant digits plus third indicating number of zeros. Below 10 ohms resistance, second digit is decimal and last digit is significant.

Tolerance: ±5% for 1 ohm and up resistance; ±10% for less than 1 ohm.

Temperature Coefficient: ±260 ppm/° C for 20 ohms or more; ±400 ppm/° C for less than 20 ohms.

See following page for pricing.

Style		MIL Watts	Defined Ohmic Range*
MIL	Sage

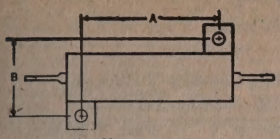
NYTRONICS, INC. Sage Resistors

TYPE "M" METAL-CLAD CHASSIS MOUNT RESISTORS



"M" Dimensions

Aluminum housed resistors mount directly to a plate for maximum heat dissipation. Improved potting technique affords better heat conduction and dissipation. Internal temperature rise is less than that available in similar "heat sink" resistors. This cooler hot-spot assures longer life, improved stability and greater reliability. After 1000 cycled hours (1½ hr. on, ½ hr. off) at recommended lead, typical resistance shift is 0.3% or less. Dielectric strength up to 2500 v. rms. Precision to 0.05%. Meet or exceed MIL-R-18546D requirements.

Style*		Watts		Size, In.		Resistance Range, Ohms

TYPE "C" CLIPPER METAL-SHEATHED RESISTORS

All welded construction with single layer wound on ceramic cores. Two fold increase in usable wattage over the free air rating when clip mounted to metal chassis. Physical ruggedness in handling and assembly. Ideal for severe vibration and shock applications. **Resistance Range:** 0.05 ohm to 250,000 ohms. **Tolerances:** 5%, 3%, 1%, .5%, .25%, .1%, .05%. **Temperature Coefficient:** ±20 ppm/° C for 20 ohms and up; ±50 ppm/° C for 5–20 ohms; ±80 ppm/° C for less than 5 ohms. **Dielectric Strength:** 1000 volts rms from element to outer case. Type C resistors come with regular inductive winding only.

SPRAGUE BLUE JACKET® AXIAL LEAD, POWER WIRE-WOUND RESISTORS

Axial design provides secure, vibration-proof mounting. Satisfies MIL specification performance requirements with 35% to 50% size reduction. Crazeproof, humidity-proof, corrosion-proof enamel coating prevents failure from electrolysis. Ceramic winding core and coating enamel withstand rapid thermal changes. Hot spot rating: 300° C rise above 40° C ambient temperature. Size, 1/8" dia. x 3/8" lg., Type 239E; 3/16" dia. x 3/8" lg., Type 240E; 13/64" dia. x 17/32" lg., Type 242E; 13/64" dia. x 15/16" lg., Type 243E; 5/16" dia. x 1 1/8" lg., Type 244E; 5/16" dia. x 1 1/4" lg., Type 247E. **Standard Tolerance:** ±5%.

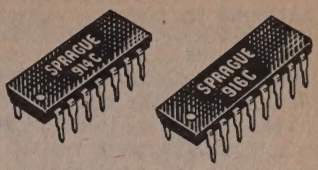
SPRAGUE Metanet® Precision Resistor Networks

TYPE 914C, 916C DUAL-INLINE PACKAGE RESISTOR NETWORKS

Designed for use in signal and data processing applications where repetitive resistance values and patterns are required. Come in dual-in-line packages compatible with IC's and include up to 28 metal-film resistors on single ceramic base. **Tolerance:** ±5%. **Operating Temperature Range:** −55° C to +70° C. **Temperature Coefficient:** Within 350 ppm/° C typical. **Tracking Between Resistors:** ±50 ppm/° C. **Continuous Power Dissipation:** 914C, 3 watts; 916C, 3.5 watts; both at 25° C. Derating is linear to 150° C.



PULL-UP/PULL-DOWN INTERFACE NETWORKS

Prices shown are for 14-pin networks. **For 16-pin networks,** add to prices shown: **$0.09** for 1–99; **$0.07** for 100–499; **$0.06** for 500–999; and **$0.05** for 1000–9999.

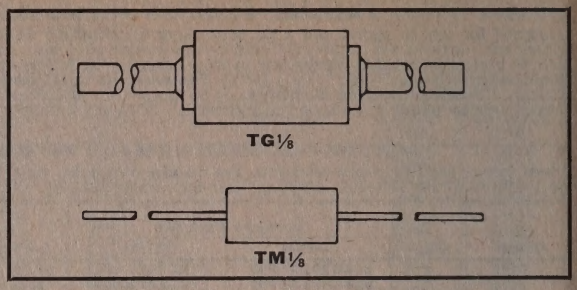
SENSISTOR® SOLID STATE TEMPERATURE SENSING SILICON RESISTORS

- DESIGNED TO MEET OR EXCEED ALL ELECTRICAL REQUIREMENTS OF MIL-T-23648 FOR POSITIVE-TC THERMISTORS
- TG⅛ ELECTRICALLY EQUIVALENT TO RTH42
- TM⅛ ELECTRICALLY EQUIVALENT TO RTH22
- AVERAGE POSITIVE TC OF +0.7%/°C (+7,000 ppm)
- RTH22 MIL-APPROVED TYPE
- RTH42 MIL-APPROVED TYPE



MECHANICAL DATA

TG⅛ resistor encapsulated in hard-glass hermetically sealed package (0.105″ dia. x 0.300″ l.) with welded unborated solder-coated dumet leads. TM⅛ (0.155″ dia. x 0.420″ l.) resistor encapsulated in molded package with solder-coated copper leads. A-nickel leads or gold plated A-nickel leads are also available upon request.

MAXIMUM RATINGS

Power Dissipation at Ambient Temperature: TG⅛ 300 mW at or below 25° C, 125 mW at 100° C (see Figure 1). TM⅛ 125 mW at or below 100° C (see Figure 2). Operating Ambient Temperature Range: −55° C to +125° C. Storage Temperature Range: −65° C to +150° C.

ELECTRICAL AND THERMAL CHARACTERISTICS

TI Type	Zero-Power Resistance Ratio $R_{25°C}/R_{125°C}$	Thermal Time Constant	
		Typical	Maximum
TG⅛	0.55 ±15%	35 s	60 s
TM⅛	0.55 ±15%	35 s	40 s

Factors for determining nominal resistance at various temperatures.

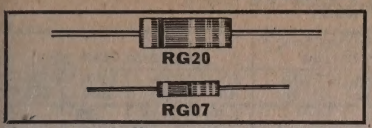
PRECISION AND SEMI-PRECISION METAL GLAZE RESISTORS



Unique thick-film resistance element of metallic alloys fused to crystalline ceramic core for excellent combination of economy, stability, and precision. RG⅛, RG¼, RG2 meet or exceed all MIL-R-11 requirements; RG07, RG20, RG32 and RG42 meet or exceed MIL-R-22684 and MIL-R-39017 requirements: TO-55, TO-60, TO-65, T2-55, T2-60 and T2-65 meet or exceed MIL-R-10509F requirements, Char. D; RGR established reliability resistors meet or exceed MIL-R-39017A, established reliability specifications. IRC Metal Glaze is up to 100 times thicker than conventional films for mechanical and electric ruggedness. **Type RG1/8:** MIL style RC05 Rated ⅛ W at 70° C ambient; 200 V max. continuous. Temperature coefficient: 500 ppm/° C max. Size: .150″ lg. x .063″ dia. **Type RG1/4:** MIL style RC07. Rated ¼ W at 70° C ambient, ½ W at 70° C commercial; 250 V max. continuous. Temp. coefficient: 400 ppm/° C max. Size: .25″ lg. x .090″ dia. **Type RG2:** MIL style RC42. Rated 2 W at 70° C ambient; 500 V max. cont. Temp. coefficient: 250 ppm/° C max. Size: .688″ lg. x .318″ dia. **Type RG07:** MIL style RL07. Rated ¼ W at 70° C ambient; 250 V max. continuous. Size: .250″ lg. x .090″ dia. **Type RG20:** MIL style RL20. Rated ½ W at 70° C ambient; 350 V max. continuous. Size: .390″ lg. x .140″ dia. **Type RG32:** MIL style RL32. Rated 1 W at 70° C ambient; 500 V max. continuous. Size: .562″ lg. x .190″ dia. **Type RG42:** MIL style RL42. Rated 2 W at 70° C ambient; 500 V max. continuous. Size: .688″ lg. x .318″ dia. **Type TO-55:** MIL style RN55D. Rated ¼ W at 70° C ambient; 250 V max. continuous. Temperature coefficient: 100 ppm/° C max. Size: .250″ lg. x .090″ dia. **Type TO-60:** MIL style RN60D. Rated ½ W at 70° C ambient; 350 V max. continuous. Temperature coefficient: 100 ppm/° C max. Size: .390″ lg. x .140″ dia. **Type TO-65:** MIL style RN65D. Rated 1 W at 70° C ambient; 350 V max. continuous. Temperature coefficient: 100 ppm/° C max. Size: .562″ lg. x .190″ dia. **Type T2-55:** MIL style RN55C. Rated ¼ W at 70° C ambient; 250 V max. continuous. Temperature coefficient: 50 ppm/° C max. Size: .250″ lg. x .090″ dia. **Type T2-60:** MIL style RN60C. Rated ½ W at 70° C ambient; 350 V max. continuous. Temperature coefficient: 50 ppm/° C ambient. Size: .390″ lg. x .140″ dia. **Type T2-65:** MIL style RN65C. Rated 1 W at 70° C ambient; 350 V max. continuous. Temperature coefficient: 50 ppm/° C ambient. Size: .562″ lg. x .190″ dia. **Type RGR07:** MIL style RLR07. Rated ¼ W at 70° C ambient; 250 V max. continuous. **Type RGR20:** MIL style RLR20. Rated ½ W at 70° C ambient; 350 V max. continuous. **Type RGR32:** MIL style RLR32. Rated 1 W at 70° C ambient; 500 V max. continuous. **Type RGR42:** MIL style RLR42. Rated 2 W at 70° C ambient; 500 V max. continuous.

Temperature coefficient for all MIL-R-22684 and MIL-R-39017 types is 200 ppm/° C max.

#Body type C; all others M. †Metal film type; all others metal glaze.

FREQUENCY RESPONSE

TRW/IRC Metal Film resistors demonstrate high frequency response which is essentially flat to 5 MHz. Non-helixed units are available for applications employing higher frequencies, on special order.

LOAD STABILITY

The ΔR due to operation at rated load for 1000 hours is typically less than ±0.1%. Special pre-conditioning (Burn-In, Temperature Cycling, etc.) is available to meet customer specifications.

TEMPERATURE COEFFICIENTS

High stability Metal Film resistors are available in the following temperature coefficients.

MIL-R-10509 Char.	TRW TC Code	Temperature Coefficient†	Temperature Span
D*	T0	0 ± 100 ppm/° C	−55° C to +165° C
C*	T2	0 ± 50 ppm/° C	−55° C to +175° C
E*	T9	0 ± 25 ppm/° C	−55° C to +175° C

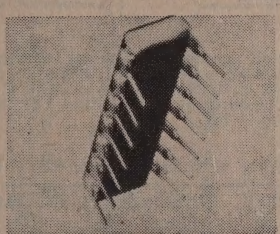
Carry full power even at 125° C ambients permitting expanded circuit design limits. Meet MIL-R-26E, Char. V with allowable 350° C hot spot (well above customary 250–275° C for similar units). Construction features exclusive silicone formulation Pro-Coat for high heat capability, high dielectric strength and toughness. Special resistance wire is low-tension wound on selected JAN-I-10, Grade L-4 ceramic tubes; welded to terminal cap which is welded to alloy-coated leads for full wetting and fast soldering. **Temperature Coefficient:** Less than ±20 ppm/° C. Ayrton-Perry non-inductive windings available; details on request. **Tolerance:** ±1%, ±3%, ±5% commercial; ±5% MIL, standard. Other tolerances available on request.

Type AS-½: Rated ½ watt at 125° C; 1 watt at 25° C; 100 V max. continuous working voltage. Size: .312″ lg. x .062″ O.D. **Type AS-1:** MIL Type RW70U. Rated 1 watt at 125° C; 1 watt char. U; 130 V max. cont. working voltage. Size: .375″ lg. x .093″ dia. **Type AS-2:** MIL Type RW79U, 69 V. Rated 2 watts commercial at 125° C, 3 watts Char. U and V at 25° C; 140 V max. continuous working voltage. Size: .500″ lg. x .218″ O.D. **Type AS-3:** Rated 3 watts at 125° C; 5 watts at 25° C; 200 V max. continuous working voltage. Size: .687″ lg. x .250″ O.D. **Type AS-5:** MIL Type RW74U, 67V. Rated 5 watts Char. U, 6.5 watts Char. V at 25° C; 7 watts commercial at 25° C; 400 V max. continuous working voltage. Size: .875″ lg. x .312″ O.D. **Type AS-7:** Rated 7 watts at 125° C; 9 watts at 25° C; 600 V max. continuous working voltage. Size: 1.250″ lg. x .312″ O.D. **Type AS-10:** MIL Type RW78U, RW68V. Rated 10 watts at 125° C, 10 watts Char. U, 11 watts Char. V, 14 watts commercial at 25° C; 1000 V max. continuous working voltage. Size: 1.812″ lg. x .375″ O.D.

SEMIPRECISION RESISTOR NETWORKS



TRW/IRC resistor networks utilize resistance film deposited on an alumina ceramic substrate. Units are epoxy molded in standard DIP 14- or 16-pin packages. Applications include: pull-ups, pull-downs, line terminators, ladder networks, attenuators, current limiting and any circuit requiring high volume usage of a given resistance value.

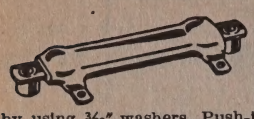
WARD LEONARD RESISTORS

STRIPOHM RESISTORS



Vitrohm® construction, but flat design for use where allowable space for component mounting is extremely limited. Strip shape, low silhouette mounting and terminal arrangement permits extra space saving. Suitable for multiple stacking by using 3/32" washers. Push-in type mounting brackets are supplied. Wattage Ratings of 10, 15 and 20 watt sizes mounted in standard brackets based on a "free air" temperature rise of 300° C, in a 40° C ambient max. Ratings of larger sizes with standard mounting brackets are based on resistors mounted horizontally on a vertical steel plate (10" x 10" x 0.04") in "free air" having an ambient temperature not over 40° C. **Tolerance:** ±5%.

Rugged construction has high quality ceramic core and vitreous enamel coating overall. Axial leads are hot tin dipped and permanently anchored. Ratings are based on 325° C max. "free air" temperature rise in ambient temperature not exceeding 25° C. Standard tolerance, ±5%.

WARD LEONARD RESISTORS

VITROHM® FIXED AND ADJUSTOHM® ADJUSTABLE RESISTORS

Vitrohm Resistors feature ceramic cores, resistance wire with a low-temperature coefficient of resistivity and a vitreous enamel coating developed by Ward Leonard for toughness, hardness, moisture and acid resistance, and good heat conductance. Terminals are tightly clamped to the core and spot-welded. Resistance wire is secured to terminal band by silver-brazing or spot welding. ADJUSTOHM resistors are furnished with one screw-driver type adjustable band terminal. Mounting brackets furnished with all resistors, except 5F, 10F and 20F, furnished only on request. **Tolerances:** Fixed, ±5%; adjustable, +10%, −5% (entire resistor less band). **Stock Values On Request.**

MIL-C-39014B TYPE CKR11, CKR12, CKR14, CKR15 AND CKR16 AXIAL LEAD CAPACITORS

Available at 50 or 100 volt rating with transfer molded cases. Come with oxygen free copper leads. Designed to MIL-STD-1276 type C. **Prices on request.**

CKR05-CKR06 HIGH RELIABILITY CERAMICS

MIL-C-39014 high reliability version of units listed as CK05-CK06, etc. in MIL-C-11015. Complete the part number by adding suffix for required failure rate: **L** (2.0%), **M** (1.0%), **P** (0.1%), **R** (0.01%) or **S** (0.001%).

TYPE CKR05

Rated 200 WVDC, 10 thru 1000 pF; 100 WVDC, 1200 thru 10,000 pF; 50 WVDC, 12,000 pF up.

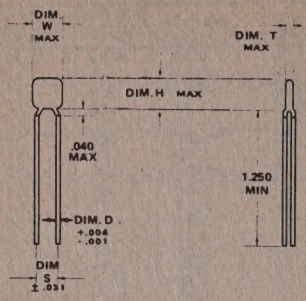
Arco Ceramic Capacitors

TYPE MCG, MCA AND MCY
MONOLITHIC CERAMIC CAPACITORS



Arco offers three different versions of monolithic ceramic capacitors. General purpose Type MCG are designed for extremely high volumetric efficiency. Type MCA offer high stability while Type MCY offer high stability and miniature size. **Capacitance Range:** Type MCG, .01 μF to 4.7 μF; Type MCA, 2.7 pF to .047 μF; Type MCY, 10 pF to .47 μF. **Operating Temperature Range:** MCG, +10° C to +85° C; MCA, −55° C to +125° C; MCY −55° C to +125° C. **Temperature Characteristics:** MCG, +22% −56%; MCA, 0 ±30 ppm/° C; MCY, ±15%. **Voltage Ratings:** MCG, 100 and 50 VDC; MCA, 100 VDC; MCY, 100 and 50 VDC. **Lead Material:** Solder coated copper.

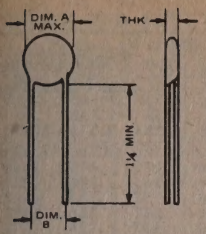
CERAMIC DISC AND RADIAL LEAD ALUMINUM CAPACITORS

CERAMIC DISC CAPACITORS



Ceramic disc capacitors exhibit a level of performance and reliability consistent with modern design techniques. Available in high (1000 VDC) and low (50 and 100 VDC) voltage ratings. Higher voltage ratings improve reliability and provide extra reserve for resistance to surges and temporary overloads. Rugged phenolic coating and high temperature wax impregnation give superior moisture resistance and physical strength.

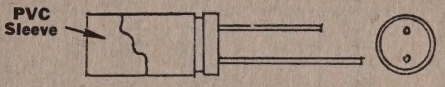
RADIAL LEAD MINIATURE ALUMINUM CAPACITORS



Ideal for both transistor and electronic tube circuits. **Operating Temperature:** −25° C to +85° C. **Tolerance:** Less than 5 μF, −0 +15%; 5 μF or over, −0 +100%. Leads can withstand up to four bends.

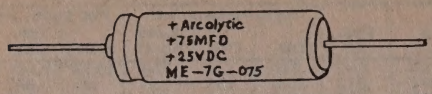
AXIAL LEAD MINIATURE ALUMINUM ELECTROLYTIC CAPACITORS

TYPE ME MINIATURE ALUMINUM ELECTROLYTIC CAPACITORS



Type ME electrolytic capacitors designed for transistorized circuitry featuring low voltages and compactness of structure. All welded construction provides increased ruggedness and resistance to environmental extremes. **Tolerance:** −10%, +100%. **Operating Temperature:** −30° C to +85° C. **Leads:** Axial 1¼" length minimum, #20 or #22 tinted copper depending on case size. All units are insulated with plastic sleeve permanently bonded to aluminum body.

Arco Film Capacitors

TYPE DP MYLAR® AND MYLAR PAPER CAPACITORS

Designed for use in a variety of circuits ranging from TV bypass to critical industrial applications requiring stringent electrical and environmental characteristics. Non-inductively wound and vacuum dipped to obtain solid impregnation and rugged moisture-resistant coat. Special winding design provides insulation resistance comparable to competitive polyester film units. High reliability maintained in constant operation at 125° C at full rated voltage (derating required at higher temperatures). Miniaturized for transistor circuitry yet compare favorably in price with commercial general purpose units. Crimped radial leads to facilitate use in printed circuits. Leads are tinned copper clad steel. #20 gauge and 1⅝" lg. min. below the crimp. Standard tolerance, ±10%; ±5%, 2% and 1% available. ®Reg. DuPont TM.

100 WVDC

Pure Mylar dielectric; derate 1%/°C over 85° C.

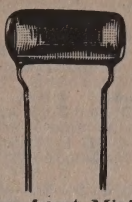
PRECISION DIPPED MYLAR* TUBULARS



Precision dipped tubular capacitors that combine missile and computer quality with radio-TV cost. Type MD (100 WVDC) have Mylar dielectric; Type MPD (200, 400 and 600 WVDC) have Mylar-paper dielectric. Non-inductively wound and vacuum dipped to obtain solid impregnation and a rugged, moisture-proof coat. Miniaturized for transistor circuitry. Offer high reliability in operation at 125° C without derating. Case dimensions similar to the Elmenco Type DP capacitors described elsewhere. **Tolerance:** ±10%; available in ±5%, ±2% and ±1%. *Registered DuPont trademark.

Arco Dur-Mica Capacitors

TYPE ADM DIPPED SILVERED MICA CAPACITORS

Highly reliable, compact silvered mica capacitors coated for maximum protection against moisture and temperature extremes. Meet or exceed MIL-C-5D and EIA standards for fixed mica capacitors. **Operating Temperature Range:** −55° C to +150° C. **Type DM:** Per MIL-C-5D. **Type SCDM:** Single coat of resin; thinner than regular DM-10's and DM-15's. To order, use prefix **SC. Tolerances Available:** ±10%, ±5%, ±2%, ±1%, ±½%, ±0.5 pF and ±1.0 pF. Prices are for ±5% tolerance (suffix **J**) unless otherwise noted. **Working Voltage:** As shown; MIL-C-5D indicated by sixth character in MIL number (e.g., CM05CD060D03): A=100, C=300, and D=500 WVDC.

TRIMMER AND PADDER CAPACITORS

TRIMMERS

All types 175 WVDC, 350 VDCT.

Type 40: Miniature, ⅜" x ⅛". **Type 42:** Midget, ⅜" x ¾". **Type 46:** Standard, ¾" x ⅝". India ruby mica. Ceramic base.

Note: Type 46 trimmer assembly with mtg. bracket and adjusting shaft for ease of tuning is also available. Add prefix **"S"** to trimmer number; prices on request. Type 40, 42 and 46 also available as printed circuit trimmers. Add prefix **"PC"** to trimmer number; prices available on request.

PADDERS

Type 30, 30-M: ⅞" x 15/16". "30" is 250 WVDC, 500 VDCT; "30-M", 500 WVDC, 1000 VDCT.

Note: Type 30 (300 series) or Type 30-M (300-M series) padders are available with special adjusting screw to accommodate a tuning knob. Add prefix **"L"** to padder number. Prices available on request.

Arco PRECISION POLYSTYRENE CAPACITORS

TYPE ARC COMPUTER GRADE ELECTROLYTIC CAPACITORS

Designed for use in computers, power supply filters, industrial controls, welders, photo flash energy storage, or any other application where high reliability, heavy duty electrolytic capacitors are required. Type ARC capacitors are designed to operate at full rated voltage in ambient temperatures of 85° C continuously with maximum AC ripple current applied. Connections are two aluminum terminals molded in place and tapped for 10-32 screws. The cover is sealed with a rubber gasket crimped in place. A PVC sleeve rated at over 3000 volts insulates the outer shell. **Operating Temperature:** −40° C to +85° C. **Storage Temperature:** −60° C to +85° C. **DC Leakage Current:** Less than .005 x CV. **Tolerance:** 5 to 50 VDCW, −10% +100%; 51 to 100 VDCW, −10% +75%.

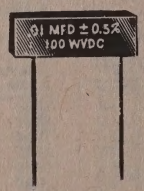
TYPE PE POLYSTYRENE CAPACITORS

Capacitance Range: .001–.01 μF (lower and higher values available). **Tolerance:** ±1% and ±5%. **Voltage Rating:** 100 WVDC. **Insulation Resistance:** 10^{13} ohms min. at 25° C. -10^{12} ohms min. at 85° C. **Dissipation Factor:** .0001% max. at 25° C; −.02% max. at 85° C. **Dielectric Absorption:** 0.05% max. at all temperatures. **Temperature Coefficient:** −190, ±30 ppm/° C. **Stability:** ±0.1% max. drift under fixed or variable operating conditions within specified max. limits.



These capacitors are available in any capacitance value from 1000 to 10,000 pF, and any tolerances as close as ±0.1% can be supplied. Consult factory for availability and prices.

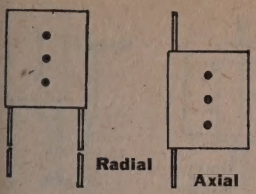
NOTE: Peak voltage for capacity values from .0001 μF to .04 μF is 500 volts. From .05 μF to 1.0 μF is 300 volts.

Tantalum Capacitors

MINITAN® MODULAR MM SERIES SUBMINIATURE SOLID TANTALUM CAPACITORS



Precision subminiature polar capacitors suitable for general filtering, coupling, bypassing and non-critical RC timing applications. Very favorable capacitance-to-volume ratio makes units ideal for use in high-density applications such as found in avionics systems, subminiature communications equipment and thick-film circuitry. **Temperature Range:** −55° C to +85° C without derating; to +125° C if WVDC derated to ⅔. **ORDERING INFORMATION:** Price table below is keyed to case size; also see Part Number Breakdown Chart. **Lead Configuration:** Add suffix **A** for axial leads; add suffix **R** for radial leads. **Tolerance:** Add suffix **-20** for ±20%; suffix **-10** for ±10%; suffix **-05** for ±5%. Only standard tolerance capacitors are stock items, others are special order only; 10% decade values are available in ±5% and ±10% tolerances. **Example:** Part No. **MMF-035-104-A-10** indicates a 35 V, 0.1 μF axial capacitor, case F, ±10% tolerance; complete Part No. must include Basic Part No. and both Lead and Tolerance suffixes. Capacitance and dissipation factor (DF) measured at 25° C, 120 Hz; DC leakage measured at 25° C.

PART NUMBER BREAKDOWN CHART

MMF -035 -105 -A -10

Ⓐ Ⓑ Ⓒ Ⓓ Ⓔ

Ⓐ **Case Size**—W, U, F, M L, S or J as required; pricing is keyed to case size.

Ⓑ **Rated Voltage**—voltage preceded by number of zeros to total three digits.

Ⓒ **Capacitance**—First two digits are significant figures, last digit is the power of 10 (or the number of zeros) of the multiplier; all values measured in pF.

Ⓓ **Lead Configuration**—"A" indicates axial leads, "R" indicates radial leads.

Ⓔ **Tolerance**—Suffix "-20" for ±20%; "-10" for ±10%; "-05" for ±5%. Only indicated standard tolerances are stock items; all others are special order only.

Tantalum Capacitors

MINITAN® CORDWOOD MZ SERIES SUBMINIATURE SOLID TANTALUM CAPACITORS

Precision subminiature polar capacitors suitable for general filtering, coupling, bypassing and non-critical RC timing applications. Very favorable capacitance-to-volume ratio makes units especially well suited to high-density applications such as found in avionics systems, subminiature communications equipment and thick-film circuitry. **Temperature Range:** −55° C to +85° C without derating; derate WVDC linearly to ⅔ at +125° C. **ORDERING INFORMATION:** Price table below is keyed to case size; also see Part Number Breakdown Chart. **Lead Configuration:** Add suffix **A** for axial leads; add suffix **R** for radial leads. **Tolerance:** Add suffix **-20** for ±20%; suffix **-10** for ±10%; suffix **-05** for ±5%. Only standard tolerance capacitors are stock items, others are special order only; 10% decade values available in ±5% and ±10% tolerances. **Example:** Part No. **MZA-010-475-A-10** indicates a 10 V, 4.7 μF axial capacitor, case A, ±10% tolerance; complete Part No. must include Basic Part No. and both Lead and Tolerance suffixes. Capacitance and dissipation factor (DF) measured at 25° C, 120 Hz; DC leakage measured at 25° C.

PART NUMBER BREAKDOWN CHART

MZA	-010	-047	-A	-10
(A)	(B)	(C)	(D)	(E)

(A) **Case Size**—Y, P, B, A or G as required; pricing is keyed to case size.

(B) **Voltage Rating**—voltage preceded by number of zeros to total three digits.

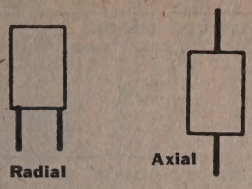
(C) **Capacitance**—First two digits are significant figures, last digit is number of zeros that follow (or the power of 10 of the multiplier); all values measured in pF.

(D) **Lead Configuration**—"A" indicates axial leads, "R" indicates radial leads.

(E) **Tolerance**—Suffix "-20" for ±20%; "-10" for ±10%; "-05" for ±5%. Only indicated standard tolerances are stock items; all others are special order only.

Tantalum Capacitors

MINITAN® MN SERIES SUBMINIATURE NONPOLAR SOLID TANTALUM CAPACITORS



Precision subminiature nonpolar capacitors suitable for general filtering, coupling, bypassing and noncritical RC timing applications. Specifically intended for those circuits where occasional or continuous voltage reversals occur. Very favorable capacitance-to-volume ratio makes them ideal for use in high-density applications such as found in avionics systems, subminiature communications equipment and thick-film circuitry. **Temperature Range:** −55° C to +85° C without derating; to +125° C if WVDC derated to ⅔. **ORDERING INFORMATION:** Price table below is keyed to case size; also see Part Number Breakdown Chart. **Lead Configuration:** Add suffix **A** for axial leads; add suffix **R** for radial leads. **Tolerance:** Add suffix **-20** for ±20%; suffix **-10** for ±20%; suffix **-05** for ±5%. Only standard tolerance capacitors are stock items; others are special order only; 10% decade values available in ±5% and ±10% tolerances. **Example:** Part No. **MNF-105-A-10** indicates a 1.0 μF axial capacitor, case F, ±10% tolerance; complete Part No. must include Basic Part No. and both Lead and Tolerance suffixes. Capacitance and dissipation factor (DF) measured at 25° C, 120 Hz; DC leakage measured at 25° C.

TYPE FAH COMPUTAMITE® COMPUTER GRADE CAPACITORS

Reliable, long-life units for power supply filtering, charge-discharge applications, and others requiring high mfd x volts per cubic inch. Hermetically sealed construction. High-gain, etched-foil sections easily meet shock and vibration tests of MIL-STD-202. Screw terminals. Plastic sleeve. **Operating Temperature:** −40° C to +85° C. **Tolerance:** 3–50 WVDC, −10% +100%; 51–350 WVDC, −10% +75%; 351–450 WVDC, −10 +50%.

TYPE UHL EXTENDED TEMPERATURE RANGE ALUMINUM ELECTROLYTICS

All-welded, polarized, etched foil aluminum electrolytic capacitors operate over temperature range of −55° to +125° C without derating. All aluminum for minimum weight, ideal for airborne and space applications. Dual voltage rated, allowing higher voltage operation at lower ambient temperature of +85° C. Maximum capacitance change at −55° C is −30%; at +125° C, +25%. Leads are #20 AWG, 1½" minimum. **Tolerance:** +75%, −10%. Also available to MIL-C-39018/01 spec., MIL styles CU12 and CU13.

5 WVDC AT 125° C—7 WVDC AT 85° C

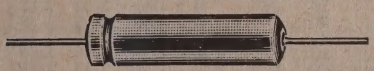
TYPE NLW SUBMINIATURE ALUMINUM ELECTROLYTIC CAPACITORS



Smallest subminiature electrolytic capacitors. Welded construction, hermetically sealed in an aluminum case and provided with plastic insulating sleeve. **Operating Range:** −40° to +105°C. **Tolerance:** −10%, +75%.

TYPE WBR WIDE-RANGE TUBULAR ELECTROLYTICS

Aluminum electrolytic capacitors feature welded termination; hermetically sealed, with highly etched cathode and anode foil. With flexible plastic sleeve. **Operating Temperature:** −40° C to +85° C, up to 450 V; to +65° C, up to 700 V.

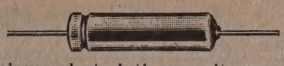
TYPE WHB COMPUTAMITE® COMPUTER GRADE CAPACITORS



All welded, aluminum electrolytic capacitors are miniature size and computer quality. Feature unique anode terminal and seal design. Long life, highly vibration resistant with low leakage current, high 120 Hz ripple currents. Standard WHB capacitors are polarized; semi-polarized or non-polarized available on request. Operating temperature −40° C to +85° C. **Tolerance:** Up to 75 WVDC, −10 +75%; above 75 WVDC, −10 +50%; closer tolerances available on request.

TYPE MPY TRI-CLAD® METALLIZED PAPER CAPACITORS

High quality metallized paper dielectric capacitor enclosed in CDE's Tri-Cad case: Cardboard backed with film and aluminum foil. Insures maximum moisture and humidity resistance and minimum size. Solid resin impregnated for optimum performance. Wax-free, non-leaking. Ideal replacement for metal or non-metal case tubular metallized capacitors. **Temperature Range:** −55° C to +125° C. **Tolerance:** ±20%.

TYPE WMF POLYESTER DIELECTRIC FILM-ENCASED CAPACITORS

Ultra-compact polyester dielectric in film wrap; thermosetting epoxy end seals. High resistance to humidity. Excellent stability.

Temp: −55° C to +85° C at full voltage: derate 10% at 100° C; 50% at 125° C. **Tol.:** ±10%. Other tolerances also available; prices on request.

TYPE MFP FLAT POLYESTER® WRAP CAPACITORS

Similar to type WMF capacitors but designed with a flat, pressed section to give an oval configuration. Polyester dielectric, tough outer film wrap and epoxy end seals. High resistance to humidity.

Operating Temperature: −55° C to +125° C; no derating at 85° C; derate 10% at 100° C; 50% at 125° C. **Tolerance:** ±10%, 50 WVDC; ±20%, all others. Other tolerances also available; prices on request.

50 WVDC, ±10% TOL.

TYPE MCR NON-INDUCTIVE FILM-WRAP METALLIZED POLYCARBONATE CAPACITORS

The film wrap epoxy end seal encasement offer superior moisture resistance and high operating temperature capacitance stability. Operating Temperature: −55° C to +125° C without voltage derating. Tolerance: ±20%. Capacitance Change: −2.5% +2% with reference to +25° C. Non-inductively wound.

TYPE NFR PI CIRCUIT—TUBULAR STYLE FILTERS

NFR tubular PI filters are designed for high attenuation of EMI over the ranges of 150 kHz to 10 GHz. Meet the performance requirements of MIL-F-15733. Can be used for a wide variety of EMC specifications. Designed for bulkhead, panel or chassis shielded mounting. When properly mounted, mutual coupling is eliminated. Case is grounded. Either terminal can be used for input or output connection.

CORNELL-DUBILIER APF Power Line Filters

A line of stock filters for most electro-magnetic interference (EMI) applications. For line-to-line and line-to-ground uses. **Rated Voltage:** 115–250 VAC, 50–60 Hz. **Tested Dielectric Strength:** 2100 VDC. **Leakage Current:** 0.5 mA at 115 VAC; 1.0 mA at 250 VAC. **Insertion Loss Curves:** Measured in 50-ohm system per MIL-STD-220. UL recognition for data processing. **Applications include:** business machines, office machines, copy machines, computer systems, calculators, disc drives, printers, tape drives, microwave ovens, plus other major uses.

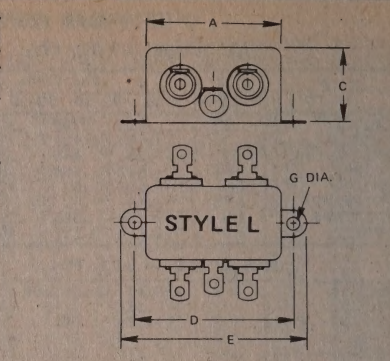
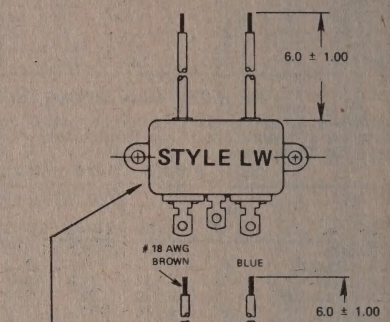
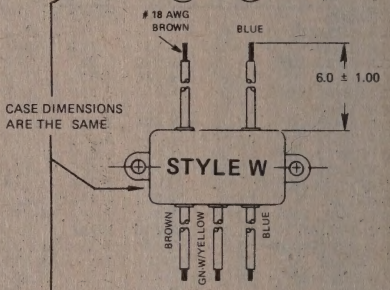
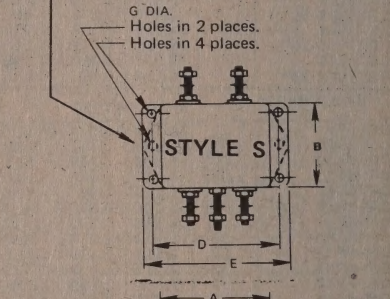
*For low-frequency applications.

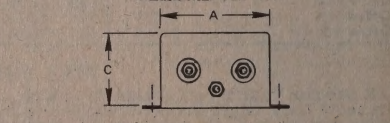




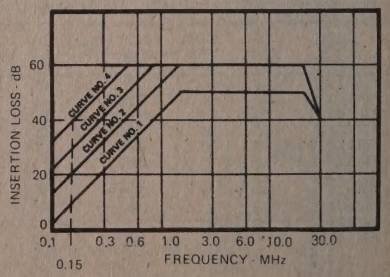


CASE DIMENSIONS ARE THE SAME





TYPICAL INSERTION LOSS



APF FILTERS ALSO ARE STOCKED IN AC POWER LINE CONNECTOR SERIES FOR USE WITH DETACHABLE THREE CONDUCTOR LINE CORDS.

CD6—CD42 DIPPED SILVERED MICAS

Range: −55° C to +125° C. **Temp. Characteristic:** Indicated by 3rd letter in number (e.g., CD10CD050D): C, ±200 ppm/° C (drift, ±0.5%); E, −20 to +100 ppm/° C (drift, ±sum of 0.1% and .1 pF); F, 0 to +70 ppm/° C (drift, ±sum of 0.05% and .1 pF). **Tolerance:** ±5% unless otherwise noted (many values available in ±20%, ±2%, ±1%). **Voltage:** 500 WVDC unless otherwise noted. For applications that need high stability, high Q, reliability, small size, protection against moisture and temperature extremes. **Note:** CD6 and CD7 types not available in MIL version.

LARGER QUANTITY DISCOUNTS AVAILABLE ON REQUEST

TYPE CAC CERAMIC CAPACITORS

TYPE CAC__X7R

Miniature, axial-lead, monolithic ceramic capacitors designed for commercial and industrial applications where space and weight are at a premium. Ideally suited for automatic insertion. **Temp. Coef.:** ±15% from −55° C to +125° C. **Capacity Tolerance:** K = ±10%, M = ±20%. **Dissipation Factor:** 2.5% max. **Ins. Res.:** 100,000 megs or 1000 megohm-microfarads, whichever is less. **WVDC:** 50 and 100 volts.

TYPE CAC02X7R

Size: .100″ dia. x .190″ lg.

CORNING® Glass Capacitors

TYPE CYR GLASS CAPACITORS

Fused monolithic construction provides excellent electrical performance, environmental immunity, stability and retraceability. Meets MIL-C-23269 requirements. Available in both axial and radial lead configurations. **WVDC:** 300 V and 500 V, −55° C to +125° C. **Temperature Coefficient:** +140 (±25) ppm/°C, max. deviation, 5 ppm. **Failure Rate (90% Confidence):** 2% in 1000 hours; 1% and .001% also available on request.

TYPE CYR10

MINIATURE BX CAPACITORS

Performance characteristics in accordance with MIL-C-11015. Exclusive glass-ceramic dielectric and unique manufacturing process assure true monolithic structure. Used in bypass, filter and coupling circuits, R-C networks; point of use filtering; suited for automatic insertion. **Temperature Range:** −55° C to +125° C. **Insulation Resistance:** 100,000 megohms or 1,000 megohm-microfarads, whichever is greater. **Dissipation Factor:** 2.5% max. **WVDC:** 50 and 100V. **Size:** CK12, .160″ lg. x .090″ dia.; CK13, .250″ lg. x .090″ dia.; CK14, .390″ lg. x .140″ dia. **Tolerance:** Suffix K, ±10%; M, ±20%.

CORNING® Glass Capacitors

CYFM GLASS CAPACITORS

Fusion-sealed, environment-proof capacitors have glass-to-metal seals at leads. Foil and glass element is frozen inside glass. Meet or exceed MIL-C-11272B requirements. Subjected to moisture resistance conditions of MIL-STD-202A, Method 106A for 1200 hours without failure or degradation. **WVDC:** 300 and 500 V, −55° C to +125° C. **Temperature Coefficient:** +140 (±25) ppm/° C at 100 kHz. Varies from +115 ppm/° C at −55° C to +165 ppm/° C at +125° C. Max. deviation, 5 ppm. Drift less than 0.1% or 0.1 pF, whichever is greater. **Tolerance:** Standard, ±5% or ±0.25 pF, whichever is greater; ±10%, ±2% and ±1% on request.

TYPE TYO GLASS CAPACITORS

Upright flush mounting in printed circuits with minimum rocking; or, point-to-point wiring. Glass dielectric and foil fused to form single element with high stability. Gold-plated 1¼″ Dumet leads spaced 0.2″. General performance to MIL-C-11272B. **WVDC:** 300 V, −55° C to +125° C. **Temperature Coefficient:** +140 (±25) ppm/° C at 100 kHz. Varies from +115 ppm/° C at −55° C to +165 ppm/° C at +125° C. Maximum deviation at any temperature, 5 ppm. Drift less than 0.1% or 0.1 pF, whichever is greater. **Tol.:** Suffix **J**, ±5%; **K**, ±10% and **C**, ±0.25 pF; ±20%, ±2%, ±1% on request.

ERIE MONOBLOC SUBMINIATURE CERAMIC CAPACITORS

Erie's exclusive Monobloc Process® utilizes ceramic films prepared from proprietary formulations which are subsequently fired into one or more layers. This construction yields maximum capacitance-to-volume ratio, up to 380 mF/cu. in., consistent with excellent performance and dependability. Monobloc capacitor elements are produced in a wide range of capacitance values, characteristics, and sizes for Erie subminiature capacitors. Encapsulated to suit every application and are hermetically sealed, glass encased, precision molded, or Jet-Sealed with a hard bright polymeric coating.

GLASS-SEALED MONOBLOC CAPACITORS

8015

8005

8045

Small, rugged, reliable glass-sealed capacitors are hermetically sealed in glass providing maximum margin of safety whenever severe environmental conditions are anticipated. **Dielectric Strength:** 2.5 x WVDC. **Life Test:** 1000 hrs. at maximum operating temp. at 2 x WVDC. **Moisture Resistance:** MIL-STD-202, Method 106B, 20 days. **Tolerance:** Erie Numbers ending with suffix K, ±10%; M, ±20%. **Operating Temperature Range:** −55° C to +125° C, except Z5UO, +10° C to +85° C. **Sizes:** Style 8015, body length, .170″ x .065″ dia.; 8005, .260″ x .100″ dia.; 8045, .400″ x .155″ dia. Leads, min. length, 1.25″.

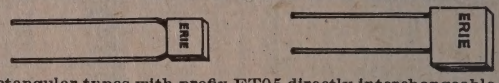
RECTANGULAR TYPES MONOBLOC CAPACITORS



Rectangular types with prefix ET05 directly interchangeable with the former 8123 or 8127 parts. Similarly, types with prefix ET06 are interchangeable with the former 8133 or 8137 parts. Meet applicable requirements of MIL-C-11015. Sizes, Type ET05, 200″ w. x .200″ h. Type ET06, .300″ w. x .300″ h. Both types are 100″ thick, have lead spacing .200″.

NPO HIGH STABILITY TYPES, 100 WVDC, ±10% TOL.

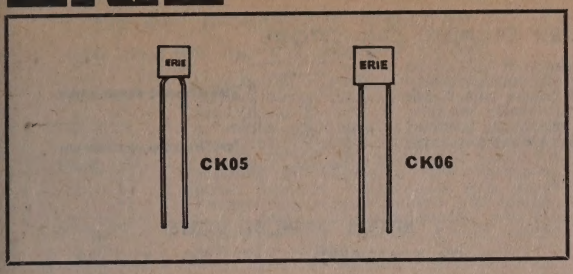
MILITARY GRADE MONOBLOC SUBMINIATURE CERAMIC CAPACITORS



Subminiature ceramic capacitors produced by Erie's exclusive Monobloc Process®. This unique process utilizes ceramic films prepared from proprietary formulations which are subsequently fired into solid structures of one or more layers. Maximum capacitance-to-volume ratio—up to 380 mF/cu. inch—is obtained consistent with fine performance and dependability. Monobloc capacitor elements are produced in a wide range of capacitance values, characteristics, and sizes for Erie subminiature capacitors. These capacitors are encapsulated to suit every application and are available in a choice of hermetically sealed, glass encased, precision molded, or Jet-Sealed models with a hard, bright polymeric coating. Sizes: Type CK05, .200″ w. x .200″ h.; Type CK06, .300″ w. x .300″ h. Both types are .100″ thick, with .200″ spacing between leads.

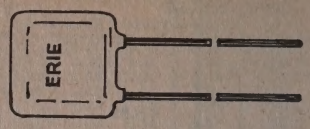
ERIE "RED CAP" CERAMIC CAPACITORS

RED CAP MONOBLOC PROCESS® CERAMIC CAPACITORS

Monobloc process construction. Meet or exceed all applicable requirements of MIL-C-20 and MIL-C-11015. Lower value capacitors incorporate electrically and mechanically rugged, single plates. Higher values are obtained by stacking parallel plates with noble metal electrodes and firing at very high temperatures to form an inherently reliable, fused monolithic "bloc". Encapsulated with Jet Seal, a hard, bright polymeric coating, to provide mechanical and electrical protection under the most severe environmental conditions.



RED CAP DIMENSIONS

Leads are 1.5" long minimum.

50 VOLT AND 100 VOLT		500 VOLT	
Erie Number	Size, Inches Square x Thick	Erie Number	Size, Inches Square x Thick

RED CAP CAPACITORS (CONT'D)

500 VOLT RED CAP CERAMIC CAPACITORS

High voltage capacitors designed for applications where compactness and light weight are critical. Range of temperature characteristics available adapts these capacitors from the ultra stable requirements of tuned circuits to the general purpose needs for coupling and bypassing, filter networks, power supplies, transmitters and more. Feature small size, reliability, high insulation resistance, shock resistance, and encapsulated with Jet Seal, a hard, bright polymeric coating.

SPLIT-BUSHING GLASS TRIMMERS (FIG. C)

Designed for applications allowing extension of the adjustment screw, glass trimmer is ideally suited for high volume economic usage in electronic equipment. Internal torque mechanism maintains proper torque under varying conditions of vibration and shock. Operating temperature, −55° C to +125° C. Temperature coefficient, PPM/° C, 582-003, −75 ±75; balance, 0 ±100. ¼″-28 thread; 2″ lg. wire lead.

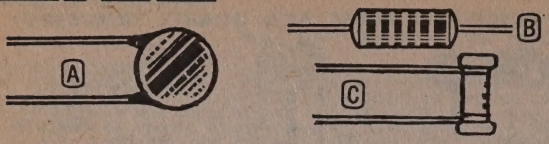
ERIE CERAMICON® CERAMIC DISC CAPACITORS



CERAMICON® DISC CAPACITORS (FIG. A)

Have flat ceramic dielectric with silver fired onto the dielectric. Lead wires soldered to silver electrodes. Case is phenolic, vacuum-wax impregnated. Very efficient at high frequencies. Reliable to 85° C. **Size, O.D.:** Style 831, .290″; 801, .360″; 851, .437″; 871, .490″; 811, .593″; 841, .675″. All are .156″ thick. All units rated at 500 WVDC; flash tested at 3 times rated voltage.

GENERAL PURPOSE HI-K® CERAMICONS

Popular for by-pass and non-critical coupling applications. **Tolerance:** ±10% except 10K–20K pF, ±20%.

HIGH-CAPACITANCE, LOW-VOLTAGE TRANSCAP® DISC CERAMICONS (FIG. A)

Low cost disc type transcaps for 12-, 18- and 25-V transistorized applications such as by-pass and filtering.

12-VOLT TRANSCAPS

Dissipation Factor: 7% max. **Life Test:** 1000 hrs. at 12 VDC and +85° C. **Tolerance:** ±20%. **Size, O.D.:** Style 5635, .275″; 5655, .420″; 5615, .550″; 5645, .660″; 5685, .800″. All are .156″ thick.

ITT Tantalum Capacitors

TYPES TAP AND TAG SOLID TANTALUM CAPACITORS

The extremely stable oxide layer of solid tantalum capacitors allows only a very small leakage current even after long storage. The solid electrolyte guarantees very stable electrical performance over wide temperature ranges and long time periods. ITT's TAP and TAG solid tantalum capacitors are finished in blue and red epoxy respectively and can be mounted in any position. Rugged construction allows installation in moderate environments experiencing moderate shock and vibration. Capacitance Tolerance: ±20% standard; ±10% also available. Temperature Range: −55° C to +85° C.

TYPE PMT METALLIZED POLYESTER CAPACITORS

These capacitors provide the designer with a wide range of low cost, high performance metallized plastic film capacitors housed in rugged moldings. The encapsulation is stable, non-flammable, thermosetting resin. Capacitance Tolerance: ±20% standard; ±10% and ±5% also available. Temperature Range: −40° C to +100° C with no derating. Insulation Resistance: 10,000 ohms x microfarads or 25,000 megohms, whichever is greater. Surge Voltage: 1.5 times rated voltage (max. 1 min/hr). Capacitors rated at 630VDC are available on special order.

JFD PRECISION PISTON TRIMMER AND TUNING CAPACITORS

PC SERIES TO MIL-C-14409

Similar to commercial MC series, but meet QPL of MIL-C-14409. Body ¼" dia. except as noted. Panel mount types have 10-32 bushing, except as noted. Printed circuit types have 4-wire leads.

VC900 SERIES SUBMINIATURES

Extremely small piston trimmers offer a wide delta C, Hi-Life telescopic adjust mechanism, ultra linear tuning, low loss and low inductance for high frequency uses. WVDC, 500; dielectric strength, 1000 VDC; body dia., 17/64". **VC951 and VC961 use 0483 Green Glass dielectric for Q of 1000 at 20 MHz. VC950 and VC960 are standard glass equivalents with Q of 500 at 20 MHz. Panel mount types have #10-32 bushing; others are 4-wire PC types.**

DV5 SERIES SUBMINIATURE VARIABLE CERAMIC DISC CAPACITORS

Only 5 mm in diameter, occupies less than .050 sq. in. of PC board space. Wide capacitance range and extremely low capacitance change with temperature. Capacitance is approximately linear for 180° rotation. Excellent stability due to unique rotor design, utilizing special proprietary ceramic materials in a monolithic structure. **Q:** 500 minimum, measured at 1 MHz and 25° C. **Insulation Resistance:** Not less than 10,000 megohms. **Dielectric Strength:** Twice rated working voltage for 1–5 seconds. **Capacitance Drift:** After temperature cycling, 0.75% or 0.5 pF, whichever is greater. **Turning Torque:** 0.5–3 oz.-in. **Temperature Coefficient:** NPO. **Working Voltage:** 100 WVDC from −55° C to +85° C; 50 WVDC up to +125° C. **Size:** .218" dia. x .145"; mounts in two .045" dia. holes, spaced .195". Weight, less than ¾ gram.

DV11 SERIES STANDARD MINIATURE VARIABLE CERAMIC DISC CAPACITORS

DV11A

DV11P

DV11PS

DV11PR

Low-cost, miniature ceramic trimmer capacitors have piston-type tuning. Available in five temperature coefficients and four mounting types. **Type PS:** Short crimped PC leads. **Type A:** Axial leads. **Type P:** Standard PC leads. **Type PR:** Right-angle PC leads. All models are .375" dia. x .275" deep.

JFD MICROMINIATURE VARIABLE CAPACITORS

MT SERIES MODUTRIM MICROMINIATURE CERAMIC VARIABLE CAPACITORS

Extremely small, highly stable capacitors have a unique rotor design utilizing a special proprietary ceramic material in a monolithic structure. Capacitance is approximately linear for 180° rotation. Capacitance drift after temperature cycling, 0.75% or ±0.5 pF, whichever is greater. Dielectric strength, twice rated WVDC. Insulation resistance, not less than 10,000 megohms at rated voltage at 25° C. **MT100:** For channel-mount and cordwood applications, etc. Size, .34″ x .21″ x .125″ thick. **MT200:** Ideal for high component density problems and LC networks in TO-5 cans. Size, .28″ x .21″ x .125″ thick. **MT300:** 4-legged configuration with two dummy terminals for optimum mechanical support. Size, .25″ x .25″ x .125″ thick. **MT400:** For cordwood and module applications. Four feed-thru leads, including two dummy leads. Size, .25″ x .25″ x .125″ thick. **MT500:** Fits .100″ grid spaced PC boards. Size, .25″ x .25″ x 5/32″ thick, maximum.

MVM SERIES MICROMINIATURE AIR VARIABLE CAPACITORS

Specially designed for high frequency applications that demand extreme stability, small size and high Q. Metal housing elements provide a smoother, more constant torque during cycling and reliable electrical contact over a large area, assuring minimum noise levels. A positive stop beyond maximum rated capacitance prevents electrical shorting. Guiding element keeps rotor centered even under conditions of intense shock and vibration. All metal rotor with integral spring contact elements. Resists heat; won't come apart during soldering. Internal air meshing shells are silver plated for best surface conductivity and long life. High density ceramic insulator is used between stator and mounting bushing. Rubber-gasketed threaded end cap seals unit against humidity and contamination. Meets MIL-C-14409. Gold plated leads. Insulation resistance, 10^6 megohms at 500 VDC. **Working Voltage:** 250 WVDC. Test voltage, 500 VDC. **Operating Temperature:** −55° C to +125° C.

Type MVM003: Offers Q greater than 5000, measured at 3.5 pF and 100 MHz. Panel mounting with turret terminal. Size, 9/32″ dia. x 3/16″; mounts in .121″ dia. hole. **Type MVM003W:** Same as MVM003, but for PC mounting. Size, 3/4″ dia. x 31/64″ overall.

Type MVM006: For UHF to microwave frequencies. Q greater than 5000 measured at 6.0 pF, 100 MHz. Panel mount with turret terminal. Size, .200″ dia. x 3/16″; mounts in .191″ dia. hole. **Type MVM006W:** Same, for PC mounting. Size, .200″ dia. x 31/64″.

Type MVM010: Rugged construction with high Q (greater than 3000, measured at 20 pF and 100 MHz). Panel mount with turret terminal. Size, 9/32″ dia. x 37/64″; mounts in .236″ dia. hole. **Type MVM010H:** Panel mount with threaded terminal. Size, 9/32″ dia. x 21/32″. **Type MVM010M:** Panel mount with lug terminal; 9/32″ dia. x 15/32″. **Type MVM010W:** PC mounting. Size, 9/32″ dia. x 35/64″ max.

Type MVM020: High Q, greater than 1200 at 20 pF and 100 MHz; 3000 at 1.0 pF. Panel mount with turret terminal. Size, 9/32″ dia. x 55/64″; mounts in .236″ dia. hole. **Type MVM020H:** Panel mount with threaded terminal. Size, 9/32″ dia. x 15/16″; mounts in .236″ hole.

Type MVM020M: Panel mount with lug terminal; 9/32″ dia. x 3/4″; mounts in .236″ hole. **Type MVM020W:** PC mounting. Size, 9/32″ dia. x 3/4″ long maximum.

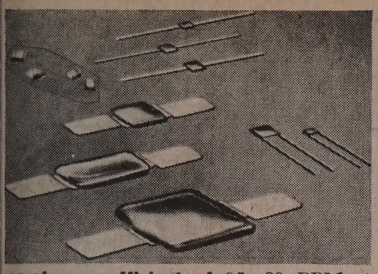
JFD UNICERAM—MICROMINIATURE HI-Q, HI-K AND RF POWER CERAMIC FIXED CAPACITORS

HIGH Q SERIES ENCAPSULATED UNICERAM® CAPACITORS



Meets or exceeds **MIL-C-11272B.** Microminiature multi-layer ceramic dielectric capacitors with up to 10 times greater capacitance to unit volume ratio than competitive units. Completely encapsulated in glass with bonded solid silver **ribbon leads** for low inductance. Also available in **radial ribbon leads.** Offers drift free low **temperature coefficient** of 95±20 PPM stability and reliability together with exceptionally high Q. Available in ±1% **(F)**, ±2% **(G)**, ±5% **(J)**, ±10% **(K) tolerances** as standard. Low **dissipation factor** of .0002. Max. **operating temperature range** without derating −55° to +125° C. 300 **WVDC** for units to 2000 pF and 200 **WVDC** for units from 2000 pF to 10,000 pF. **Insulation resistance** at 25° C, 10^6 megohms min. to 3000 pF; 5 x 10^5 megohms min. 3000–7000 pF, 10^5 megohms min. 7000–10,000 pF. **Life test** for 2000 hours at 125° C and 150% rated voltage. Ideal for today's weight and space saving needs in space age electronics equipment.

High Q Series Unencapsulated (WY) Capacitors: Unencapsulated chips with metalized edges. Parallel leads, capacitance values and outstanding electrical properties of standard encapsulated High Q series (UY). Q value greater than 5,000.

HIGH Q ORDERING INFORMATION

The complete JFD Number consists of six parts, as shown below. This numbering system should be used when ordering High Q encapsulated Uniceram capacitors (UY series) or High Q unencapsulated chip capacitors (WY series). To order WY series unencapsulated capacitors, substitute the letter **W** for the U in JFD number, in tables below. Complete pricing on request.

UY	0	2	13	1	J
(A)	(B)	(C)	(D)	(E)	(F)

(A) **Construction: UY**—Encapsulated fixed capacitor
WY—Unencapsulated chip capacitor

(B) **Leads: 0**—Axial ribbon leads
2—Axial wire leads (UY series only)
Available with radial ribbon leads on special order.

(C) **Case Size:**
1—UY01 (encapsulated) or WY01 (unencapsulated)
2—UY02 (encapsulated) or WY02 (unencapsulated)
3—UY03 (encapsulated) or WY03 (unencapsulated)
4—UY04 (encapsulated) or WY04 (unencapsulated)
5—UY05 (encapsulated) or WY05 (unencapsulated)

G—±2%
J—±5%
K—±10%

HIGH K SERIES UNICERAM FIXED CAPACITORS

Axial ribbon leads. Meet or exceed MIL-C-11015C. Same exacting construction as the High Q series with higher capacitance-per-unit volume. Designed for reliable coupling and bypass applications in space-age electronics. **Voltage Rating:** 50 WVDC; test, 300% of rated. **Temperature Coefficient:** +5% to −15% from −30° C to +125° C. **Dissipation Factor:** 3% max. **Insulation Resistance:** 10^5 megohms or 100 ohm-farads, whichever is less. **Tolerance:** Choice of ±10% (K), ±20% (M) or GMV (Z).

COMPLETE PRICING INFORMATION ON REQUEST

JFD PRECISION PISTON TRIMMER AND TUNING CAPACITORS

Solid dielectric piston trimmers have patented adjust mechanisms, linear tuning, high shock and vibration resistance, low temperature coefficient, high Q and rugged construction. Available in choice of four dielectrics, five precision adjust mechanisms, standard to subminiature sizes and panel or printed circuit mountings. Dielectrics: Standard glass; 0483 Green Glass (increases capacitance 30% and Q factor 25% over standard glass); highly stable fused quartz and ceramic. Operating temperature range, −55° C to +125° C for standard glass and Green Glass types; −55° C to +150° C for quartz and ceramic types. Most types meet or exceed applicable performance and environmental requirements of MIL-C-14409B, Type PC.

VC/NVC MINIATURE GLASS SERIES

All units rated at 750 WVDC. Dielectric strength, 1500 VDC (measured for one minute at 50% relative humidity at maximum rated capacitance). Capacitance ranges measured at 1 MHz. Body dia. ¼″; 1 to 10 in.-oz. turning torque; 0.20″ screwdriver slot. **Choice of panel mounting type with #10-32 bushing or printed circuit mounting types: Suffix W, 4-wire PC mounting; other PC types have lug with 5/64″ dia. hole.**

VC STANDARD GLASS

Extremely popular series of trimmers employing standard glass dielectric and JFD's exclusive, space-saving miniature telescopic adjustment mechanism. Standard glass provides a 6.7 dielectric constant, low dissipation factor, excellent stability.

DC SERIES STANDARD DIFFERENTIAL GLASS TRIMMERS

Same as DS series above, but without Sealcap construction. **DC401 Series:** Standard panel mount types with ¼-28 bushing. **DC411 Series:** Miniature panel mount types with #10-32 bushing. **DC421 Series:** Printed circuit board types with 5/64″ dia. lug and two wire leads. **DC431 Series:** Printed circuit board mounting types with four wire leads.

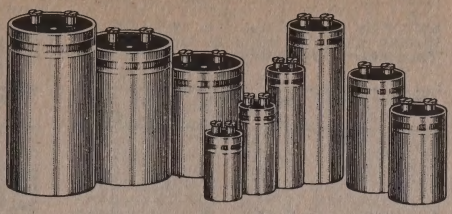
Y Series SP/SPS Split Stator and DS/DC Differential Trimmers, reduced cost equivalents, also available. Write for prices.

MALLORY Computer Grade Capacitors



Two classes of Computer Grade Capacitors are available: CGS for +65° C operation and CG for +85° C operation. Operating life of both types should exceed 10 years when used within stated parameters. Derating voltage and/or lowering operating temperature will extend life by a large factor. **Temp. Range:** −20° C to +65° (CGS), +85° (CG). **Tolerance:** 0–150 WVDC, −10 +75% (U); 151 WVDC up, −10 +50% (T). For complete specifications, ask for Form 4-64 (CG), 4-80 (CGS). Both classes are supplied with polyester film insulating sleeves and have "High-post" terminals with #10-32 screws. Physical mounting of these capacitors is usually done with Mallory VR clamps. The clamps, however, are not included with the capacitors. Order separately.

AXIAL LEAD COMPUTER GRADE CAPACITORS

Series TCG axial lead, computer grade capacitor is a small tubular version of the Mallory type CG electrolytic capacitor listed at left and on previous page. All models are vented except 5/16" and 7/16" diameter cases. Long life, all welded construction. Has standard PVC insulating sleeve, optional Mylar* sleeve. **Temperature Range:** −40° C to +85° C. **Tolerance:** 3–75 WVDC, −10% +75% (U); 76–450 WVDC, −10% +50% (T).

*Registered DuPont Corp. trademark.

TAC SOLID ELECTROLYTE MOLDED AXIAL-LEAD TANTALUMS

Miniature tubular design for high density applications. Solid electrolyte tantalum in precision molded case. **Size:** Indicated by final suffix number (e.g., TAC825K003-PO2): **2**, .105″ dia. x .295″ lg.; **3**, .137″ dia. x .340″ lg.; **4**, .187″ dia. x .530″ lg. Axial leads .020″ dia. x 1.500″ lg.

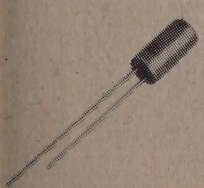
VTT ALUMINUM ELECTROLYTIC CAPACITORS



Miniature single ended capacitors will fit easily in small pocket transistor radio circuits and other applications where space is at a premium. Use in filtering, coupling and bypass applications. **Operating temperature:** −20° to +85° C. **Tolerance:** For VTT numbers with sword −10 +100%; all others −10 +75%.

TYPE CSR13 SOLID ELECTROLYTE TANTALUM CAPACITORS TO MIL-C-39003/01, FRL (FAILURE RATE LEVEL) "M" (1%) AND "P" (0.1%)

Established reliability design is hermetically sealed with plastic insulating sleeve. Meet MIL-C-39003A specifications. Life test, 10,000 hours. High reliability, low DC leakage and low impedance. Temperature range, −55° C to +125° C. Leads may be welded or soldered; are tinned nickel, type N1 of MIL-STD-1276.

STOCK VALUES FRL (FAILURE RATE LEVEL) "M" (1%/1000 HOURS) AND "P" (0.1%/1000 HOURS)

CS12, CS13 AND TAS SOLID ELECTROLYTE TANTALUM CAPACITORS

Ultra-miniature capacitors designed to withstand the most difficult environmental conditions. Furnished in hermetically sealed metal cases. Temperature range: −80° C to +85° C (to +125° C with derating). TAS commercial types 6 through 50 WVDC are shown on this page. CS12/13 types to both MIL-C-26655A and MIL-C-26655B are shown on next page. **TAS ORDERING INFORMATION:** Are specified by a 13-digit part number. **Tolerance:** Specify **K** for ±10% or **M** for ±20%. **Insulating Sleeve:** TAS types are listed with uninsulated cases; for insulating sleeve, change 12th digit of part number from **0** to **1** and add **2c** to prices shown. **Case Sizes:** TAS sizes are indicated by the last digit in the part number (**A, C, F, & G**). See price table below. **CS12/13 ORDERING INFORMATION:** Shown on next page to both MIL-C-26655A and MIL-C-26655B. Either type may be ordered. Prices are shown below by case code. **Tolerance:** Specify **K** for ±10% or **M** for ±20%. **Insulating Sleeve:** Uninsulated CS12 types are shown. For insulating sleeve, specify **CS13** and add **2c** to prices shown. **Case Sizes:** Shown below by code letter in listing, see price table below.

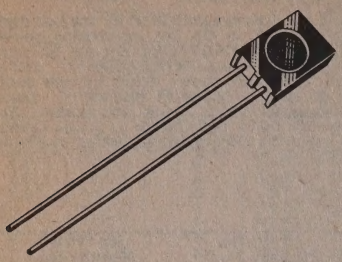
MALLORY Tantalum Capacitors

TIM MOLDED RECTANGULAR SOLID ELECTROLYTE TANTALUMS



Solid electrolyte tantalums molded in rectangular epoxy case. Precision-spaced radial leads for easy PC board mounting. Electrically and environmentally meet computer and industrial needs. **Size:** Indicated by final suffix letter (e.g., TIM186K006POX): **V,** .325″ w. x .170″ th. x .415″ h.; **W,** .228″ w. x .105″ th. x .340″ h.; **X,** .285″ w. x .170″ th. x .225″ h.; **Y,** .380″ w. x .170″ th. x .335″ h.

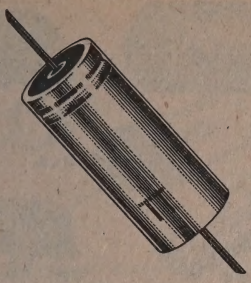
MALLORY Electrolytic Capacitors

TT TINY TUBULAR ALUMINUM ELECTROLYTIC CAPACITORS



Mallory TT capacitors are made from very high purity aluminum foil, deep-etched to provide maximum capacity per unit of volume. Etched cathode construction assures long, hum-free operation. Utilize all-welded construction; exhibit exceptionally low DCL and ESR. Supplied in aluminum case with insulating sleeve; wire leads 2" lg. (±¼"). **Temperature Range:** −55° C to +85° C, 3 to 150-volt units; −30° C to +85° C, all others. **Tolerance:** −10%, +75%, 1-100 WVDC; −10%, +50%, 100 WVDC and up.

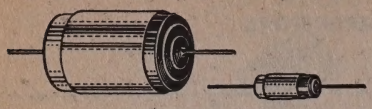
*Size shown for plain case. For insulating sleeve add .010" dia. x 1/16" l.

POLYSTYRENE CAPACITORS



Manufactured from a unique form of stretched and fused polystyrene to provide the ultimate in temperature stability and humidity protection. Can replace mica, film, paper, ceramic types in most uses. **Insulation Resistance:** Greater than 100,000 megohms. **Power Factor:** Less than 0.05%. **Temperature Coefficient:** −150 ppm/° C, ±60 ppm/° C. **Temperature Range:** −40° C to +85° C; for best operating stability, −10° C to +70° C. Sizes shown are ±.010″ dia. x ±.032″ lg. **Ask for Bulletin 9-370 for complete specifications.**

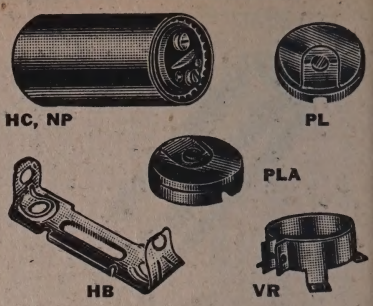
HIGH CAPACITY DRY ELECTROLYTICS



HC and NP capacitors are furnished in heavy-duty molded phenolic cases with integral safety vent. HC types are polarized; NP types are non-polarized. **Temp. Range:** −20° C to +85° C. **Tolerance:** Type HC—0–50 WVDC, −10%, +150%; 51–350 WVDC, −10%, +100%; 351 WVDC up, −10%, +50%. Type NP—±25%, all units.

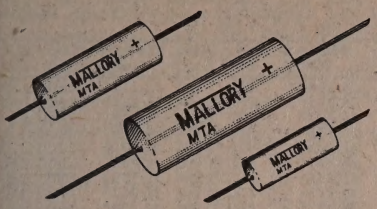
MALLORY Tubular Electrolytics

MTA MOLDED TUBULAR ALUMINUM ELECTROLYTIC CAPACITORS



High quality electrolytics, precision molded by an exclusive new technique. Precision molding assures case uniformity and quality unattainable by conventional tube-and-fill methods. Polypropylene case material provides extreme humidity protection; actually excludes water molecules while allowing for molecular venting of the electrolyte if necessary. All-welded construction. **Temperature Range:** −20° C to +65° C. **Tolerance:** −10%, +100%. **Write for complete specifications.**

MALLORY Ceramic Capacitors

DISCAP® ceramic disc capacitors offer the widest range of types available. Meet or exceed all requirements of EIA Specification RS-198, Class 2.

LOW VOLTAGE
RMC-MAGNACAPS®

For low-voltage transistor circuits; rated 3, 12, 25 and 50 WVDC. **Tol.:** ±20%. **Power Factor:** 3% at 3 WVDC; 5% at 12 and 25 WVDC. **Temp. Coef.:** 3 V units, X5S: ±22%. All others, X5U: +22%, −56%. **Temp. Range:** −55° C to +85° C.

DECI-CAPS

Meets requirements of MIL-C-11015C for moisture, vibration and shock resistance. Epoxy-molded monolithic construction offers low power factor and high stability. High density cordwood packaging. **Operating Range:** −55° C to +125° C. **Capacitance Range:** 4.7–27,000 pF. **Tolerance:** ±10%. **Working Voltage:** 4.7–470 pF, 200 VDC; 560–27,000 pF, 100 VDC. **Insulation Resistance:** 20,000 megs min. **Dielectric Strength:** 500 VDC to 470 pF; 250 VDC, 560–27,000 pF. **Life:** 1000 hours at 125° C under twice rated voltage. **Size:** .250″ x .100″.

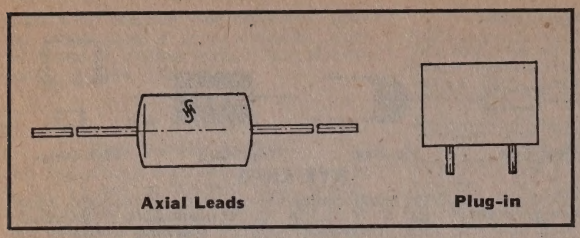
SIEMENS CORPORATION

TYPE MKH METALLIZED POLYESTER FOIL CAPACITORS



Metallized polyester foil capacitors are small in size with excellent characteristics for a wide variety of applications, especially in filters or for blocking and coupling. Metallized, self-healing polyester foil is joined at the face ends and the leads are soldered to the metallized low loss winding to ensure reliable contact. Can be used in high current pulse forming networks with minimum failure due to arc-over or direct shorts. Operating temperature, −40° to +100° C. Available in oval axial-lead style, or in rectangular plug-in type.

SPECIFICATIONS

Voltage Loading: DC voltage may reach 1.25 times rated WVDC for up to 2000 hours of intermittent operation; 1.5 times rated WVDC in voltage peaks (milliseconds). **Capacitance Drift:** ±3% up to 85° C; +3%, −6% up to 100° C. **Operating Temperature:** −40° to +100° C. **Relative Humidity:** Type B 32 234, average annual relative humidity less than or equal to 75% with maximum of 95% during 30 days per annum, otherwise 85%; type B 32 231, average annual relative humidity less than or equal to 65% with maximum of 85% during 60 days per annum, otherwise 75%. **Insulation (Time Constant):** During operational life, the insulation may decrease for a short period to about 10% of value at time of delivery, especially when the capacitor is subjected to the maximum permissible humidity for a long period. **Dissipation Factor:** Tan δ value less than 10 x 10^{-3} (5 x 10^{-3} average) at 1 kHz, less than 20 x 10^{-3} (15 x 10^{-3} average) at 10 kHz, for capacitance values less than 3.9 μF. Tan δ value less than 12 x 10^{-3} (7 x 10^{-3} average) at 1 kHz, less than 30 x 10^{-3} (18 x 10^{-3} average) at 10 kHz, for capacitance values greater than 3.9 μF. Measured at +20° C. **Capacitance Tolerance:** ±10%. Available with ±20% tolerance on request.

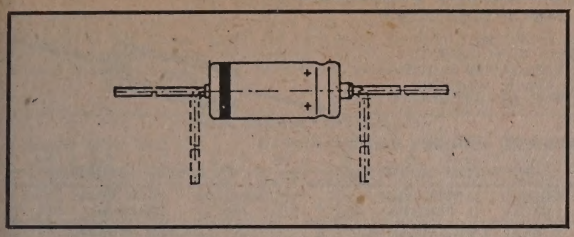
ALUMINUM ELECTROLYTIC AND POLY-CARBONATE STACKED-FOIL CAPACITORS

MINIATURE ALUMINUM ELECTROLYTIC CAPACITORS



All welded electrolytic capacitors combine very small volume with outstanding electrical characteristics, specially suitable for transistorized equipment. Offer long life at temperatures from −40° to +85° C, with excellent loss factor, leakage currents and impedance values. All connections are welded to assure contact reliability; negative pole is connected to case. Axial leads, with etched foil anodes in an insulated cylindrical aluminum case fitted with a rubber seal at one end. **Loss Factor:** Approximate value of Tan δ is .10 for 3 WVDC types, .08 for 6 WVDC, .06 for 10 to 35 WVDC, .03 for 70 WVDC, .02 for 100 WVDC (all at 50 Hz and +25° C). **Leakage Current:** I_r (μA) = .02 x C (μF) x V (Volts) when storage without voltage does not amount to more than four weeks, measured 5 minutes after application of rated voltage at 20° C. **Lead Size:** 1.57″ long; #20 AWG except microminiature type B41313(*), #24. **Tolerance:** +50%, −10% except microminiature type B41313(*), +100%, −10%.

TYPE MKM (B 32 541) STACKED-FOIL CAPACITORS

Metallized polycarbonate capacitors with fixed 0.40″ lead spacing for PC mounting. Unique, stack foil construction holds volume to half that of equivalent metallized film types; and, offers extremely low self-induction. **Temp. Range:** −40° C to +100° C operating. **Capacitance Drift:** ±3% max. up to 85° C. **Dissipation:** Less than or equal to 3 x 10^{-3} at 1 kHz. **AC Voltage:** 250 VDC units are capable of 100 VAC operation; 100 VDC units handle 75 VAC, 2000 hours at 85° C. **Insulation Resistance:** Greater than 30,000 megohms for operating voltages less than 100 V; 75,000 megohms or 100 volts or over. **Tolerance:** ±5%. **Also Available:** Type B 32 540 version with 0.30″ lead spacing.

SPRAGUE Tantalum Capacitors

TYPE CSR13 SOLID ELECTROLYTE TUBULAR TANTALUM CAPACITORS TO MIL-C-39003/1A SPECIFICATIONS

Established reliability, solid tantalums meet satellite, missile, military equipment, computer and other complex equipment requirements for minimum failure. Meet MIL-C-39003 requirements in choice of 2%, 1% or 0.1% failure rate versions. Extensively tested and culled to meet highest environmental conditions such as high G shock, vibration, immersion, etc. (Full specifications on request.) **Temp. Range:** −55° C to +125° C. Supplied with insulating sleeve.

SPRAGUE Tantalum Capacitors

TYPE CLR65 SINTERED-ANODE TANTALUM CAPACITORS TO MIL-C-39006

Available as hermetically sealed and non-hermetically sealed types. Designed to meet MIL-STD-790 specs. Rated for operation to 85° C (to 125° C with voltage derating). Come in four different failure rates: L = 2%; M = 1%; P = 0.1%; R = 0.01%. Hermetically-sealed types MIL-C-39006/9C are not available in "R" failure rate.

SPRAGUE Tantalum Capacitors

TYPE 150D SOLID ELECTROLYTE TANTALEX® CAPACITORS

True miniaturization with characteristics previously unobtainable in electrolytics. Solid electrolyte cannot leak or corrode; hermetically sealed. **Temperature Range:** 85° C without derating; to 125° C with derating. **Ordering Information:** Select capacitance and read across chart to voltage desired. Suffix on number (A, B, R or S) refers to size; find this key and your capacitance in the price chart, at bottom of page.

TYPE 150D ±10% TOLERANCE CAPACITANCE VALUES AVAILABLE

†PRICE CHART AND ORDERING INFORMATION FOR TYPE 150D CAPACITORS

When ordering, show full number (as above for ±10% tol.) for value desired (e.g., 150D224X**9006A**). Items noted (*) available in ±20% tol.; to order, change first digit in suffix to **0** (e.g., 150D224X**0**006A). For ±5% tol., for 6 to 50 volts double ±20% tol. unit prices, for 60 to 125 volts triple ±20% tol. unit prices; to order, change first digit in suffix to **5** (e.g., 150D224X**5**006A). For bare metal case (size as listed below), add final digit **0** (150D224X9006A**0**). For plastic film sleeve (add .010" dia. x .036" lg. for all units), use final digit **2** (150D224X9006A**2**) and add **1c** to prices.

TYPE 196D DIPPED TANTALEX® SOLID-TANTALUM CAPACITORS

Epoxy-dipped coating economically provides good electrical and mechanical protection. High stability, very little capacitance change; low dissipation factor permits higher ripples. Radial leads for mounting on PC boards. **Operating Temperature:** −55° C to +85° C. **Tolerance:** ±10%; ±20% available as noted. **Case Size and Leads:** Last three characters indicate case sizes and leads. Case Size: **H,** .175″ dia. x .375″ h.; **J,** .225″ dia. x .425″ h.; **K,** .225″ dia. x .450″ h.; **L,** .450″ dia. x .500″ h.; **M,** .600″ dia. x .800″ h.; **P,** .400″ dia. x .650″ h.; **T,** .400″ dia. x .750″ h. Numbers ending with **A1** have straight leads with .125″ spacing; **A3** indicates straight leads with .250″ spacing. Numbers ending with **E4** have "Hockeystick" leads with .250″ spacing. For short "Hockeystick" pin leads (.187″ l.; .250″ spacing) change A1 or E4 to **E3.** For short "Hairpin Crimped" leads (.187″ l.; .250″ spacing) change A3 to **B3.**

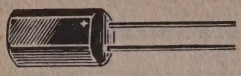
TYPE 198D VERTICAL MOUNTING ECONOLINE™ SOLID TANTALEX® CAPACITORS



Economically priced solid electrolytic capacitors suitable for high speed automatic insertion on printed wiring boards in transistorized entertainment, commercial, and industrial equipment. Unique body shape, similar to that of popular plastic encapsulated Econoline transistors, also facilitates rapid visual inspection of inserted units for proper polarization. Capacitors with working voltages between 4 and 50 VDC are available for operation over the temperature range of −55° C to +85° C without derating. Capacitors listed below are in tolerance of ±10% and ±20% with .100" lead spacing. See ordering information below for other listings available.

ORDERING INFORMATION

Order by complete number. Listings shown above are for .100" lead spacing. **For .200" lead spacing,** change the last digit in Sprague number from 1 to **2**; same price. **For .250" lead spacing,** change the last digit in Sprague number to **3**; same price. **Tolerance** is indicated by 9th char. in Sprague number; **9** = ±10%; **0** = ±20%. **Case Size** is indicated by 13th char. in Sprague number (**H** or **K**); dimensions are given in the table below.

CASE SIZE

Code	Diameter	Height
H	.250"	.325"
K	.250"	.475"

192P PACER® FILMITE® "E" CAPACITORS

Extended foil film sections are terminated in end caps with wire leads, to assure the best possible non-inductive section. Protected by heat shrinkable plastic sleeve or epoxy coating. Designed for operation to 85° C. Tolerance, ±10%.

SPRAGUE Orange Drop® Capacitors

TYPE PS ORANGE DROP DIFILM® DIPPED TUBULAR CAPACITORS

- Double dipped in bright orange epoxy resin—beats heat and humidity.
- Outside foil on all units identified by black striping.
- Dual dielectric (polyester film–paper) solidly impregnated with exclusive HCX®—produces rock-hard capacitor section.
- Crimped wire leads for correct spacing when mounted on printed wiring boards.

TYPE 225P FILMITE® "E" ORANGE DROP RECTANGULARS

Designed for PC board use with radial leads. Similar in appearance to PS Series, above. Used in TV sets, radios and commercial equipment. Sections are wound from polyester film and thin gauge foil; wax-free conformal epoxy coating protects against moisture. For operation up to 85° C. Tolerance, ±10%.

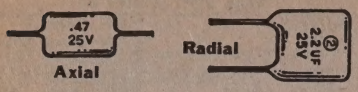
*When ordering, include final suffix **XD3** (e.g., 225P1249R75**XD3**). *1-24, 25 Up supplied in Kleer-Pak; all others, bulk-pack. Write for 250 Up bulk-pack prices.

TYPE 1C, 2C, 3C AND 5C MONOLYTHIC® CERAMIC CAPACITORS



Monolythic® ceramic capacitors are available in wide range of body formulations, capacitance values and sizes. These capacitors are made by spraying alternate layers of ceramic dielectric material and metallic electrodes, then firing into a single, all but indestructible homogenous block. Protected against mechanical damage and moisture by tough resin coating. Capacitors with radial leads are listed below. For axial leads, change **C4** or **C5** in Sprague Part No. to **B1.**

GENERAL APPLICATION FORMULATION Z5U (+10° C TO +85° C)

Tolerance: +80, −20%. For ±20% tolerance, change **D8** in Sprague Number to **X0.**

TYPE 7C MONOLYTHIC® CERAMIC CAPACITORS

Radial lead style designed for printed wiring board mounting. Phenolic terminal base with standoff feet avoids any resin run down on leads, provides uniform lead spacing; degreasing fluid flows freely between capacitors and board. Made by spraying alternate layers ceramic dielectric material and metallic electrodes, firing into solid homogenous block, then coating with a tough phenolic resin. All capacitors listed rated at 50 WVDC. Available with radial leads only. **Tolerances Available:** ±20% (listed) or ±10%, except Formulation Z5U available ±20% or +80, −20%. See ordering instructions under ±10% pricing.

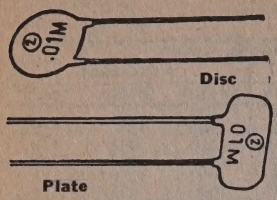
CERA-MITE® CERAMIC CAPACITORS



Tiny, tough and dependable. Fine replacement for molded micas and tubular ceramics. Silvered flat-plate design has low self-inductance for high by-pass efficiency in TV circuits. Heavy moisture-proof insulating coat. For 85° C use. Std. Tol.: ±20% except as indicated.

GENERAL APPLICATION

Extra small for use anywhere. Ideal where TC is not important.

QUANTITY PRICE INFORMATION AVAILABLE ON REQUEST.

TYPE 503D VERTI-LYTIC® MINIATURE ELECTROLYTICS

Low cost capacitors are designed for high density applications. Low leakage current and excellent stability and ESR. Operating temperature, 85° C. Metal-encased, with plastic insulating sleeve.

CERAMIC DISC CAPACITORS

CERA-MITE® NPO (DISCS)

Zero temperature-coefficient capacitors used where capacitance change with temperature is undesirable. Superior to silvered-mica types in stability, high "Q" and insulation resistance. Rated 1000 WVDC. Std. Tol.: ±5%, 12 pF up; all others ±0.5 pF.

HYPERCON® CERAMIC DISCS

Ultra-miniature discs for transistorized circuitry, bypass and coupling. Especially suited for any low voltage use where high capacitance and low power factors are important. Std. Tol.: HY-420–HY470 and HY-510–HY-550, +80 −20%; all others +50 −20%.

MINIATURIZED CERAMIC DISC CAPACITORS

Designed for transistorized circuitry. Small size allows easy fit into tight spaces. Moisture-proof coating protects against severe humidity and vibration. Coupling and bypass. High capacitance, low voltage. Standard tolerance, ±20%. Designed for 85° C continuous operation.

SPRAGUE Electrolytic Capacitors

TYPE 39D POWERLYTIC® TUBULAR ELECTROLYTIC CAPACITORS

Type 39D electrolytics supplement the original type 36D Powerlytics by offering lower capacitance values in a small case size. Ideal for applications requiring the greatest possible capacitance for a given compact case, such as transistorized apparatus. All have end seals of an improved molded phenolic, an outer insulation of flexible plastic, and a pressure-sensitive safety vent. Welds at all critical anode and cathode terminals eliminate riveted or pressure connections, assuring freedom from open circuits even during operation in the microvolt or millivolt signal range. Operating temperature, up to +85° C.

TYPE 36D POWERLYTIC® ALUMINUM ELECTROLYTIC CAPACITORS

Especially suitable for replacement applications. Maximum space economy at operating temperatures up to 85° C. Low ESR and leakage currents. Extremely long shelf life. Uses most reliable seal developed for aluminum electrolytic capacitors. Pressure-type safety vents employing silicone rubber are used on all cases. Capacitors listed have low-insert terminals; change last character of model no. from A to **B** for high-insert or A to **C** for solder-lug terminals, price on request.

TYPE 500D MINIATURE METAL-CASE ALUMINUM ELECTROLYTICS

Miniature metal-case aluminum electrolytic capacitors feature high voltage ratings and moderate cost. Excellent stability of capacitance, equivalent series resistance and leakage current. Welds at all critical anode and cathode terminations assure freedom from open circuits even when operated in the mV or μV range. Furnished as polar units with the cathode connected to aluminum case. Designed for operation over temperature range of −20° C to +85° C with very low equivalent series resistance and leakage current. Capacitance tolerance, −10, +75%, 3 VDC thru 50 VDC; −10, +50%, 100 and 150 VDC. Available without outer shrink-fitted insulation on request.

3 VDC WORKING, 4 VDC SURGE

*CASE SIZES LISTED ON THE PREVIOUS PAGE

TYPE 432D STACKED-FOIL COMPULYTIC® ALUMINUM ELECTROLYTICS

Stacked-foil construction allows capacitance values to 100,000 µF with extremely low equivalent series resistance of typically less than .001 ohm and inductance of only 1 mH. Special strip-line terminals are ideal for use with laminated-bus power distribution systems found in modern EDP equipment. Operating temperature range is −40° C to +85° C.

TYPE 600D EXTRALYTIC® ALUMINUM ELECTROLYTIC CAPACITORS

SPRAGUE EXTRALYTIC

Aluminum electrolytics offering extended operating temperature range from −55° C to +125° C. Dual rating makes possible operation at either +85° C or +125° C. Improved oxide systems, etching techniques, and end seals, together with a new electrolyte, make Type 600D capacitors equivalent or superior to comparable foil tantalum types. They are also lower in cost and one-third the weight of comparable foil tantalums.

7 WVDC AT 85° C; 5 WVDC AT 125° C

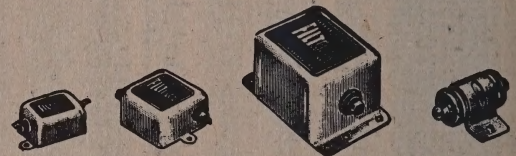
†SIZE

Items listed have outer insulating sleeve; for bare metal case version, subtract .0156″ from diameter .0625″ from lenght.

Case Code	Size, Inches Dia. x Length	Case Code	Size, Inches Dia. x Length
A	.296 x 1.000	E	.390 x 1.687
B	.390 x 1.000	F	.390 x 2.249
C	.390 x 1.187	G	.390 x 2.749
D	.390 x 1.437		

INTERFERENCE FILTERS

FILTEROL® TYPES



Filterol 1 Filterol 2 Filterol 3 Filterol 4

Filterol 1, 2 and 3—Three-terminal network with case as one terminal. Connects in series with power supply lines. The filter should rate higher than the continuous operating current of the offending device; usually sufficient when connected to the high side but may be connected to each leg of the power line in severe cases. **Filterol 4**—For high attenuation at frequencies above 5 megs, for use with small devices rated up to 20 amps continuous. Incorporates a Hypass® capacitor.

Sprague No.	Amps	Volts AC or DC	Size, Inches	Net Each 1-24
Filterol 1	1	115	⅞ x 1¼ x 1¾	$17.85
Filterol 2	10	115	1⅛ x 2 x 2	17.04
Filterol 3	35	115	1⅞ x 2⅞ x 3⅛	23.97
Filterol 4	20	115	1 dia. x 1 13/16″ lg.	4.80

IF TYPES

IF-15, IF-21, IF-S1, IF-37

IF-11

IF-15—For small motor-operated devices; prevents shocks from capacitor discharge. A triple-section filter for fans, drills, etc. **IF-11**—Enclosed safety design for motors over 1 hp and high current arcing devices. Dual, high capacity type operates up to 220 VAC or DC. **IF-21**—Compact dual; for use on fractional hp motors or across line terminals of motors; case grounds to motor frame. **IF-S1**—Completely insulated for use across make-and-break contacts; single section, two-lead design. **IF-37**—Delta-connected for fluorescent fixtures; only one required for each fixture. Also used on governor-type motors. UL Listed; 3-section filter.

Sprague No.	Volts AC or DC	Size, Inches Dia. x Lg.	Net Each 1-24
IF-15	220	1 x 2 3/16	$4.47
IF-11	220	1⅜ x 5¼	8.82
IF-21	220	1 x 2 3/16	4.44
IF-S1	220	¾ x 2 1/16	3.18
IF-37	220	1 x 2	4.86

TYPE 601D EXTRALYTIC® ALUMINUM ELECTROLYTIC CAPACITORS

Supplement Type 600D Extralytic capacitors with larger case sizes and higher capacitance values. Unique new electrolyte, high-gain etched foil, and improved oxide system for long life with superior electrical characteristics. Designed to operate at a temperature range of −55° C to +85° C. Pressure-sensitive safety vent. Tolerance: −10, +75% thru 50 WVDC; −10, +50%, 75 WVDC up.

For Bare Units: Subtract .062 dia. x .125" lg. from sleeved sizes.

TYPE 602D EXTRALYTIC® ALUMINUM ELECTROLYTIC CAPACITORS

Large cylindrical power supply filter capacitors with exceptional performance over long and trouble-free life. Type 602D have high ripple current capability and are designed for continuous operation over temperature range of − 55° C to + 85° C. Safely carry as much as 10 amps of ripple current at 120 Hz. Superior humidity seal. Ideal for input of power supply filters. Capacitors with outer insulation are listed below. For bare case, change the 14th character of Sprague number from 2 to **0**. With low-screw insert terminals. For high-screw insert terminals, change last character of Sprague number to **B**.

SPRAGUE Twist-Lok® Capacitors

• The world's most complete line of can-type electrolytics. • Especially designed for tough TV replacement applications. • Hermetically sealed in aluminum cans for long life. • Stand up under high temperatures, high ripple currents, high surge voltages. • Ideal for above-chassis mounting—complete with phenolic and metal washers. • The most dependable electrolytic in such compact size. • Easy to mount—a twist of the tabs locks unit in place. • Designed for 85° C (185° F) operation. **Certain less popular TVL numbers have been omitted from this listing. Write for complete catalog of Sprague TVL capacitors.**

†Exact replacement for color TV. •Printed circuit version; add prefix **PCL-**. ***Larger quantity prices on request.**

TYPE 418P ORANGE DROP® FILMITE® "E" CAPACITORS

Ideal for TV, radio and allied commercial equipment. Type 418P combines excellent electrical characteristics, compactness and low cost. "Hockeystick" crimped radial lead design for easy insertion on PC wiring boards. Wound with polyester film and thin gage foil; protected against moisture by wax-free conformal coating of epoxy. Designed for operation at temperatures at 85° C and may be operated to 125° C with voltage derating. Capacitance tolerance, ±10%.

PCL PRINT-LOK® ELECTROLYTICS

Universal replacement capacitors designed for printed circuit mounting. Will also fit standard twist base mountings without adapters. Withstand high surge voltages, high ripple currents and temperatures to 85° C (185° F). Hermetically sealed in aluminum cans. Ideal for TV replacement applications.

SPRAGUE Filmite® "E" Capacitors

TYPE 416P YELLOW JACKET® FILMITE® "E" CAPACITORS

Economically priced Yellow Jacket® capacitors are designed for all kinds of commercial applications. Extended foil construction. Protected against moisture by outer wrap of polyester film and plastic resin end seals. Operating temperature rated for −55° C to +85° C, can also operate to +105° C with voltage derating. High insulation resistance. Lightweight and minimum size. Made by Sprague World Trade Corp. in Taiwan to U.S. quality standards.

SPRAGUE MIL Paper Capacitors

SUBMINIATURE PAPER CAPACITORS TO MIL-C-25C

Impregnated with Vitamin Q for performance exceeding MIL-C-25C requirements. Positive hermetic closure of metal case assured by glass-to-metal solder-seal terminals. CP05/CP09 have insulating sleeve; CP04/CP08 have bare metal case. **Construction:** CP04/CP05, inserted tab type for limited space applications; CP08/CP09, extended foil, non-inductive section type. **Tolerance:** ±10%. **Temperature Range:** Characteristic K (−55° C to +125° C).
Note: For Vibration Grade 1, change last digit in MIL Type No. from 3 to **1.**

TYPE CP72 MIL-C-25C CAPACITORS

Mineral oil impregnated for minimum capacitance change with temperature, and the ability to withstand severe operating conditions. Rugged construction for exacting heavy-duty operation. Terminals have ceramic pillar insulators (E) or rubber compression seals (B). Characteristic F units are recommended primarily for ground equipment where no low temperatures are met. **Note:** These units have a capacitance tolerance of ±10%. For ±20% tolerance, change last letter in number to **M** (same price). Temperature Range: −55° C to +85° C. Specify footed or spade mounting bracket. For spade, change sixth letter of mounting bracket number to **S** (i.e., CP072SA1).

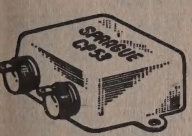
TYPE CP53 MIL-C-25 BATHTUB CAPACITORS



Impregnated with specially processed mineral oil to exceed performance requirements of MIL-C-25. Units are hermetically sealed with silicone rubber compression terminals for −55° C to +85° C operation. Drawn metal cases have mounting flanges as an integral part of the container. Single and dual capacitance units have insulated sections, triple capacitance unit has grounded case. Mounting brackets available.

SINGLE CAPACITANCE UNITS

Capacitance Tolerance: ±10%. For ±20% tolerance, change last letter in No. from "K" to "M" (available at same price).

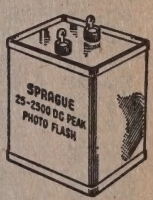
TYPE PQ ENERGY STORAGE CAPACITORS



Designed expressly for photoflash and laser applications—not comparable to standard heavy-duty types such as CR transmitting capacitors. Compact design offers smallest possible energy storage construction with maximum dependability. Hermetically sealed; oil impregnated and oil filled. High insulation resistance.

CERA-MITE® NPO (DISCS)

Zero temperature-coefficient capacitors used where capacitance change with temperature is undesirable. Superior to silvered-mica types in stability, high "Q" and insulation resistance. Rated 1000 WVDC. Std. Tol.: ±5%, 12 pF up; all others ±0.5 pF.

HYPERCON® CERAMIC DISCS

Ultra-miniature discs for transistorized circuitry, bypass and coupling. Especially suited for any low voltage use where high capacitance and low power factors are important. Std. Tol.: HY-420–HY470 and HY-510–HY-550, +80 −20%; all others +50 −20%.

TYPE TE LITTL-LYTIC® CAPACITORS

Ultra small; excellent, dependable replacement units for transistorized equipment presently on the market. Hermetically sealed in metal case. Low leakage current; long shelf life. Furnished with clear plastic outer insulating sleeves. Rated 85° C.

TRW Mylar Capacitors

TYPE 663UW TUBULAR MYLAR* CAPACITORS

Instrument quality capacitors for maximum space saving; tough, durable moisture-resistant plastic case. Conservatively rated for long life and reliable service. Can be produced to high reliability specs comparable to MIL-C-14157 and MIL-C-27287 except size and temp. on special order. Dense thermosetting epoxy endfill bonds securely to lead and case. **Insulation Resistance:** Greater than 70,000 megs-μF, 25° C, but need not exceed 140,000 megohms. **Temperature Range:** −55° C to +85° C; up to +125° C with 50% derating. **Humidity Resistance:** Will meet or exceed requirements of MIL-C-27287, para. 3.12. **Dielectric Strength:** Two times rated voltage. **Life:** 250 hours at 85° C and 125% of rated voltage. **Tolerance:** ±10%; also available in ±20%, ±5%, ±2% and ±1%.

TYPE 601PE "SLIM-LINE" MYLAR CAPACITORS

Special shape and leads for maximum space saving and flexibility in transistor and printed circuit applications. Replaces ceramic discs where stability with temperature change is important. Features high insulation resistance. Available in units comparable to MIL-C-14157 and MIL-C-27287 specifications on special order. Dipped epoxy coating over extended foil (non-inductive) Mylar dielectric. **Insulation Resistance:** Greater than 50,000 megohms-μF at 100 VDC, 25° C for 2 minutes, max. **Temperature Range:** Up to 85° C; derate 50% at 125° C. **Temperature Cycling:** Min. insulation resis., 25,000 megohms after MIL-STD-202B, Method 102A, Condition D no voltage applied test, capacitance change less than 1%, same test. **Dissipation Factor:** Less than 1% at 1 kHz 25° C. **Dielectric Strength:** 100 VDC. **Tolerance:** Units shown ±10%. Available in ±20% and ±5%; prices on request.

TYPES X663F AND X663FR FLAT METALLIZED MYLAR CAPACITORS

Ultraminiature, lightweight design available with axial or radial leads to fit crowded chassis layouts. Thin, oval profile offers significant space saving. Feature high insulation resistance; self healing; long, stable life. **Insulation Resistance:** Better than 30,000 megohm-μF at 25° C, but need not exceed 30,000 megohms. **Dissipation Factor:** Less than 1.0% at 1000 ±20 Hz thru 1.0 μF at 25° C ±5° (.022 μF, 100 and 200 WVDC rated 1.5%); 1.5-50 μF at 60 ±6 Hz. **Temperature Range:** −55° C to +100° C; to +125° C with 50% derating. **Humidity Resistance:** Comply with test requirements of MIL-STD-202C, method 103B, condition A, para. 3.4. **Dielectric Strength:** Twice rated voltage for one minute. **Life:** 250 hours at +100° C and 125% of rated voltage. **Tolerance:** ±10%; also available in ±20%, ±5%, ±2% and ±1%; prices on request.

★WRITE FOR PRICES ON LARGER QUANTITIES

TYPE X483 ULTRAMINIATURE METALLIZED POLYCARBONATE DIELECTRIC CAPACITORS

Hermetically sealed, metal enclosed units offer outstanding electrical properties: High IR, low DF and dielectric absorption; plus excellent retrace, TC and stability. Provide environmental protection to meet or exceed requirements of MIL-C-18312 and MIL-C-19978B. Ideal for transistor circuitry and where close initial tolerances are required. Low dielectric absorption and excellent retrace make these suitable for computer, timing, filter and other critical circuits which may operate to 125° C. High insulation resistance. Both leads insulated. **Temperature Range:** −55° C to +125° C with full rated voltage. **Tolerance:** ±10%; other tolerances available on request. Also available in 100 V and 400 V on request.

TYPE X440 PRINTED CIRCUIT MICROMINIATURE METALLIZED POLYCARBONATE CAPACITORS

Specifically designed for fitting components in today's miniaturized designs. Metallized polycarbonate dielectric, non-inductive winding. Epoxy case with standoffs; radial leads 24 gauge tinned solid wire on 0.2" centers. Life test and humidity resistance meet MIL-C-27287. **Voltage Rating:** 50 VDC from −55° C to +125° C. **TC:** −150 ppm/° C. **Tolerance:** ±10%; other tolerances available. Maximum size, .290" w. x .145" d. x .320" h.

TYPE 608 "MICROLAR" FOIL-WOUND MICRO-MINIATURE CAPACITORS

Ideal for use in potted or extremely precise assemblies; designed for use in "cordwood" packaging and other high density circuitry. **Tolerances:** ±10% standard; ±20%, ±5% and ±1% available on request. **Humidity Resistance:** Exceeds MIL-C-27287, paragraph 3.12. **Temperature Range:** −55° C to +85° C; to 125° C with 50% derating.

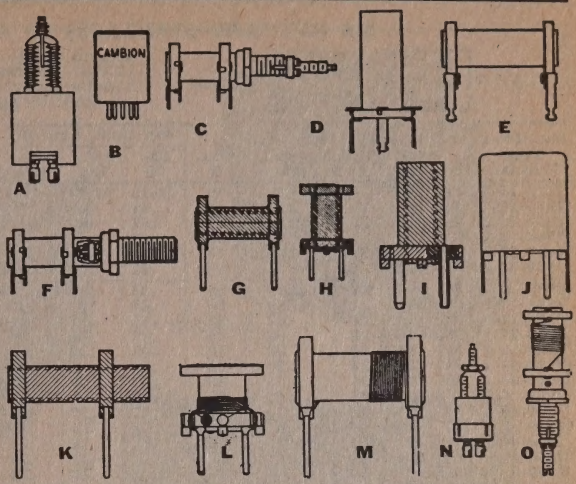
*ORDERING INSTRUCTION CHART

Order by Basic Part No. followed by desired suffix no. 1 (for frequency range) and suffix no. 2 (for terminal and collar or terminal board type) selected from the following chart: 1531-3-2 for 1531 form with 20-50 MHz slug and with 2 collars with 2 terminals each.

SUFFIX NO. 1			SUFFIX NO. 2		
Dash No.	Slug Color	Freq. Range, MHz	Dash No.	Terminal-Collar Locations	Type Term. Bd. (Shielded Forms)
-1	Yellow	.2–1.5	-1	2 ring terminals	2 term. bd.
-2	Red	1–20	-2	2 collars—2 term. ea.	3 term. bd.
-3	Green	20–50	-3	2 collars—1 term. ea.	4 term. bd.
-4	White	50–200	-4	1 top collar—2 term.	5 term. bd.
-5	Black	100 up	-5	1 bot. collar—2 term.	6 term. bd.
-6	Purple	2–50			
-7	Blue	40–300			
-8	Orange	.1–4.5			
-9	Gray	4.5–15.0			

Suffix No. 1: Dash numbers on these shielded forms available only †-1 thru -4, -6 and -7; #-1 thru -4, -6 thru -9. ‡These part numbers **available without slug.** Specify by ordering with -0 for suffix 1. §No final suffix (Suffix No. 2) required on these types.



CAMBION supplies both variable and fixed inductance coils, wound on ceramic or molded forms, or supplied in electromagnetic and electrostatic shielded housings. This listing comprises the more popular items. Ask for complete catalog or for further information if you do not see what you want listed. Variable inductance ranges are supplied in standard EIA 10% overlapping incrementals, within overall ranges shown. Order by part and dash number or specify inductance range wanted if you do not know correct dash number.

OLV-120-5

SERIES OLV ECONOMY GRADE POWER SUPPLIES

Economy grade all-silicon DC power supplies include integrated circuit regulator for precision regulation. Open frame construction, black anodized chassis. Power connections made via solder terminals. Standard features include short circuit protection, electrostatically shielded transformer, and remote voltage sensing. Floating output permits positive or negative operation. Can also be operated on 50–60 Hz (optional on series OLV-15). **Input Voltage:** 120/240 VAC, 10% single phase, 50–60 Hz (optional on series OLV-15). **Output Regulation:** .1% for line variation of 10%; .1% for 0 to full load. **Noise and Ripple:** Less than .1%. **Output Voltage Adjustment:** 5% at full load. **Temperature Range:** 0–55° C ambient operating temperature. Optional adjustable overvoltage crowbar available.

SPECIFICATIONS

Input Voltage: 120/240 VAC, 10% single phase, 50–60 Hz (optional on series OLV-15).

Output Regulation: .1% for line variation of 10%; .1% for 0 to full load.

Noise and Ripple: Less than .1% peak to peak.

Output Voltage Adjustment: 5% at full load.

Temperature Range: 0–55° C ambient operating temperature.

SERIES ELV COMPUTER GRADE POWER SUPPLIES

Reliable source of regulated DC voltage for commercial, industrial, research, educational and service applications. Smooth action controls permit adjustment to exacting requirements. Computer grade all-silicon solid state DC power supplies include integrated circuit regulators for precision regulation. Fully enclosed, ventilated black and gold anodized aluminum case. Power connections made by means of barrier strip terminals. Standard features include short circuit protection; adjustable overvoltage crowbar protection; and remote voltage sensing. Floating output permits either positive or negative terminal to be grounded. **Input Voltage:** 120 or 240 VAC, ± 10%, single phase, 47 to 420 Hz. **Output Regulation:** .1% for line variation of 10%; .1% for 0 to full load. **Noise and Ripple:** Less than .1%. **Output Voltage Adjustment:** 5% at full load; electrostatic shielded transformer. **Temperature Range:** 0–55° C ambient operating; no additional cooling required.

SUBMINIATURE LOW-PASS FILTERS FOR EMI SUPPRESSION

Erie Filtercons are high-frequency low-pass RF filters designed to provide maximum effective attenuation in the UHF range, eliminating parallel resonance peaks. Performance superior to standard tubular feed-thru capacitors at frequencies above 100 MHz. Erie Broad-Band EMI Suppression Filters are miniaturized L-section types for use in low-voltage circuits; suppress interference caused by switches, relays, etc. over an extremely wide frequency range. For both filters and broadband types, minimum insertion loss figures are per MIL-STD-220 for a temperature range of −55° C to +125° C unless otherwise noted.

SERIES 1206 AND 1212 MULTI-SECTION FILTERS

Miniature multiple-channel filters. Elements are soldered into silver-plated brass case with hermetically sealed low-loss glass end-seals. Cross-channel separation exceeds 50 dB to virtually eliminate cross-channel coupling. Rated 350 WVDC. Tapped holes for #4-40 bolts. Min. insertion loss 50 dB, 100–2000 MHz except as noted.

Erie No.	Sections	Body Lgth.†	Net Each, Lots of 1-49	50-99	100-249	250-499	500-999

*Min. insertion loss 45 dB, 100–200 MHz; 50 dB, 200–2000 MHz. †Not including .281″ lg. terminals, each end.

SERIES 1216, 1233 AND 1234 SINGLE SECTION TYPES

Minimum insertion loss, MIL-STD-220: 40 dB, 5 MHz; 65 dB, 20 MHz; 65 dB, 100 MHz; 65 dB, 10 GHz. Operating temperature range: At 100 WVDC, −55° C to +105° C; at 70 WVDC, −55° C to +125° C. Maximum DC and low frequency current, 10 A.

SINGLE-SECTION TYPES

Single-section, low-pass EMI filters for bushing or eyelet mounting. **Series 1201:** Small bushing type for rugged use; filter element soldered inside the bushing; ends potted with resin. **Series 1202:** Large-bushing version of 1201; same husky construction but has hook terminals. **Type 1203:** Miniature version of 1201 with heavily tinned eyelet for soldering into chassis. **Type 1204:** Same as 1202 series but with tinned eyelet for solder installation. **Type 1250:** Subminiature, low-voltage bushing type similar in construction to the larger 1201 series; offers improved volumetric efficiency and simple mounting. **Series 1270 and 1280:** Larger versions of type 1250, 1270-009 and -024 have miniature bushing; 1280-060 is for high voltage use. Filtercon EMI filters listed in table below are stock items. Other models are available on special order; prices on request.

SERIES 1200 EMI SUPPRESSION FILTERS

Broadband filters specifically designed to suppress RF interference caused by electromechanical switches, relays, motor commutators, SCR and transistor switching, etc. Offering lightweight, compact construction excellent for aerospace applications, these non-polar devices are suitable for use on either low-voltage DC or AC lines. Combine operating reliability and high attenuation (down to 30 kHz) in a miniature, hermetically sealed, silver-plated steel case. WVDC: 50 at −55° C to +85° C; 28 at −55° C to +125° C. Recommended mounting torque 8–10 in. lbs. Typical weight, 5.6 grams. Tolerance, ≐.010. Approx. Size: .375″ dia. x .720″ lg., hex case types .995″ lg.; ¼-32 bushing. Terminal styles available: Series 1200-021 thru -025 and -028 and 1285-025, two flag terminals and .187″ lg. thread; 1200-091 thru -095 and -098, two flag terminals and .312″ long thread. With lockwasher and hex nut.

Series 1200 and 9000

9050, 9051

LOW PASS—L TYPE—10 kHz TO 10 GHz—50 WVDC, 125° C

Operating Temperature: −55° C to +85° C at 50 V; −55° C to +125° C at 28 V. Case dia., .385″. Overall length, 1.067″. ¼-28 threaded bushing. Flag terminals both ends.

SERIES 9000 EMI SUPPRESSION FILTERS

Wide selection of precision-built, low-pass, power-line and feed-thru types EMI suppression filters. Hermetically sealed in sub-miniature cases for positive protection against any environmental condition. Available in L, Pi, T and C types for operation in various frequency ranges up to 10 GHz. **Tolerance:** ≐.010, unless specified. **Operating Temperature Range:** −55° C to +85° C or +125° C, as specified. Supplied with lockwasher and hex nut.

LOW PASS—L TYPE—10 kHz TO 10 GHz—50 WVDC, 125° C

Operating Temperature: −55° C to +85° C at 80 V; −55° C to +125° C at 50 V. Peak transient voltage, 160. I.R. megohms, minimum, 100. Gold-plated copper leads both ends. Diameter, .375″. Part No. 9050, resin sealed; 9051, hermetic sealed. ¼ x 28 threaded bushing.

HIGH VOLTAGE SILICON RECTIFIER

Series HV10 miniature high voltage silicon rectifiers available in rated peak reverse voltage from 1 kV to 5 kV, in molded type and protective coated type. Feature extremely small size, nanoampere leakage, solid silver leads and an operating temperature range from −55° C to +125° C. Maximum forward current, derate 2 mA/° C from 100° C, 50 mA. Forward voltage drop at 10 mA at 25° C, 5.0 volts. Maximum capacitance at 100 VDC, 0.5 pF. Size: Protective coated type, .130″ body lgth., .085″ dia., .75″ lead lgth. Molded type, .250″ body lgth., .100″ dia., .75″ lead lgth.

Erie No.*	Peak Reverse Voltage	Max. Reverse Current at 25° C	Max. Reverse Current at 100° C	Cathode Dot Color Code	Net Each, Lots of 1-99	100-499	500-999

*Suffix **M** in Erie No. specifies Molded Type; Suffix **P** specifies Protective Coated Type.

FULL WAVE BRIDGE RECTIFIERS

Style 3000 full wave bridge rectifiers are series of miniature bridges with double-sealed modules designed for printed circuit applications. Available with working voltage from 100 to 1000 volts per leg. Operating temperature range from −55° C to +100° C. Double seal insures moisture resistance to MIL-STD-750A, Method 1021.1. Storage temperature, −55° C to +125° C. Surge current, 1 cycle 60 Hz, 25 A. VF per leg 1 A at 25° C, 1.1 VDC. I.R. per leg PRV at 25° C, 5 μA. Size, .500″ square top; .250″ h., .750″ leg length, .031″ leg dia.

WEE DUCTORS

Subminiature shielded inductor. Provides special merits in high density circuit applications. Has great inductance-to-size ratio. Conforms to MIL-C-15305C, Grade 1, Class B specifications.

Inductance Tol.: ±10% (0.1 to 22 μH), ±5% (27 to 1000 μH), ±10% (1200 to 56,000 μH), ±20% (68,000 to 180,000 μH). **Size:** .164″ dia. x .450″ lg. **Leads:** #24 AWG, 1.3″ lg. **Operating Temp.:** −55° C to 125° C.

SUPER WEE DUCTORS, MS90537, MS75087, MS75088 AND MS75089

Meet MIL-C-15305C, Grade 1, Class B. Epoxy-molded envelope and shielding offers reliability, electrical performance and min. coupling in high density packaging. **Inductance Tol.:** ±10%. **Size:** 0.157″ x 0.395″. **Leads:** #22 AWG, 1 7/16″ lg. **Operating Temp.:** −55° C to +125° C. **MS90537 Series** has "T" design, eliminating fine wire considerations.

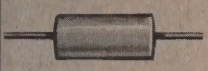
WEE-WEE DUCTORS

RFC-M INDUCTOR



RFC-S INDUCTOR

RFC-L INDUCTOR

WEE-WEE DUCTORS

Subminiature shielded inductor, permits high density applications. Great inductance-to-size ratio. Color-coded per MIL-C-15305C. **Inductance Tolerance:** ±10%. **Power Rating:** I max. based on ½ watt dissipation. **Operating Temperature:** −55° C to +125° C. **Size:** 0.133″ dia. x 0.335″ lg. **Leads:** #24 AWG, 1.3″ lg.

SUPER WEE-WEE DUCTOR SERIES ALSO AVAILABLE

Shielded miniature design provides greater inductance-to-size ratio in molded epoxy envelope. "T" lead construction in values 15 to 10,000 μH for exceptional reliability. Meets MIL-C-15305C, Grade 1, Class B specifications. **All values stocked from 0.10 to 10,000 μH. Prices and Specifications on request.**

PEE-WEE DUCTORS ULTRA MINIATURE

Amazing Pee-Wee Ductors represent a 66% size reduction from the smallest magnetically-shielded, axial lead inductor series previously available anywhere. Furthermore, this size reduction was obtained with negligible loss of electrical performance by employing several unique concepts in RF coil design. **Inductance Tolerance:** ±10%. **Operating Temperature:** −20° C to +80° C. **Size:** .085″ dia. x .155″ lg. **Leads:** #26 AWG, 1.5″ lg.

DECI-DUCTORS

The smallest RF inductor. It offers epoxy-molded reliability and uniformity. Meets specifications of MIL-C-15305C, Grade 1, Class B. **Inductance Tol:** ±10%. **Size:** 0.100″ x 0.250″. **Leads:** #24 AWG, 1.25″ lg. **Operating Temp.:** −55° C to 125° C.

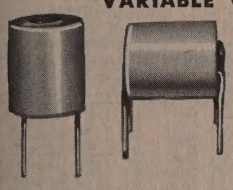
VARIABLE VIV-VIH DUCTORS



Miniature type, encapsulated in epoxy resin for reliability. Meets requirements of MIL-C-15305A, Grade 1, Class B. **Inductance Tuning Range:** ±10% (0.1 μH), ±15% (0.15 to 0.22 μH), ±20% (0.33 to 4700 μH). **Size:** 0.40″ dia. x 0.50″ lg. (vertical style); .40″ dia. x .5″ wide (horizontal style). **Leads:** #22 AWG. **Operating Temp.:** −55° C to +125° C.

WEE-CHIP INDUCTORS

A magnetically shielded, miniaturized, fixed inductor made especially for mounting on substrates. The inductor body is constructed of high stability, low-loss ferrite, combined with a coil cavity of optimum cross sectional area and mean radius, producing a unit having excellent Q factor. Copper terminations are of the wrap-around type for the greatest degree of mounting flexibility. Tolerance: ±10%.

NEW PEE-DEE DUCTORS

Microminiature, axial-lead RF inductors meet MIL-C-15305, Grade 2, Class 5 specifications. **Inductance Tolerance:** ±10%. **Operating Temperature:** −55° C to +125° C. **Size:** .075″ dia. x .140″ lg. **Leads:** #26 AWG, 1.5″ lg.

NEW ADJUSTOROID INDUCTORS

New development in the toroidal coil field; offers available toroid in one of three case sizes. Developed for PC and similar light weight applications. Meets MIL-C-15305A specifications. **Inductance Tuning Range:** ±5%. **Operating Temperature:** −55° C to +125° C. **Size:** ATE-11, ¾″ dia. x 1 3/16″ lg.; ATE-0, 1 1/16″ dia. x 1″ lg.; ATE-4, 1 5/16″ dia. x 1 3/16″ lg. **Leads:** #20 TCW.
